## DEANDRE ALBERT

**Humpty Dumpty** Legare Street Press

Get your wiring project done right the first time with site-tested advice from the pros. The most comprehensive reference for homeowners are available, Wiring Complete is filled with trade secrets only a pro would know, as well as detailed instructions and over 800 photos and drawings that show every step.

**The Art of the Racing Motorcycle** Rally Amer

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

**Motor Heavy Truck Repair Manual** Rizzoli Publications

by Martin Holmes Written by an international rally journalist and photographer, this is a collection of interviews with experts covering every aspect of present-day rally navigation, from club level to world championship events. A bible for co-driving wannabes Auto Express

**Secrets of a Ukrainian Baba** Chronicle Books

Blast off and experience space travel with this collection of fascinating, funny, and sometimes weird anecdotes from real astronauts. Everyone wonders what it's really like in space, but very few of us have ever had the chance to experience it firsthand. This captivating illustrated collection brings together stories from dozens of international astronauts—men and women who've actually been there—who have returned with accounts of the sometimes weird, often funny, and awe-inspiring sensations and realities of being in space. With playful artwork accompanying each, here are the real stories behind backwards dreams, "moon face," the tricks of sleeping in zero gravity and aiming your sneeze during a spacewalk, the importance of packing hot sauce, and dozens of other cosmic quirks and amazements that come with travel in and beyond low Earth orbit. Praise for What's It Like in Space? "Houston, we have a winner." —Oprah Magazine "[A] captivating illustrated collection."

—Smithsonian Magazine "A delightful mini-coffee table book about all the awkward and beautiful moments you can have in space, based on dozens of interviews with people who have actually been there. If you're looking for a fun read about life outside the gravity well, check out What's It Like in Space?" —Ars Technica "This charmingly illustrated book is much meatier than its diminutive size would suggest. These snippets are so clear, so beautifully curated, that they really do leave you with a sense of what it must be like to float miles above Earth." —Entertainment Weekly

**Rally Navigation** Charlesbridge Publishing

Musical sounds go up and down! Follow the artwork with your voice, body, instruments, and sounds created from objects around you, as they lead you to high sounds, low sounds, and all the sounds in between!

**The Motorcycle** Haynes Publications

"This Standard applies to eye and face protectors used in all occupational and educational operations or processes involving hazards to the eyes or face. Typical hazards include flying objects and particles, splashing liquids, molten metal, and ultraviolet, visible, and infrared radiation, but do not include X-rays, gamma rays, high-energy particulate radiation, radioactive materials, or masers. This Standard sets minimum performance requirements in the tests described herein but does not cover factors of design such as comfort, service life, or appearance."--Scope.

**Narrow Fabric Weaving** Taunton Press

What could be more appealing than taking a small branch from a tree in your garden and, with a few simple tools, making a wooden spoon to use in your kitchen or give to a friend? Carving this way is a very accessible hobby. The tools are reasonably priced, the raw material is everywhere (yes, it grows on trees!) and there is no need for a dedicated workspace. This book is an introduction to a set of knife and axe cuts that will help you use spoon carving tools effectively and safely. The teaching method is unusual in that it initially focuses on the skills needed to use the tools, rather than what you are making.

**The Road Rally Handbook** Motor Information Systems

A lavishly illustrated and definitive look at the design evolution of the racing motorcycle. The dynamic between competition and design has always fueled the evolution of racing motorcycles and inspired astonishing feats of design and engineering. This book traces the development of the sport bike, from the earliest French motorcycles to the dominance of British machinery in the 1930s, the exotic Italian motorcycles of the 1950s and 1960s, the influence of American racing in the 1970s and 1980s, and today's Japanese superbikes. More than fifty classic motorcycles—from

Harley-Davidsons to Peugeots, Velocettes, Moto Guzzis, BMWs, Kawasakis, and Ducatis—are presented chronologically illustrated with stunning studio photographs that present the machines as works of art and wonders of design in themselves, accompanied by rare and beautiful archival images that place the subjects in the contexts of classic races, rallies, and motorcycle shows, and accompanied by essays revealing the legends behind the machines. Some of the championship motorcycles featured include the 1902 Manon, the 1922 Harley Davidson 8-valve, the 1935 Terrot 500, the 1948 AJS Porcupine, the 1954 Moto Guzzi V8, the 1965 Honda GP 250, The 1976 Suzuki RK67, the 1986 Cagiva GP, and the 1990 Ducati Supermono.

**What's It Like in Space?** Phaidon Press

The traditional rhyme is expanded to describe some of Humpty Dumpty's other mishaps.

**The Treasury** St. Martin's Press

This is the story of a remarkable dog who is a determined survivor and his rescue by a man who did not want a dog.

**Up and Down Sounds**

An essential and compelling exploration of the design, history, and culture of the motorcycle - an icon of the machine age. Motorcycles are ubiquitous in the world's streets and cities, evolving over decades in engineering and design to meet individual transportation needs. With the coming demise of the internal combustion engine and the rise of electric powered vehicles, motorcycle design is being revolutionized by new technologies, the demands of climate change, and global social transformation. The Motorcycle: Desire, Art, Design traces the exciting evolution of this automotive icon - and the culture of desire, freedom, and rebellion that surrounds it. The Motorcycle showcases 100 superb examples of motorcycle design from the late 19th century to the present day and beyond to the technological innovations of the future. Beautifully illustrated with newly commissioned photography and archival ephemera, this visually arresting survey will prove compulsive reading to design lovers and motorcycle fans alike.
