Posters* McGraw Hill

Made available to the  
public for the first time,  
these posters from the  
archives of the German  
Historical Museum  
reveal a regime  
determined to  
influence and control  
the citizens of East

Germany. In the age of the internet, poster art is fading into history, but its importance as historical document remains valuable and enlightening. An inexpensive and efficient means of mass communication, the poster was used extensively by Communist regimes in order to maintain state control. This collection of 150 of the most outstanding works from a selection of more than 10,000 posters archived by the German Historical Museum features works that are both poignant and valid in light of current global politics. Although propaganda posters were used in a variety of communist countries, those that emanated from East Germany are unique in

their subtlety and nuanced messages. Many posters appropriate American or Western European symbols and others used humor to get their point across. Grouped chronologically according to such themes as post-war years, the prospect of peace, denouncement of the West, and praise for Communist allies, these beautifully reproduced works provide a historical and cultural snapshot of East Germany during its entire history. This detailed book is a “how-to” guide to building controlled vocabulary tools, cataloging and

indexing cultural materials with terms and names from controlled vocabularies, and using vocabularies in search engines and databases to enhance discovery and retrieval online. Also covered are the following: What are controlled vocabularies and why are they useful? Which vocabularies exist for cataloging art and cultural objects? How should they be integrated in a cataloging system? How should they be used for indexing and for retrieval? How should an institution construct a local authority file? The links in a controlled vocabulary ensure that relationships are defined and maintained for both cataloging and

retrieval, clarifying whether a rose window and a Catherine wheel are the same thing, or how pot-metal glass is related to the more general term stained glass. The book provides organizations and individuals with a practical tool for creating and implementing vocabularies as reference tools, sources of documentation, and powerful enhancements for online searching.

Speeches spanning more than two decades trace the fight of the revolutionary vanguard to deepen the proletarian course of the Cuban revolution. Rotovision Translation and

Multimodality: Beyond Words is one of the first books to explore how translation needs to be redefined and reconfigured in contexts where multiple modes of communication, such as writing, images, gesture, and music, occur simultaneously. Bringing together world-leading experts in translation theory and multimodality, each chapter explores important interconnections among these related, yet distinct, disciplines. As communication becomes ever more multimodal, the need to consider translation in multimodal contexts is increasingly vital. The various forms of meaning-making that have become prominent in the twenty-first century are

already destabilising certain time-honoured translation-theoretic paradigms, causing old definitions and assumptions to appear inadequate. This ground-breaking volume explores these important issues in relation to multimodal translation with examples from literature, dance, music, TV, film, and the visual arts.

Encouraging a greater convergence between these two significant disciplines, this text is essential for advanced students and researchers in Translation Studies, Linguistics, and Communication Studies.

Brightly coloured prints, portraying model behaviour or a better future, have been a ubiquitous element of Chinese political culture from Imperial times until present. As economic reform swept the People's Republic in the 1980s, visual propaganda ceased to depict the tanned and muscular labourers in a proletarian utopia, so typical of preceding decades. Instead, Western icons of

progress and development were employed: high-speed bullet trains, spacecraft, high-rise buildings, gridlocked free-ways and projections of general affluence. Socialist Realism was phased out by design and mixed-media techniques that were influenced by Western advertising. This lavishly illustrated study traces the development of the style and content of the Chinese propaganda poster in the decade of reform, from its traditional origins to its use as a tool for political and economic purposes. *Nationality & the War, Part 523* Grafica e Arte Think you know Ancient Egypt? Social Mobility in Medieval Italy (1100-1500) Silvana Editoriale

The Risorgimento was a turbulent and decisive period in the history of Italy. Lucy Riall's engaging account is the first book of its kind on the upheavals of the years between 1815 and 1860, when a series of crises destabilised the states of Restoration Italy and led to the creation of a troubled nation state in 1860. Comprehensive, yet original, this textbook:  
\* Examines the social

history of nineteenth century Italy and the social context of political action \* Offers a critical overview of the historiography of the topic \* Takes account of the most recent literature, especially literature in Italian not normally accessible to students \* Adopts a broad thematic approach \* Places the Italian experience in a European context

This autobiographical narrative provides an alternative perspective of World War I, recounting the experiences of a Roman schoolboy who volunteered to fight against the Allies after

Italy surrendered in 1943. But he is not sent to the front. Instead, with professional soldiers from the Russian front and fanatical fascists, he fights in the civil war that raged in Mussolini's puppet state. He is captured in Milan after the German surrender and is spared execution by his captors, boys of his own age.

The goal of each poster was to show the Chinese people what sort of behavior was considered morally correct and how great the future of

Communist China would be if everyone followed the same path toward utopia by uniting together. Combining fact and fiction in a way typical of propaganda art, these posters exuded positive vibes and seemed to suggest that Mao was an omnipresent force that would accompany China to happiness and greatness. This book brings together a selection of colorful propaganda artworks and cultural artifacts from photographer Michael Wolf's vast collection of Chinese propaganda posters, many of which are now extremely rare.

Poster Art continues the exploration of

innovative graphic design established in CD-Art, DVD-Art and Mag-Art. Showcasing an international collection of intelligent, witty and visually inspiring work, it celebrates the groundbreaking art direction, typography, illustration and printing to be found in poster design today. This classic form of graphic design plays an enormously cultural role within society. Whatever their purpose or subject, posters catch the eye, communicate and sell. As highly visible pieces of popular art and much loved examples of design, posters capture the zeitgeist of their times. This book is a must have for professional reference and an enthusiasts' collector's item.

This volume draws on two pieces of evidence which offer insights into life in Byzantium: the illuminated manuscript Skylitzes Matritensis and the great Christian monument turned mosque, Hagia Sophia. The main part of the discussion focuses on Skylitzes Natritensis which is a dramatic

portrayal of the historical events of the period from Michael I Rangabe (811-813) to the accession of Isaac Comnenos (1057-1059), described as a 'videotape in action style'. The manuscript depicts a great many themes, including coronations, marriages, ceremonial life, disasters, persecutions, war, violence and so on, with accompanying legends. The rather shorter discussion of the Hagia Sophia looks at the transformation of the Christian monument into an Ottoman mosque at its role as a 'prototype and antitype' of the mosque, its influence on Ottoman mosque architecture of Istanbul and Edirne, and at iconoclasm. Literary references to Hagia

Sophia are also discussed, with extracts.

'All the books published by a certain publisher could be seen as links in a single chain' In this fascinating memoir and manifesto the author and publisher Roberto Calasso meditates on the art of book publishing. With his

signature erudition and polemical flair, Calasso transcends Adelphi to look at the publishing industry as a whole, from the essential importance of graphics, jackets and cover flaps to the consequences of universal digitization. And he outlines what he describes as the 'most hazardous and ambitious' profile of what a publishing house can be: a book comprising many books, akin to that of other twentieth-century publishers, from Giulio Einaudi to Roger Straus, of whom the book offers brief portraits.

Theodore Kaczynski saw violent collapse as the only way to bring down the techno-industrial system, and in more than a decade of mail bomb terror he killed three people and injured 23 others. One does not need to support the actions that landed Kaczynski in supermax prison to see the value of his essays disabusing the

notion of heroic technology while revealing the manner in which it is destroying the planet. For the first time, readers will have an uncensored personal account of his anti-technology philosophy, including a corrected version of the notorious "Unabomber Manifesto," Kaczynski, a critique of anarcho-primitivism, and essays regarding "the Coming Revolution."

POSTER The goal of each poster was to show the Chinese people what sort of behavior was considered morally correct and how great the future of Communist China would be if everyone followed the same path toward utopia by uniting together. Combining fact and fiction in a way typical of propaganda art, these posters exuded positive vibes and seemed to suggest that Mao was an omnipresent force that would accompany China to happiness and greatness. This book brings together a selection of colorful propaganda artworks and cultural artifacts from photographer Michael Wolf's vast collection of Chinese

propaganda posters, many of which are now extremely rare. Chinese Propaganda Posters Chinese Propaganda Posters: From Revolution to Modernization The Materials Handbook is an encyclopedic, A-to-Z organization of all types of materials, featuring their key performance properties, principal characteristics and applications in product design. Materials include ferrous and nonferrous metals, plastics, elastomers, ceramics, woods, composites, chemicals, minerals, textiles, fuels, foodstuffs and natural plant and animal substances -- more than 13,000 in all. Properties are expressed in both U.S. customary and metric

units and a thorough index eases finding details on each and every material. Introduced in 1929 and often known simply as "Brady's," this comprehensive, one-volume, 1244 page encyclopedia of materials is intended for executives, managers, supervisors, engineers, and technicians, in engineering, manufacturing, marketing, purchasing and sales as well as educators and students. Of the dozens of families of materials updated in the 15th Edition, the most extensive additions pertain to adhesives, activated carbon, aluminides, aluminum alloys, catalysts, ceramics, composites, fullerenes, heat-

transfer fluids, nanophase materials, nickel alloys, olefins, silicon nitride, stainless steels, thermoplastic elastomers, titanium alloys, tungsten alloys, valve alloys and welding and hard-facing alloys. Also widely updated are acrylics, brazing alloys, chelants, biodegradable plastics, molybdenum alloys,

plastic alloys, recycle plastics, superalloys, supercritical fluids and tool steels. New classes of materials added include aliphatic polyketones, carburizing secondary-hardening steels and polyarylene ether benzimidazoles. Carcinogens and materials likely to be cancer-causing in humans are listed for the first time.
