This collection brings together scholars from a wide range of disciplines to offer perspectives on national identity formation in various European contexts between 1600 and 1815. Contributors challenge the dichotomy between modernists and traditionalists in nationalism studies through an emphasis on continuity rather than ruptures in the shaping of European nations in the period, while also offering an overview of current debates in the field and case studies on a number of topics, including literature, historiography, and cartography.

Read the spicy romance that became a TikTok and Netflix sensation Raquel Álvarez has one goal - to become a psychologist. Well, that and to get Ares Hildago to notice her. For as long as Raquel can remember, she has been obsessed with Ares - her rich, hot, mysterious neighbour. Even though he lives next door, Raquel has never spoken to him - until a chance encounter reveals her crush is anything but unrequited, and their steamy attraction grows into something much more. Raquel is all in with Ares. But Ares can't, or won't, commit, as his struggle with personal and family responsibilities leaves little room for falling in love. What burns bright burns fast, but for Ares and Raquel, can it last?

Ever since the birth of his daughter, Nalla, Zsadist has been regressing further and further into the life he led before he met Bella, his beautiful shellan. He has been waking up in cold sweats

due to nightmares from his past, hasn't made love to his wife, and won't hold his baby girl, for fear that he might hurt her. While Nalla's presence had consisted of only joy and excitement in first couple months of her life, now it seems to be driving the couple apart. Bella is afraid that she and Nalla just may need to leave her hellren. But then Zsadist gets injured on a mission to fight the lessers and because he hasn't been feeding from Bella, almost loses his life. Could this near-death experience create the motivation to pull this couple back together? Or has the gap between them spanned too far for redemption?

Today, the reality we know can be recorded and reproduced true to reality using technical processes. Space and time are recreated virtually as a copy in artificial reality. However, the reproduction of virtual reality is not limited to a mere copy of what exists. A visitor to the virtual space does not have to be content with the pixelated image of the old familiar, but can encounter unreal phenomena in the illusory world that never existed in real life or are even physically impossible. This enables an expansion of the recorded reality and allows the perception of surprisingly new perspectives. A perspective denotes the perception of a fact from a certain point of view and corresponds to the way of looking at things. But a perspective is also the observation of a scene from a viewing position. From different perspectives the illusion of reality arises during the reproduction by observation. This vision is not based on imagination or hallucination, but is the basic function of virtual reality. This book describes the concepts, systems, and technologies used to create virtual reality from its ancient beginnings to the present, and provides a glimpse into a possible future. This book is a translation of the original German 1st edition *Grundlagen der virtuellen Realität* by Armin Grasnack, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and

on the related technologies to support the authors.

When working in the highly technical fields of astronomy and the related space sciences, the practitioner is constantly confronted with a baffling array of different abbreviations, acronyms, contractions, and symbols. The identification and differentiation of these terms is a task which, all too often, can prove to be a near impossible one. With over 140,000 separate dictionary-style entries, and over 20 years in collation, *StarBriefs 2001* represents the most comprehensive and accurately validated collection of abbreviations, acronyms, contractions, and symbols within astronomy, related space sciences and other related fields. As such, this invaluable reference source (and its companion volume, *StarGuides 2001* should be on the reference shelf of every library, organisation or individual with any interest in these areas. Besides astronomy and space sciences, related fields such as aeronautics, aeronomy, astronautics, atmospheric sciences, chemistry, communications, computer sciences, data processing, education, electronics, engineering, energetics, environmental, geodesy, geophysics, information handling, management, mathematics, meteorology, optics, physics, remote sensing, and so on, are also covered when justified. In addition, there are

separate sections devoted to Greek letters, mathematical symbols, special signs and characters, as well as to entries with a numerical prefix. Finally, terms in common use and/or of general interest have also been included where appropriate.

In this volume distinguished scholars from different social science disciplines assess the emerging international order. The volume is divided into three main sections. In the first, theories and strategies of order - realism, liberalism, institutionalism and post-positivism - are presented. In the second, the prospects of the major likely contenders for world leadership are analysed. The strategic possibilities for the USA, Russia, China, the European Union, Japan and India are examined in detail. Part III discusses some of the chief challenges to world order, with contributors examining the problems posed by globalization, nationalism, ethnic and religious conflict, environmental degradation, and the spread of weapons of mass destruction. This book offers a comprehensive and interdisciplinary account of the prospects for a peaceful and just international order into the next century.

The Story of Son Penguin

My college roommate is the worst. Cecile steals my food, brings guys over at all hours, and parties instead of studying. But those quirks pale in comparison to what she does next. She drugs me, and I wake up imprisoned in an alternate universe full of terrifying creatures. Now, the biggest and scariest creature of all-a fae king-believes I'm his mate. He's freed me from the dungeon but keeps me close. So close, in fact, that I'm beginning to like his wintery gaze and ice-chiseled body. But secrets and villains lurk throughout this new world, and I don't know if I'll survive long enough to figure out how to get back home. Lily's Note: This beautiful hardback edition includes the first four books in the Fae's Captive Series: Fae's Captive, Road to Winter, Bite of Winter, and Beyond the Mountain, which completes Taylor and Leander's story.
