ZACHARY JAXON

The Connecticut School Journal Edward Elgar Publishing

This volume examines contemporary diplomatic, economic, and security competition between China and Japan in the Asia-Pacific region. The book outlines the role that Sino-Japanese competition plays in East Asian security, an area of study largely overlooked in contemporary writing on Asian security, which tends to focus on US-China relations and/or US hegemony in Asia. The volume focuses on Chinese and Japanese foreign policy under President Xi Jinping and Prime Minister

Shinzō Abe, and regional security dynamics within and between Asian states/institutions since 2012. It employs regional security complex theory as a theoretical framework to view Chinese and Japanese competition in the Asian region. In doing so, the volume draws on a "levels of analysis" approach to demonstrate the value in looking at security in the Asia-Pacific from a regional rather than global perspective. The vast majority of existing research on the region's security tends to focus on great power relations and treats Asia as a sub-region within the larger global security architecture. In contrast, this volume shows how competition between the two largest Asian economies shapes East Asia's security environment and drives security priorities across Asia's

sub-regions. As such, this collection provides an important contribution to discussion on security in Asia; one with potential to influence both political and military policy makers, security practitioners, and scholars. This book will be of much interest to students of Asian politics, regional security, diplomacy, and international relations.

Engineering Education Springer Nature
 This book is among the first to comprehensively examine the far-reaching impact of China's new fertility policies on early education and development. Since the beginning of the 21st century, China has entered a period of declining fertility rate and aging population, which poses a serious threat to its sustainable development. To address this crisis, China

has radically revised its fertility policy through the state's guidance for regulating couples' reproductive choices, abandoning its iconic one-child policy, and adopting the selective two-child (2013), universal two-child (2016), and then the three-child (2021) policy. Drawing on empirical evidence obtained through various research methods, this book offers multidisciplinary perspectives on the far-reaching impact of these policies. Part I summarizes the lessons learned from new fertility policies and identifies important directions for future research. Focusing on two major microsystems, part II presents research assessing families' fertility desire for an additional child and projecting the demand for preschool education. Part III attends to family dynamics and their relation to early learning and development for both only and non-only children. Part IV addresses the importance of expanding access to affordable and high-quality early childhood education and care for children from birth through age 6. *The Impact of New Fertility Policies on Early Education and Development in China* contributes to policy development and practical improvement and serves as a catalyst to stimulate future studies on the topic. It will be a valuable resource for researchers, policymakers, and practitioners of early childhood education and care, as well as for families of young children. The chapters in this book were originally published as a special issue of *Early Education and Development*.

Mediated Learning and Cognitive Modifiability Taylor & Francis

This book portrays an extensive and intensive discussion of theories and research that refer to Vygotsky's and Feuerstein's theories of mediated learning and their effects on learning potential and cognitive modifiability. Most topics are discussed in relation to a broad spectrum of developmental and cognitive research that are under the conceptual umbrella of mediated learning and cognitive modifiability. Some topics such as neural plasticity, executive functions, mental rotation, and cognitive education are related to mediated learning, though indirectly, and therefore are included in this book. In many ways the book presents an extension of Vygotsky and Feuerstein's theories and empirical validation in a variety of family, social and cultural contexts. The book includes a thorough analysis and summary of 50 years of research and methodology of the intimate relation between mediated learning interactions and cognitive modifiability and of dynamic assessment underlying measurement of cognitive modifiability.

Special emphasis is given to Tzuriel's dynamic assessment instruments developed during more than four decades. Tzuriel's novel instruments are interwoven in the extensive research on parent-child interactions, siblings', teachers' and peers' mediation and in validation of dynamic assessment approach and cognitive education programs aimed at development of thinking skills and academic achievements.

A Century of Education Routledge
Communication Centers and Oral Communication Programs in Higher Education, edited by Eunhyong L. Yook and Wendy Atkins-Sayre reveals vital information that is of theoretical and practical importance to higher education administrators, educators, and communication centers directors and staff. It is the first book to be published on communication centers.

Electric Worlds in the Classroom Springer Nature

In the last decade, the development of new technologies has made innovation a fundamental pillar of education. Teaching innovation includes the evolution of both teaching and learning models to drive improvements in educational methodologies. Teaching innovation is a pioneer in the understanding and comprehension of the different teaching methodologies and models developed in the academic area. Teaching innovation is a process that seeks validation in the academic and teaching communities at universities in order to promote the improvement and its practices and uses in the future characterized by digital development and data-based methods. *Teaching Innovation in University Education: Case Studies and Main Practices* features the major practices and case studies of teaching innovation developed in recent years at universities. It is a source on study cases focused on teaching innovation methodologies as well as on the identification of new technologies that will help the development of initiatives and practices focused on teaching innovation at higher education institutions. Covering topics such as didactic strategies, service learning, and technology-based gamification, this premier reference source is an indispensable resource for pre-service teachers, lecturers, students, faculty, administrators, libraries, entrepreneurs, researchers, and academicians.

Qualitative Educational Research in Developing Countries Routledge

This book constitutes the refereed proceedings of the 17th International

Conference on Artificial Intelligence in Education, AIED 2015, held in Madrid, Spain, in June 2015. The 50 revised full papers presented together with 3 keynotes, 79 poster presentations, 13 doctoral consortium papers, 16 workshop abstracts, and 8 interactive event papers were carefully reviewed and selected from numerous submissions. The conference provides opportunities for the cross-fertilization of approaches, techniques and ideas from the many fields that comprise AIED, including computer science, cognitive and learning sciences, education, game design, psychology, sociology, linguistics, as well as many domain-specific areas.

Earned Degrees Conferred by Higher Educational Institutions Lexington Books

Education is a country's biggest business and the most important shared experience of those who live in it. *A Century of Education* provides an accessible, authoritative and fascinating overview of the role and nature of education in the twentieth century. Eminent historian of education, Professor Richard Aldrich has assembled a team of contributors, all noted experts in their respective fields, to review the successes and failures of education in the last century and to look forward to the next. A succinct overview of twentieth century social, economic, political and intellectual developments in the first chapter is followed by chapters on ten key topics. Each chapter has four sections: a review of the educational situation in 2000; a similar assessment in 1900; changes and continuities throughout the century; and a conclusion reviewing the lessons for today and tomorrow. This is a work of information, interpretation and reference, which demonstrates the strengths and weaknesses of education during the twentieth century and identifies educational priorities for the twenty first. For anyone interested in what has become the most important Issue of our time, this unique book is set to become a classic text.

The Common School Manual Springer

In the 1990s education has become one of the major social and political questions of the day. This book has been written to provide an authoritative guide to the issues which underlie the formulation of educational policy. It stands both as a substantial historical study in its own right and as an essential background and introduction to the current educational debate.

Iliff's Imperial Atlas of the World: Geographical, Historical, Political, Astronomical, Statistical, Educational,

Agricultural, Commercial and Descriptive
Рипол Классик

First published in 1974, *Advisory Councils and Committees in Education* is an analytical account of the role of advisory councils and committees in creating and promulgating educational policies. The book reviews systematically the content of twenty-eight reports starting with the Hadow Report of 1926, in terms of developments in educational philosophy, government and administration, social policy and the economics of education. It also analyses the membership and working of the committees. The study is based on historical and organizational analysis. It is concerned not only with what the councils did but takes up the wider questions of the place of such councils and committees in educational government and their relevance for changing assumptions about other ways in which government is advised. This book will be of interest to students of education, pedagogy and public policy.

Journal of Education and School World
Routledge

This book constitutes the thoroughly refereed post-conference proceedings of the First International Workshop on Higher Education Learning Methodologies and Technologies Online, HELMeTO 2019, held in Novedrate, Italy, in June 2019. The 15 revised full papers and 2 short papers presented were carefully reviewed and selected from a total of 39 submissions. The papers are organized in topical sections on online pedagogy and learning methodologies; learning technologies, data analytics and educational big data mining as well as their applications; the challenge of online sport and exercise sciences university programs.

The Impact of New Fertility Policies on Early Education and Development in China
Taylor & Francis

Mathematics plays an important part in every person's life, so why isn't everyone good at it? The *Routledge International Handbook of Dyscalculia and Mathematical Learning Difficulties* brings together commissioned pieces by a range of hand-picked influential, international authors from a variety of disciplines, all of whom share a high public profile. More than fifty experts write about mathematics learning difficulties and disabilities from a range of perspectives and answer questions such as: What are mathematics learning difficulties and disabilities? What are the key skills and concepts for learning mathematics? How will IT help, now and in the future? What is the role of language and vocabulary? How should we teach mathematics? By posing notoriously

difficult questions such as these and studying the answers *The Routledge International Handbook of Dyscalculia and Mathematical Learning Difficulties* is the authoritative volume and is essential reading for academics in the field of mathematics. It is an incredibly important contribution to the study of dyscalculia and mathematical difficulties in children and young adults.

Communication Centers and Oral Communication Programs in Higher Education
Routledge

Education institutions and organizations throughout the world are currently being held accountable for achieving and maintaining historically unmatched standards of academic quality and performance. Accreditation bodies; policy makers; boards of trustees; and teacher, parent, and student groups all place educational institutions and organizations under unprecedented accountability pressures. The aim of this volume is to explore and better understand how these pressures are impacting a broad range of social and cultural issues and, subsequently, how these issues impact student motivation and learning.

Advisory

Councils and Committees in Education
This book examines when, where, how, and why artificial intelligence and digital transformation can boost innovation and transform the economy, society and democracy. It is developed based on the Cyber-D4 nexus, which is a conceptual framework of Cyber-Defense, Cyber-Development, Cyber-Democracy, and Cyber-Diplomacy. This nexus ties new national and industrial cyber strategies, including business strategies for smart cities and the Internet of Things, with the local, national, regional, and global security and economic objectives.

Protecting and Restoring America's Great Waters: The Long Island Sound
Taylor & Francis

First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

Buddhism for children 7 to 11 years old, bi-lingual English-Vietnamese
Taylor & Francis

In the current era where lifelong learning is brought to the fore, higher education can no longer be regarded as an isolated trajectory within one's educational career as many students face substantial challenges in crafting their professional future. More specifically, the transition from school to higher education and continuing to the labour market are often a difficult hurdles for many students.

Almost half of students do not succeed in the first year and often withdraw from education, students are faced with a variety of contexts and may choose to study in a different (international) context, and they are then confronted with structural barriers in finding a (high-quality) job, as evidenced by increasing levels of youth unemployment and underemployment. *Higher Education Transitions* aims to deepen our understanding of the transitions taking place when students enter, progress and leave higher education to enter the labour market. Drawing on an international team of contributors, this guide includes three conceptual and fifteen empirical studies which include a range of quantitative, qualitative, cross-sectional and longitudinal studies. Divided into three sections to reflect each important transition phase, topics include: transitions from secondary to higher education; transitions within higher education; transitions from higher education to the labour market. By considering transitions across different phases as a broad and interrelated process, this guide will be essential reading for higher education researchers, policy stakeholders and all those interested in the transitions into higher education and the labour market. *Education and Policy in England in the Twentieth Century*

This concise guide offers an accessible introduction to cognitive development in childhood and adolescence. It integrates insights from typical and atypical development to reveal fundamental aspects of human growth and development, and common developmental disorders. The topic books in this series draw on international research in the field and are informed by biological, social and cultural perspectives, offering explanations of developmental phenomena with a focus on how children and adolescents at different ages actually think, feel and act. In this volume, Stephen von Tetzchner explains key topics including: theories of cognitive development; attention, memory and executive function; conceptual development and reasoning, theory of mind; intelligence; and learning and instruction. Together with a companion website that offers topic-based quizzes, lecturer PowerPoint slides and sample essay questions, *Typical and Atypical Child and Adolescent Development 4: Cognition,*

Intelligence and Learning is an essential text for all students of developmental psychology, as well as those working in the fields of child development, developmental disabilities and special education. The content of this topic book is taken from Stephen von Tetzchner's core textbook *Child and Adolescent Psychology: Typical and Atypical*

Development. The comprehensive volume offers a complete overview of child and adolescent development - for more information visit
