This is a study of the social, economic, and political role of Vodka in nineteenth-century Russia. Since the 'Green Serpent' first appeared in sixteenth-century Muscovy, it has played a vital part in Russian life. Vodka became an essential part of Russian working-class celebrations: personal, religious, and commercial. Trade in Vodka redistributed wealth upwards through Russian society over several centuries. Indeed, Russia's status as a great power was underpinned by it: by the nineteenth century, it generated one-third of government revenue - enough to cover most of the costs of the vast army. The dependence on Vodka of both people and state has endured into the Gorbachev era. But despite Vodka's key role in Russian history, and the complex network of corruption associated with it, the subject has been ignored by most historians until now. This study concentrates on an important transitional era in the history of Vodka: the early nineteenth century. During this period, Vodka taxes played the role that salt taxes had played in the ancien régime in France. The abolition of the tax farm in 1863 should be seen as one of the most important of the 'Great Reforms' of the 1860s, an era which, in many ways, parallels the glasnost of the 1980s.

An astonishing interpretation of the Eden story by the co-author of the bestselling *The Book of J*. Just as that book turned Biblical scholarship on its ear by concluding that parts of the Hebrew Bible were written by a woman, *The Lost Book of Paradise* breaks new ground by challenging our assumptions about the world's most powerful creation story--Genesis.

David Herbert Lawrence (11 September 1885 - 2 March 1930) was an English novelist, poet, playwright, essayist, literary critic and painter. His collected works represent, among other things, an extended reflection upon the dehumanising effects of modernity and industrialisation. Some of the issues Lawrence explores are sexuality, emotional health, vitality, spontaneity, and instinct.

"Lost Illusions" is one of the greatest novels in the rich convoy of the "Human Comedy" by Balzac. The story is about a young poet, Lucien Chardon who leaves the outmoded life to seek success in Paris. He tries to make a name for himself in Paris. This classic will keep you gripped till the very end with its impressive touches.

100,000 years ago we became human. A species of clever ape abruptly became something different. Technical, religious, artistic,

musical, political, military and criminal abilities emerged and exploded. Rapid changes and murderous brilliance became the predominant features of our world. How did this happen? The first modern humans originated in Africa. From there they migrated over the whole of Eurasia and Australasia. These first humans carried with them the genetic basis of schizophrenia, the only major illness found to the same extent in all racial groups. This universal distribution shows that the disease must have been present before the races separated. Modern evidence shows that families where schizophrenia is present are also exceptionally creative in many different fields. Albert Einstein and James Joyce each had a schizophrenic child. Families with schizophrenia also have more dyslexic and manic-depressive members, more sociopaths and criminals, but also more high achievers in every field. In this radical book David Horrobin draws on his knowledge of medicine, of evolution, of psychiatry, of Africa and of nutrition to generate a startling hypothesis: we are human because some of us are schizophrenic and because a 'touch of schizophrenia' is associated with exceptional skills of many sorts, both good and evil, and with that creativity which defines us and separates us from our nearest primate relatives. His own research, extending this concept, strongly suggests that an effective treatment for schizophrenia, using specific nutrients, may be within our reach. This remarkable theory not only addresses the deepest issues of humanity, but also has the potential to be world-changing in practice, not at some distant future date but within the next decade.

Milton's Socratic Rationalism focuses on the influence of Milton's years of private study of classical authors, chiefly Plato, Xenophon and Aristotle, on *Paradise Lost*. It examines the conversations of Adam and Eve as a mode of discourse closely aligned to practices of Socrates in the dialogues of Plato and eponymous discourses of Xenophon.

When a violent ocean storm causes a crate holding assorted plastic tub toys -- including one resilient little duck -- to wash overboard, the course of Ducky's life alters drastically. This engaging story based on a real event includes an author's note. *Ryde on Rating. 12th Ed., by David Widdicombe, David Trustram Eve & Anthony Anderson* Litres

Eve Evans is growing up fast. Everyone seems to know what they want to do with their life, where to go and who to date, but Eve has not got a clue. The thought of university fills her with dread. To the outside world she seems to have a perfect life. Sure, her Dad left her when she was little more than a toddler... and sometimes strange things happen around her. That is the part that is public knowledge. The part Eve keeps hidden is her bipolar mother who struggles to keep a roof over Eve's head and the bailiffs knocking on the door. Something had to give somewhere along the line... One night, at 3:15am, a fairground rolls into town and sets up in the dead of the night. Behind the facade is a skills test booth for a school for exceptional children. A school that sits in the middle of a hidden island in the North Sea. A school that Eve finds has many dark secrets. And a vampire in the dungeon. Eve must learn to use her talents to survive and more importantly, she has to choose her new friends very carefully as she discovers that sometimes vampires can be closer than you think."

The novel Eve and David is the third entry in Honore de Balzac's Lost Illusions trilogy, which in turn is part of his larger novel cycle, The Human Comedy. The story focuses on a pair of earnest, good-hearted lovers who struggle to remain unsullied even as the world around them devolves into a hellish demimonde beset by greed, sensationalism, and baseness.

Eve on Top takes an in-depth look at the position of women in senior positions in the public sector using a case-study approach, based on ten 'successful' women and their background, upbringing, career progression, successes and failures, challenges and experiences. Each case study includes a 'lessons learned' response in the form of advice both to other women, and the organisations in which they work. Surrounding and supporting the case studies are short essays charting the main themes that emerge from the interview process, backed up by extensive literature reviews. The book also compares relevant public sectors in different parts of the world and concludes with several case studies. Summarises the commonality and the diversity of the challenges and issues Provides an analysis of the factors that help and hinder women in reaching the top positions Provides solutions

suggested by detailed analysis of real-life experiences

As I mingled among my fellow graduates, my view of the future did not extend much beyond the following day, when I would be heading to the beach. College in the fall was too far in the future to contemplate now. The only days that held relevance were the next ninety-nine, which would fashion what I hoped to be my best summer yet. So begins The Eve of Destruction, David Dickey's coming-of-age tale about the summer of 1965, a tranquil time when the country rested unwittingly on the brink of a cultural revolution. Follow eighteen-year-old Dane, Woody, and the crew around their Southern California neighborhoods as they experience the ups and downs of friendship and young love, and wrestle with some of life's basal choices. Join them on misadventures and general teenage mischief as they seek revelry and endure summer jobs. With music, cars, and popular culture of the decade woven into the backdrop, The Eve of Destruction is a nostalgic story about the 1960's and a worthy ode to the Boomer generation.

A close look at the widely accepted but little scrutinized belief that cubism forged a vital link between avant-garde practices in early twentieth-century painting and architecture.
