*Map and Globe Study Skills Grades 3-5  
 Classroom Complete Press*

Provides lessons and activities to help students with their map reading skills.

[Map and Globe Reading Skills - Fourth Grade](#) Classroom Complete Press

\*\*This is the chapter slice "Map the World" from the full lesson plan "Mapping Skills with Google Earth"\*\*. Move on from a basic understanding of map reading to a more complex one with our engaging resource designed for students in grades six to eight. Students will further develop their ability to read and understand maps by looking at weather and population maps. Then, students will engage in mapping their country in detail, including states,

provinces, capitals, cultural and geographical features. Finally, students will move on to mapping their continent and then the world. Comprised of reading passages, map activities, crossword, word search and comprehension quiz, our resource incorporates curriculum-based lessons with Google Earth™ so students can further understand the complexities of map reading with the help of visual and interactive technology. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy. *Map Skills Grade 3* Classroom Complete Press  
 Give your primary students the building blocks needed to be successful map readers. Our resource provides the basics of map reading to ensure a solid foundation is laid for further study. Create a treasure map using all the elements

learned so far, such as cardinal directions, symbols and legend. Make a map of your classroom with a title, compass rose, legend, date, and author. Draw a route to school using North, East, South or West of certain landmarks. Explore grid lines with Google Earth™ and your town. See if you can find your street and school. Find your continent in Google Earth™. Then, locate the countries and lakes within, and the oceans that surround it. Write down the coordinates of the seven continents and four oceans of the world. Aligned to your State Standards and written to Bloom's Taxonomy, additional map activities, crossword, word search, comprehension quiz and answer key are also included. **Development and Utilization of Second Grade Map and Globe Skills as Taught by the Unit Method** Good Year Books

Grade level: 1, 2, 3, 4, 5, 6, k, p, e, i, t.

### **Developing Map and Globe Skills**

Walch Publishing

Build Fundamental geography skills with this introductory workbook, containing lower-level elementary maps, illustrations, and activities. Understanding Geography is a grade-specific map, graph and geography skills program that helps students learn about and better understand the world they live in.

Understanding Geography is designed to be used as a stand-alone curriculum or to support existing social studies curricula. In Level 3, children compare maps, globes and satellite images as well as understand direction, scales, landforms and natural resources. Two other books are in the series: Level 4 and 5.

Mapping Skills with Google Earth: Map Elements Fearon Teacher AIDS

Both teachers and parents appreciate how effectively this series helps students master skills in mathematics, penmanship, reading, writing, and grammar. Each book provides activities that are great for independent work in class, homework assignments, or extra practice to get ahead. Text practice pages are included! A Framework for Developing Map Skills in Primary Grades Social Studies Rowman & Littlefield

Basic Mapping Skills is written specifically to support the teaching and learning skills and helps provide an excellent foundation for the Bahamas Junior Certificate examination in the area of Social Studies. Topics in this volume include: • Maps and Globes • Parts of a Map • Types of Maps • Comparing Maps • Map Symbols • Directions • Sixteen Point Compass and Bearings • Map Scales • Locating Places on a Map or Globe • Understanding Latitude and Longitude • Understanding Grids • Landforms and Water Features • The World Map • The Bahamas • The Earth and Sun Relationship • Earth Movements • Weather and Climate • Hurricanes • World's Major Climatic Zones And a Sample Unit Test This book can be used for grades 7, 8 and 9.

Mapping Skills with Google Earth Gr. PK-2 Teacher Created Resources

Introduce the salient concepts to beginners that reinforce skills in working with maps and globes. Designed for students with differentiated learning levels; including children who have had no experience in formal map & globe skills often experience difficulties when faced with geography as a subject at an intermediate level. The material in this package may be of benefit to children in junior and early intermediate grades as well. The activities are designed with participation in mind encouraging a variety of group sizes (whole class, small group, individual). The activities are sequentially arranged to cover the following topics: symbols, direction, kinds and uses of maps, scale and terminology. The activities are suggestions and may be modified or expanded where needed. Get creative and have fun teaching your students about maps & globes!

**Map Reading Skills, Grades 5 - 8** Child Care Info Exchange

Map Skills takes a grade-by-grade approach to teaching students how to interpret and learn from maps and globes, a fundamental content theme found in

nearly every state's academic standards.

Sixth-grade Map and Globe Skills

Curriculum Mark Twain Media

Children get involved in fun-to-do activities while learning the important map-reading skills they need to succeed in a global society. Many activities combine music, art, drama, and poetry with important geography skills.

Mapping Skills with Google Earth: Map the World Rand McNally

"... designed to help students master the essentials of map reading and interpretation." -- p. vii.

Understanding Geography Level 3

CreateSpace

The primary purpose of his handbook is to provide educators with a variety of proven activities to make learning map and globe skills both enjoyable and meaningful for your students. The activities, which include cross-curriculum, can be used with multiple grade levels, small groups, or individually. Having Fun with Maps and globes is organized into six parts. Part One introduces you to the basic goals of a Map and Globe Skills Program and concludes with some general "Tips for Teachers."

Part Two provides activities for teaching the basic concepts of maps and globes. Because the ability to read and make maps involves many individual skills, the activities in this section are organized into several categories or subsets of skills. For each subset, several fully developed activities are presented, along with a "grab-bag" of additional activities that can be used in a stand-alone map and globe unit or to reinforce general map skills.

Because map and globe skills support other curriculum areas besides social studies, Part Three provides activities organized by subject area. This allows you to locate the subject you are teaching and access several related map and globe skill activities. Such cross-curriculum tasks will reinforce art, math, reading, science, language, and thinking skills. For easy access, all student activity sheets (called Supplements in this manual) are located in Part Four of the handbook. Part Five lists currently available resources for teachers and students. Beyond the standard lists of print materials, the author has provided sources for multimedia kits and computer software that will enrich anyone's program. An appendix, which includes map masters, a glossary of terms, and comparison charts, concludes the handbook. Although these materials are mentioned in various activities throughout the book, here they are more accessible as a reference and as a source from which to draw in developing your own lessons, or an entire school program. Because of the

wide range of resources Having Fun with Maps and Globes provides, this handbook is a wonderful companion to the supplementary materials you presently use in your school curriculum.

*Map and Globe Skills, Grade 4*

Children need the chance to explore and understand where they live and all the places surrounding them to make sense of their world. Through geography, children can feel a connection with people they

have never met and places they have never been. Through these connections, children can be inspired to care about their place and their communities. This book includes chapters explaining the concepts of location, perspective, scale, orientation, map symbols and map keys, and the five themes of geography. In addition, chapters are included on various types of maps and the use of technology to teach map skills. There are suggestions

for 100 activities to teach the concepts, assessment questions, and annotated children's literature that relate to the concepts. The book includes a suggested scope and sequence for teaching map skills in the elementary grades and a glossary of geographic terms.
