*Mechanical Measurements* New Age International

The 'Maintenance and Work Simplification' will certainly enrich the book regarding the maintenance planning. A major emphasis has been given at every step to furnish figures which may be easily understandable and reproducible by the students.

**R.C.C Design & Drawing** Springer

This first-of-a-kind volume provides a snapshot of existing science communication policy and practice in India across different S&T sectors, and offers solutions to building effective communication. It provides an understanding on how to avoid societal clashes in situations when science meets the public in these sectors. The editors and contributors argue that effective S&T communication leads not only to a more informed public but also benefits research itself, and in a changing society like India this is a crucial element related to good governance and policy making. In this volume, experienced masters of the craft provide practical solutions to making S&T communication more effective in a vast democracy like India, which has complex issues related to literacy levels, diverse languages, varying political will, reach,

and resources. Through discussions on cases of creating information modules for the public on the Internet, television and radio, social media, as well as traditional ways of outreach like people's science movements, holding popular science events, and fairs, the volume provides highly valuable directions on how developing countries with low resources and complex populations can communicate S&T research to the public and bridge communication gaps. This volume will interest researchers from science, social science, mass communication and public relations departments, journalists, as well as practitioners and policy makers from government and non-government institutions involved in S&T policy, practice and communication and people who want to understand the complex S&T landscape of India.

It Has Often Been Experienced That Students Are Required To Perform Experiments On Certain Topic Before The Relevant Theory Has Been Taught In The Class. A Laboratory Manual Which, In Addition To A Set Of Instructions For Performing Experiments, Includes Related Theory In Brief Could Help Students Understand Experiments Better. In Response Of Demand From A Large Number Of States For An Appropriate Laboratory

Manual In Basic Electricity And Electrical Measurements, The T.T.T.I., Chandigarh, Has Prepared This Manual Which Has Been Tried Out In Various Polytechnics And Improved Based On The Feedback. The Basic Objective Of The Manual Is To Encourage Students To Perform Experiments Independently And Purposefully. The Manual Organises The Information To Enable The Students To Verify Known Concepts And Principles And To Follow Certain Procedures And Practices And Thereby Acquire Relevant Skills. Detailed Instructions For Carrying Out Each Experiment Alongwith Relevant Theory In Brief Have Been Given. The Objectives For Performing An Experiment Have Been Included At The Beginning Of Each Experiment. A List Of Questions Given At The End Of Each Experiment Will Help Students Evaluate His Own Understanding. The Manual Also Includes Guidelines For Students And Teachers For Its Effective Use. An Assessment Proforma Given At The Beginning Of The Manual May Be Used By The Teachers In Evaluating The Students.

*Modern Management Techniques* Laxmi Publications

A comprehensive text based on the results of a scientific analysis of the communication needs of professionals.

*Teaching Science* McGraw-Hill Education (UK)

With reference to university degrees of India.

*A Dictionary of Economics and Commerce* Thomas Allen Publishers

One of the most comprehensive books in the field, this import from TATA McGraw-Hill rigorously covers the latest developments in medical imaging systems, gamma camera, PET camera, SPECT camera and lithotripsy technology. Written for working engineers, technicians, and graduate students, the book includes of hundreds of images as well as detailed working instructions for the newest and more popular instruments used by biomedical engineers today.

*Workshop Practice Manual* Notion Press

Worksheets are included to act as observation book for taking readings. Tips on practical application of the tools and instruments are given. Adages found in each page are unique for motivation and personality development of the students. Illustrations of the tools used in various sections of workshop are provided.

**Comprehensive Practical Physics XI** Harper Collins

Fuelled by example and application, this text takes readers on an in-depth, hands-on exploration of the hardware and software - giving equal treatment to both - of the Intel 8088 microprocessor. After examining more than 60 different applications, Antonakos guides readers through the construction and programming of their own 8088-based computer. This edition expands coverage to include completely new topics while it updates treatments of existing topics, in an overall effort to allow greater access to the power of the personal computer.

Well-known economists and policy makers look at the Bihar model of development and discuss the challenges ahead. During the 1990s, Bihar's development failed to benefit from the acceleration in India's economic growth, principally because of a steep decline in the already low standards of governance. This changed dramatically after November 2005, when The Nitish Kumar government came to power. Within a short time, major initiatives were launched in improving governance, infrastructure, education, especially primary and for girl children, health and agriculture. The last six years have shown that rapid economic development is possible in Bihar. To maintain the momentum of growth, the recent improvements in governance have to be consolidated and strengthened. Eminent economists like Amartya Sen, Kaushik Basu, Montek Singh Ahluwalia, Meghnad Desai,

Shankar Acharya and Arvind Virmani analyse the remarkable turnaround witnessed by Bihar. Experts Tarun Das, Deepak Parekh, Lord Billimoria, K.V. Kamath and Isher Judge Ahluwalia speak of the opportunities and challenges ahead. This is a must read for anyone interested in governance and development.

*An Introduction to the Intel Family of Microprocessors* Sarup & Sons

One may be getting dangerously close to the tipping point as a result of continued use of energy threatening our very survival. Sustaining meaningful existence and leading a productive life that contributes value, under the circumstances, has become a challenge for the majority of the world population that still suffers deprivation. The book by the eminent author and modern-day Solar reformist, Dr Chetan Singh Solanki, "Energy Swaraj - My Experiments with SOLAR truth" makes a compelling case for localised energy generation & consumption by communities and individuals for sustainability is based on his real-life experiments with Solar and the surrounding truth. - Anil Kakodkar, Former Chairman, Atomic Energy Commission, India.

*Electricity End-use Efficiency* APH Publishing

Plant diseases often are the worst natural hazards in agriculture, horticulture and forestry. New diseases and new biotypes of existing disease producing organisms appear from time to time in more virulent forms. The most startling aspect of plant diseases is that their management cost us a huge sum every year with serious consequences in environment and human health.

Therefore, integrated disease management practices need to be refined and adopted to reduce the crop losses. In this book, the current status of various aspects of integrated disease management in fruits, vegetable, ornamentals, cereals, pulses, oilseeds, medicinal and forest plants etc. has been analyzed. Major focus is on the integrated disease management in horticultural crops. Emphasis has been given to the use of non-chemical methods like cultural practices, soil solarization, plant growth promoting microorganisms, organic amendments, botanicals and biocontrol agents. It is hoped that the book will serve as an important guide to the plant pathologists, horticulturists, nematologists, microbiologists, mushroom scientists, breeders and students.

*Biomedical Instrumentation: Technology and Applications*

McGraw-Hill Science/Engineering/Math

This work sets out to answer questions such as, what have we learned after three decades of research into school effectiveness? What can we say with confidence about how schools improve? It reviews findings from seminal international work.

*Town Planning Made Plain* S. Chand Publishing

"This is a book about a test which is barely fifteen years old--a promising adolescent emerging from the rites of puberty. The Thematic Apperception Test (TAT) has not yet attained full stature, that is certain, and perhaps this book should have awaited its further development. It is with the hope that the maturation of the test might be accelerated that I venture to publish a series of lectures delivered to a seminar on the diagnosis of personality. Many of the characteristics of lectures will be found in these pages--more questions are asked than answered, hypotheses are illustrated more than proven, much that might have been mentioned briefly is laboriously illustrated, and what might have been elaborated is expressed obliquely. It is a workbook and not a compilation of established doctrine. I have addressed myself to two audiences: those who are completely unfamiliar with the TAT and research psychologists whose interest I hoped to enlist in the exploration of a host of problems--problems of test interpretation which are also of import for the

science of which the test is a constituent element. Because of these aims, the psychologist who is long familiar with the technique of interpretation and whose interests are primarily diagnostic may find too much that is well known and too much that is remote from his immediate clinical concern"--Preface.
