CHAMBERS CABRERA

Looking in Classrooms & Mylabschool Pkg Guilford Press
Presents research reviews in several areas including student motivation, classroom instruction and student learning, classroom management, and adapting instruction to the needs of individual students.

Middle Leadership Mastery SAGE

To make the best decisions possible, middle leaders need to have a nuanced understanding of the consequences of their actions. In this pragmatic book, Adam Robbins aims to boost their role-specific expertise to help them achieve that goal - and offers them a preferable alternative to learning from their mistakes. Instead of relying on generic leadership theories, Middle Leadership Mastery collates perspectives from psychology and cognitive science to share evidence-informed guidance on a wide range of topics - from supporting staff and students in crisis and managing wellbeing, to quality-assuring teaching and curriculum design. Adam Robbins draws on his sixteen years' experience of teaching in a deprived area to illustrate his points with stories and anecdotes from the front line, demonstrating how middle leaders can better understand their context and deliver the best outcomes from a variety of starting points.

Looking in classrooms Rethinking Schools

If children are to succeed and progress at school, schools and teachers need to understand how children experience the classroom. What do they think? How does school make them feel? This book brings together the author's work on children's classroom experiences in a variety of contexts. The author uses student voice to show what children think of classrooms, tasks, tests and exams, and how this impacts their experience of schooling. Can the classroom experience be transformative for children's life chances, or is it a trap? Schools and teachers need to take account of student perspectives in the primary school to make it the best experience possible.

Visible Learning: Feedback Pippin Publishing Corporation

Essay topics include achieving equity for all students; creating equity awareness in teachers; working with families & communities to close the opportunity gap Equity is a term we hear a lot these days, but what does it really mean? How can teachers ensure that every student gets what he or she needs to learn and succeed? Education leaders from around the country share their thoughts through essays that explore topics such as: how to achieve equity for all students; creating equity awareness in teachers; working with families and communities to close the opportunity gap; setting high expectations to raise academic achievement; and more.

Substantial Classrooms Routledge

Alfie Kohn challenges conventional notions on everything from students' self-esteem to school uniforms in this witty, passionate, and provocative collection.

What Does This Look Like in the Classroom?: Bridging the Gap Between Research and Practice Routledge

"More research-based teaching" is the cure-all answer so many people give when asked how we can most effectively improve education today. Every year thousands of research papers are published, some of which contradict each other. Schools that adopt and drop new reforms with every new research fad find themselves wasting resources and burning out. How can school leaders discern which trends are essential to school improvement? How can busy educators know which research is worth investing time in? What does the research look like in a real classroom, practiced by a real teacher? In this thorough, enlightening, and comprehensive book, Carl Hendrick and Robin Macpherson ask 18 of today's leading educational thinkers to distill the most up-to-date research into effective classroom practice in 10 of the most important areas of teaching. Brought to an American audience for the first time, it's an indispensable primer for every teacher and school leader who wants to practice what good research says really works. The Skillful Teacher Teachers College Press

`The book is at once accessible, evidence-based, practical and eminently readable...Readers will find in this book a treasury of learners' voices guiding us towards the goal of more effective learning in classrooms' - International Network for School Improvement `This book promotes an ambitious and inspiring conception of meaningful pedagogy and works to applaud those teachers who are determined to reflect upon, enquire into, and then facilitate "effective learning". A coherent and structured case is made for the primacy of "learning" over "work" - Learning & Teaching Update This book addresses an important, and too seldom addressed issue: learning. Not teaching, not performance, not "work": this book really is about learning, what makes learning effective and how it may be promoted in classrooms. The authors take the context of the classroom seriously, not only because of its effects on teachers and pupils, but because classrooms are notorious as contexts which change little. Rather than providing yet more tips, they offer real thinking and evidence based on what we know about how classrooms change. Four major dimensions of promoting effective learning in classrooms are examined in depth: Active Learning; Collaborative Learning; Learner-driven Learning and Learning about Learning. Evidence from practising teachers in the form of case studies and examples, and evidence from international research in the form of useful ideas and frameworks is included.

Looking in Classrooms Allyn & Bacon

Teaching is a lifelong challenge, but the first few years in the classroom are typically a teacher's hardest. This expanded collection of writings and reflections offers practical guidance on how to navigate the school system, form rewarding relationships with colleagues, and connect in meaningful ways with students and families from all cultures and backgrounds.
Thirty Years of Learning Environments John Wiley & Sons
In this study - the outcome of three years' participant observation

in local authority primary and secondary schools – the classroom teacher is shown to have a far greater impact upon and responsibility for his pupils than is generally admitted. The teacher's perceptions of the children in his class are demonstrated to have a more important bearing on the pupils' attainment than the major factor of their social class. In carrying out this research, Roy Nash has moved outside the mainstream tradition of educational psychology to take into account the methods of anthropology and sociology. He shows, by looking at the actual behaviour of teachers and children in classrooms, and by following the pupils from several different primary schools through to the same local authority secondary school, how the teacher's expectations for his pupils can act as self-fulfilling prophecies. The author's illuminating research is illustrated with tables and with three Appendices.

Every day, 250 children are suspended from school. Many are children of color, deprived of opportunities to experience learning at the same rate and quality as white children. Many families don't feel heard or respected in their child's schools. Don't Look Away: Embracing Anti-Bias Classrooms leads early childhood professionals to explore and address issues of bias, equity, low expectations, and family engagement to ensure culturally responsive experiences. Importantly, this book will challenge you to consider your perceptions and thought processes: Identify your own unconscious biases-we all have them! Recognize and minimize bias in the classroom, school, and community Connect with children and their families Help close the opportunity gap for children from marginalized communities This book offers strategies, tools, and information to help you create a culturally responsive and equitable learning environment.

[Look at Me when I Talk to You](#) SAGE

This book describes important landmarks in the study of learning environments. First conceptualized as 'classroom climate', the field expanded considerably from its roots in science education. Promising areas for future research now include a range of diverse contexts and applications.

[Universal Design for Learning in the Classroom](#) Crown House Publishing Ltd

Synthesizes the knowledge base on student motivation, classroom teaching, teacher expectations, and adapting instruction for individual learners. This text addresses the core topics of classroom instruction, and provides information about how to use quantitative and qualitative observational techniques for describing and improving instruction.

What to Look for in a Classroom John Wiley & Sons

Lecturers, why waste time waiting for the post to arrive? Request and receive your e-inspection copy today! In this Third Edition of his bestselling book, Bill Rogers looks at the issues facing teachers working in today's classrooms. Describing real situations and dilemmas, he offers advice on dealing with the challenges of the job, and how building up a rapport with both students and colleagues can support good practice. New to this edition are sections on: - dealing with bullying; - teaching students on the autistic spectrum in a mainstream classroom; - working with very challenging students. New features included in the text are: - a wider range of case studies, covering students aged 4 to 18; - questions for discussion; - a Glossary of key terms. Bill Rogers understands the demanding nature of the job, and offers wise words and inspirational encouragement to all those involved in educating our children and young people. Watch a video of Bill Rogers discuss the main challenges facing teachers in schools today; his new book 'Classroom Behaviour, Third Edition' and what advice he would give to aspiring teachers.

[Outlines and Highlights for Looking in Classrooms by Thomas L Good](#), *Isbn* Scholastic Professional

This book discusses key aspects of life in schools and classrooms, and surveys the changes that have occurred over the years in educational research, policy making and practice in these school and classroom settings. It not only examines cutting-edge research in these areas, but also showcases good practices in the field. Among the topics reviewed are recent developments in assessment, methods for collecting and analysing data on classroom practice, school leadership and the pros and cons of class size and small-class teaching; topics which are currently hotly debated in education systems around the globe. As such, the book objectively examines the various debates, and surveys

the full range of evidence available. Education researchers, policy makers and practitioners often hold differing views about the reasons for teacher and student behaviour in classrooms and, for example, its relevance to class size. Many of these views are based on 'gut feelings' rather than hard evidence. Unfortunately, these three groups, with differing perspectives, often 'talk past each other' rather than engage in a productive, mutually beneficial dialogue. The book builds an effective bridge between researchers, policy makers and practitioners regarding the impact of these various aspects of classroom life, so that the viewpoints of each can be carefully considered and evaluated.

Education has become a political, economic and social priority for Australia, with the success of schools (and teachers) being an integral part of the economic and social future of the country. As a result, quality assurance for learning and teaching has become increasingly debated among policy-makers and the broader public, with a call for more evidence, data and standards to ensure that schools and teachers are held accountable for students' learning outcomes. In response, this book provides a snapshot of the types of evidence and data relating to learning outcomes that are being collected in our classrooms within Australia. The chapters in this book seek to interrogate current views of learning and teaching, beyond what is measured in external assessments that only capture a limited view of student learning outcomes. The chapters explore a range of fundamental topics within education, including positive learning environments, student voice and assessment. They explore and articulate the vital knowledge and skills needed for current and future teachers. In addition, these chapters make clear links between teaching, learning and the theories that frame, shape and inform these learning and teaching processes. The research presented in this book provides practical and theoretical insights into learning and teaching in early years, primary, secondary and tertiary education.

[Looking in Classrooms](#) Academic Internet Pub Incorporated

This classic book provides a balanced, research-based overview of the most effective teaching methods and guides teachers to select appropriate methods by intelligent observation in their classrooms. Widely considered to be the most comprehensive and authoritative source available on effective teaching, Looking in

Classrooms synthesizes the knowledge base on student motivation, classroom teaching, teacher expectations, and adapting instruction for individual learners. This book represents state-of-the-art research reviews in several areas including student motivation, classroom instruction and student learning, classroom management, and adapting instruction to the needs of individual students. K-12 educators, administrators, and superintendents.

[Equity in the Classroom](#) Routledge

Communicating involves much more than memorizing vocabulary and learning grammar rules. As more and more students whose first language is not English are welcomed into our classrooms, teachers are finding that communicating effectively with this diverse population requires a sensitivity to cultural issues that affect the way people interact with one another. In this revised, expanded and updated edition of *Look at Me When I Talk to You*, Sylvia Helmer and Catherine Eddy explore the underlying fundamentals of communication to show how culture influences the messages sent - and received. Elements of both the theory

and practice of communicating in a multicultural setting are discussed, and examples from real classrooms illustrate the issues that can, and do, arise. Practical suggestions for helping students learn to cope in their new culture make this book a must-read for all teachers working with students who are learning English as an additional language.

[Children's experiences of classrooms](#) SAGE

"Ruth Charney gives teachers help on things that really matter. She wants children to learn how to care for themselves, their fellow students, their environment, and their work. Her book is loaded with practical wisdom. Using Charney's positive approach to classroom management will make the whole school day go better." - Nel Noddings, Professor Emeritus, Stanford University, and author of *Caring* This definitive work about classroom management will show teachers how to turn their vision of respectful, friendly, academically rigorous classrooms into reality. The new edition includes: More information on teaching middle-school students Additional strategies for helping children with challenging behavior Updated stories and examples from real

classrooms. "Teaching Children to Care offers educators a practical guide to one of the most effective social and emotional learning programs I know of. The Responsive Classroom approach creates an ideal environment for learning—a pioneering program every teacher should know about." - Daniel Goleman, Author of *Emotional Intelligence* "I spent one whole summer reading *Teaching Children to Care*. It was like a rebirth for me. This book helped direct my professional development. After reading it, I had a path to follow. I now look forward to rereading this book each August to refresh and reinforce my ability to effectively manage a social curriculum in my classroom." - Gail Zimmerman, second-grade teacher, Jackson Mann Elementary School, Boston, MA [Life in Classrooms](#) Addison Wesley Publishing Company Never HIGHLIGHT a Book Again!
