 "A screaming comes across the sky. . ." A few months after the Germans' secret V-2 rocket bombs begin falling on London, British Intelligence discovers that a map of the city pinpointing the sexual conquests of one Lieutenant Tyrone Slothrop, U.S. Army, corresponds identically to a map showing the V-2 impact sites. The implications of this discovery will launch Slothrop on an amazing journey across war-torn Europe, fleeing an international cabal of military-industrial superpowers, in search of the mysterious Rocket 00000, through a wildly comic extravaganza that has been hailed in *The New Republic* as "the most profound and accomplished

American novel since the end of World War II."

This volume makes available in English the seminal treatises in Korea's greatest interreligious debate of the fourteenth and fifteenth centuries. On Mind, Material Force, and Principle and An Array of Critiques of Buddhism by Confucian statesman Chŏng Tojŏn (1342-1398) and Exposition of Orthodoxy by Sŏn monk Kihwa (1376-1433) are presented here with extensive annotation. A substantial introduction provides a summary and analysis of the philosophical positions of both Neo-Confucianism and Buddhism as well as a germane history of the interactions between these two traditions in East Asia, offering insight into religious tensions that persist to this day. Translator A. Charles Muller shows how, from the time Confucianism and Buddhism met in

China, these thought systems existed, along with Daoism, in a competing relationship that featured significant mutual influence. A confrontative situation eventually developed in China, wherein Confucian leaders began to criticize Buddhism. During the late-Koryŏ and early-Chosŏn periods in Korea, the Neo-Confucian polemic became the driving force in the movement to oust Buddhism from its position as Korea's state religion. In his essays, Chŏng drew together the gamut of arguments that had been made against Buddhism throughout its long history in Korea. Kihwa's essay met Neo-Confucian contentions with an articulate Buddhist response. Thus, in a rare moment in the history of religions, a true philosophical debate ensued. This debate was made possible based upon the two religions' shared philosophical paradigm: essence-function (ch'e-yong). This

traditional East Asian way of interpreting society, events, phenomena, human beings, and the world understands all things to have both essence and function, two contrasting yet wholly contiguous and mutually containing components. All three East Asian traditions took this as their underlying philosophical paradigm, and it is through this paradigm that they evaluated and criticized each other's doctrines and practices. Specialists in philosophy, religion, and Korean studies will appreciate Muller's exploration of this pivotal moment in Korean intellectual history. Because it includes a broad overview of the interactive history of East Asian religions, this book can also serve as a general introduction to East Asian philosophical thought.

In *The Age of Waiting*, a personal memoir enriched by the history of Buddhism and a re-telling of foundational Buddhist tales, Douglas J. Penick confronts not only his own mortality, but also that of the planet. Penick's eloquent, impassioned investigation transports the reader to distant worlds, while at the same time linking our contemporary reality, with its medical, economic, and ecological emergencies, to an inner landscape which may prove more constant, durable, and transformative than we realize.

Now a major new Netflix film from Noah Baumbach, starring Adam Driver and Greta Gerwig How strange it is. We have these deep terrible lingering fears about ourselves and the people we love. Yet we walk around, talk to people, eat and drink. We manage to function. The feelings are deep and real. Shouldn't they paralyze us? Jack Gladney is the creator and chairman of Hitler studies at the College-on-the-Hill. This is the story of his absurd life; a life that is going well enough, until a chemical spill from a train carriage releases an 'Airborne Toxic Event' and Jack is forced to confront his biggest fear - his own mortality. *White Noise* is an effortless combination of social satire and metaphysical dilemma in which Don DeLillo exposes our rampant consumerism, media saturation and novelty intellectualism. It captures the particular strangeness of life lived when the fear of death cannot be denied, repressed or obscured and ponders the role of the family in a time when the very meaning of our existence is under threat. 'America's greatest living writer.' - Observer Part of the Picador Collection, a series showcasing the best of modern literature.

UPDATED FOR 2020 WITH A NEW PREFACE
BY NATE SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the "prediction paradox": The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an

essential read.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. INTERNATIONAL BOOKER PRIZE.* 'One of the greatest writers of our time' Chimamanda Ngozi Adichie *The Perfect Nine* is a glorious epic about the founding of Kenya's Gikuyu people and the ideals of beauty, courage and unity. Gikuyu and Mumbi settled on the peaceful and bounteous foot of Mount Kenya after fleeing war and hunger. When ninety-nine suitors arrive on their land, seeking to marry their famously beautiful daughters, called *The Perfect Nine*, the parents ask their daughters to choose for themselves, but to choose wisely. First the young women must embark on a treacherous quest with the suitors, to find a magical cure for their youngest sister, Warigia, who cannot walk. As they journey up the mountain, the number of suitors diminishes and the sisters put their sharp minds and bold hearts to the test, conquering fear, doubt, hunger and many menacing ogres, as they attempt to return home. But it is perhaps Warigia's unexpected adventure that will be most challenging of all. Blending folklore, mythology and allegory, Ngugi wa Thiong'o chronicles the adventures of Gikuyu and Mumbi, and how their brave daughters became the matriarchs of the Gikuyu clans, in stunning verse, with all the epic elements of danger, humour and suspense. This new collection gives a full picture of the richness and diversity of this most American of genres from its very beginnings to the present day. Lady Hyegyong's memoirs, which recount the chilling murder of her husband by his father, form one of the best known and most popular classics of Korean literature. From 1795 until 1805 Lady Hyegyong composed this masterpiece, depicting a court life Shakespearean in its pathos, drama, and grandeur. Presented in its social, cultural, and historical contexts, this first complete English translation opens a door into a world teeming with conflicting passions, political intrigue, and the daily preoccupations of a deeply intelligent and articulate woman. JaHyun Kim Haboush's accurate, fluid translation captures the intimate and expressive voice of this consummate storyteller. Reissued nearly twenty years after its initial publication with a new foreword by Dorothy Ko, *The Memoirs of Lady Hyegyong* is a unique exploration of Korean selfhood and an extraordinary example of autobiography in the premodern era.

These two works on life's fleeting pleasures are by Buddhist monks from medieval Japan, but each shows a different world-view. In the short memoir *Hôjôki*, Chômei recounts his decision to withdraw from worldly affairs and live as a hermit in a tiny hut in the mountains, contemplating the impermanence of human existence. Kenko, however, displays a fascination with more earthy matters in his collection of anecdotes, advice and observations. From ribald stories of drunken monks to aching nostalgia for the fading traditions of the Japanese court, *Essays in Idleness* is a constantly surprising work that ranges across the spectrum of human experience. Meredith McKinney's excellent new translation also includes notes and an introduction exploring the spiritual and historical background of the works. Chômei was born into a family of Shinto priests in around 1155, at a time when the stable world of the court was rapidly breaking up. He became an important though minor poet of his day, and at the age of fifty, withdrew from the world to become a tonsured monk. He died in around 1216. Kenkô was born around 1283 in Kyoto. He probably became a monk in his late twenties, and was also noted as a calligrapher. Today he is

remembered for his wise and witty aphorisms, 'Essays in Idleness'. Meredith McKinney, who has also translated Sei Shonagon's *The Pillow Book* for Penguin Classics, is a translator of both contemporary and classical Japanese literature. She lived in Japan for twenty years and is currently a visiting fellow at the Australian National University in Canberra. '[Essays in Idleness is] a most delightful book, and one that has served as a model of Japanese style and taste since the 17th century. These cameo-like vignettes reflect the importance of the little, fleeting futile things, and each essay is Kenko himself' Asian Student

 Monkey depicts the adventures of Prince Tripitaka, a young Buddhist priest on a dangerous pilgrimage to India to retrieve sacred scriptures accompanied by his three unruly disciples: the greedy pig creature Pipsy, the river monster Sandy – and Monkey. Hatched from a stone egg and given the secrets of heaven and earth, the irrepressible trickster Monkey can ride on the clouds, become invisible and transform into other shapes – skills that prove very useful when the four travellers come up against the dragons, bandits, demons and evil wizards that threaten to prevent them in their quest. Wu Ch'êng-ên wrote *Monkey* in the mid-sixteenth century, adding his own distinctive style to an ancient Chinese legend, and in so doing created a dazzling combination of nonsense with profundity, slapstick comedy with spiritual wisdom.
