Edgar-award nominated author David Rosenfelt's hilarious hero, Andy Carpenter, takes on a high-profile murder case, with his favorite golden retriever, Tara, by his side--now with a new cover look. Whether dueling with new forensics or the local old boys' network, irreverent defense attorney Andy Carpenter always leaves them awed with his biting wit and winning fourth-quarter game plan. But Andy prefers the company of his best friend, Tara, to the people he encounters in the courtroom. Tara, a golden retriever, is clearly smarter than half the lawyers who clog the courts of PassaicCounty. However, just as it seems Andy has everything figured out, his dad, New Jersey's legendary ex-D.A., drops dead in front of him at a game in Yankee Stadium. The shocks pile on as he discovers his dad left him with two unexpected legacies: a fortune of \$22 million that Andy never knew existed . . . and a murder case with enough racial tinder to burn down City Hall. Struggling to serve justice and bring honor to his father, Andy must dig up some explosive political skeletons--and an astonishing family secret that can close his case (and his mouth) for good.

Brilliant, brave, and willing to defy conventional wisdom, Andy Grove, the CEO of Intel during its years of explosive growth, is on the shortlist of America's most admired businesspeople. Grove gave Tedlow unprecedented access to his private papers, along with wide-ranging interviews and access to friends and key business associates. The result is not just a life story but a fascinating analysis of how Grove attacks problems. Born a Hungarian Jew in 1936, András István Gróf survived the Nazis only to face the Soviet invasion of his country. He fled to America at age twenty, studied engineering, and arrived in Silicon Valley just in time to become the third employee of Intel. As talented as he was as an engineer, Grove became an even better manager. Tedlow shows us exactly how the penniless immigrant taught himself to lead a major corporation through some of the toughest challenges in the history of business.--From publisher description.

Andy Kaufman defied explanation. Between 1978 and 1979, acclaimed novelist and New Yorker short story writer Julie Hecht attempted to arrange an interview with him, hoping to discover how he came to do what he did. The one-hour interview turned into innumerable surreal meetings and phone conversations with her subject; but she couldn't always tell when his act was on. Whether driving recklessly on icy roads or drawing the author unawares into his schemes and Dada-esque pranks on unsuspecting waiters and college students, Andy Kaufman never seemed to separate himself from his stage personality -- or personalities. Was This Man a Genius? is the culmination of a series of bizarre, frequently hilarious meetings. In describing them, Hecht, herself a master of wit and observation, illuminates the enigma of Andy Kaufman's work and life.

This title brings together work on embodiment, action, and the predictive mind. At the core is the vision of human minds as prediction machines - devices that constantly try to stay one step ahead of the breaking waves of sensory stimulation, by actively predicting the incoming flow. In every situation we encounter, that complex prediction machinery is already buzzing, proactively trying to anticipate the sensory barrage. The book shows in detail how this strange but potent strategy of self-anticipation ushers perception, understanding, and imagination simultaneously onto the cognitive stage.
