*Architecture Matters* Koenig Books  
 A complete catalogue of the work of the renowned Japanese architect.  
*Hot to Cold* Frances Lincoln Children's Books  
 An inspiring picture book biography about British Iraqi architect Zaha Hadid, who was a pioneer in her field against all odds, told by debut author-illustrator Victoria Tentler-Krylov. The city of Baghdad was full of thinkers, artists, and scientists, the littlest among them Zaha Hadid. Zaha knew from a young age that she wanted to be an architect. She set goals for herself and followed them against all odds. A woman in a man's world, and a person of color in a white field, Zaha was met with resistance

at every turn. When critics called her a diva and claimed her ideas were unbuildable, she didn't let their judgments stop her from setting goals and achieving them one by one, finding innovative ways to build projects that became famous the world over. She persisted, she followed her dreams, and she succeeded.

*A Place for All People* Princeton University Press

Part of the critically acclaimed Little People, BIG DREAMS series, Zaha Hadid tells the inspiring true story of the visionary Iraqi-British architect. Zaha Hadid grew up in Baghdad, Iraq, surrounded by music. She was a curious and confident child, who designed her own modernist bedroom at nine years old. As a young woman studying at University in Beirut, she was described as the most outstanding pupil the teacher had ever met. With her spectacular vision and belief

in the power of architecture, she founded her own firm and designed some of the most outstanding buildings in the world—including the London 2012 Olympic Aquatic Centre. This inspiring book features stylish and quirky illustrations and extra facts at the back, including a biographical timeline with historical photos and a detailed profile of the architect's life. Little People, BIG DREAMS is a best-selling series of books and educational games that explore the lives of outstanding people, from designers and artists to scientists and activists. All of them achieved incredible things, yet each began life as a child with a dream. This empowering series offers inspiring messages to children of all ages, in a range of formats. The board books are told in simple sentences, perfect for reading aloud to babies and toddlers. The hardcover versions present expanded

stories for beginning readers. Boxed gift sets allow you to collect a selection of the books by theme. Paper dolls, learning cards, matching games, and other fun learning tools provide even more ways to make the lives of these role models accessible to children. Inspire the next generation of outstanding people who will change the world with Little People, BIG DREAMS!

**Simon Phipps** Park Publishing (WI)  
Architects imagine the planet: fifty speculative world-scale projects from Patrick Geddes, Alison and Peter Smithson, Kiyonori Kikutake, Juan Navarro Baldeweg, Luc Deleu, and others. The world's growing vulnerability to planet-sized risks invites action on a global scale. The World as an Architectural Project shows how for more than a century architects have imagined the future of the planet through world-scale projects. With fifty speculative projects by Patrick Geddes, Alison and Peter Smithson, Kiyonori Kikutake, Saverio Muratori, Takis Zenetos, Sergio Bernardes, Juan Navarro Baldeweg, Luc Deleu, and many others, documented in text and images, this ambitious and wide-ranging book is the first compilation of its kind. Interestingly, architects begin to address the world as a project long before the advent of contemporary globalism and its assorted anxieties. The Spanish urban theorist and entrepreneur Arturo Soria y Mata, for example, in 1882 envisions a system that connects the entire planet in a linear urban network. In 1927, Buckminster Fuller's "World Town Plan—4D Tower" proposes to solve global housing problems with mobile structures delivered and installed by a Zeppelin. And Joyce Hsiang and Bimal Mendis visualize the conditions of a worldwide "City of Seven Billion" in a 2015–2019 project. Rather than indulging the cliché of the megalomaniac architect, this volume presents a discipline reflecting on its own responsibilities.

**Talking Architecture** Thames & Hudson  
Zaha Hadid's highly inventive and seemingly unbuildable designs have defied conventional ideas of architectural space and construction. The BMW Central Building in Leipzig, Germany, is no exception. It is the heart of the BMW factory complex—the dynamic focal point of the entire plant that visually, physically, and experientially sustains a sense of animation and motion. With an audacious and abstracted geometry of forms and lines, the BMW Central Building challenges the notion of building as static and is definitive evidence of architecture as art. Zaha Hadid: BMW Central Building, the seventh volume in the Source Books in

Architecture series, provides a comprehensive look at this instant modern masterpiece.

**Digital Hadid** Rizzoli International Publications  
The latest spectacular celebration from Architizer of the most inspiring contemporary architecture from around the globe. The Architizer A+Awards represent 2021's best architecture and products, celebrated by a diverse group of influencers within and outside the architectural community. Entries are judged by more than 400 luminaries from fields as diverse as fashion, publishing, product design, real-estate development, and technology, and voted on by the public, culminating in a collection of the world's finest buildings. Each year, winners are honored in this fully illustrated compendium, and on Architizer.com, the largest online architecture community on the planet. Featuring select A+Award winners, this is the definitive guide to the year's best buildings and spaces.

**Building Zaha** Birkhäuser  
Zaha Hadid is one of the most important and influential architects in the world. This is a complete monograph of Hadid's early, unbuilt and built works, from her student years to the latest projects under development, and includes her furniture, stage and exhibition designs. Projects constructed, in planning or under construction are located around the globe. An introduction by Aaron Betsky, 2008 Director of the Venice Architecture Biennale, examines the architect's career, both in the context of architectural history and as a manifestation of the current and future state of architecture.

**100 Contemporary Houses** National Geographic Books  
Take a theoretical approach to architecture with *The Autopoiesis of Architecture*, which presents the topic as a discipline with its own unique logic. Architecture's conception of itself is addressed as well as its development within wider contemporary society. Author Patrik Schumacher offers innovative treatment that enriches architectural theory with a coordinated arsenal of concepts facilitating both detailed analysis and insightful comparisons with other domains, such as art, science and politics. He explores how the various modes of communication comprising architecture depend upon each other, combine, and form a unique subsystem of society that co-evolves with other important autopoietic subsystems like art, science, politics and the economy. The first of two volumes that together present a comprehensive account of architecture's

autopoiesis, this book elaborates the theory of architecture's autopoiesis in 8 parts, 50 sections and 200 chapters. Each of the 50 sections poses a thesis drawing a central message from the insights articulated within the respective section. The 200 chapters are gathering and sorting the accumulated intelligence of the discipline according to the new conceptual framework adopted, in order to catalyze and elaborate the new formulations and insights that are then encapsulated in the theses. However, while the theoretical work in the text of the chapters relies on the rigorous build up of a new theoretical language, the theses are written in ordinary language with the theoretical concepts placed in brackets. The full list of the 50 theses affords a convenient summary printed as appendix at the end of the book. The second volume completes the analysis of the discourse and further proposes a new agenda for contemporary architecture in response to the challenges and opportunities that confront architectural design within the context of current societal and technological developments.

**Zaha Hadid** Canongate Books  
"Zaha Hadid ([born] 1950 in Baghdad), recipient of the Pritzker Architecture Prize, designed and curated a groundbreaking exhibition at Zurich's Galerie Gmurzynska, comparing works of the Russian avant-garde with those of Zaha Hadid Architects. A fierce explosion of Russian works tore through the contemporary works by the architect in a dynamic black and white design. Created specifically for the venue, the projection of a two-dimensional drawing onto a three dimensional space transformed the gallery into a spatial painting in which the threshold of the picture plane expanded and could be entered. Zaha Hadid translated the warped and weightless space of Russian avant-garde painting and sculpture by Kazimir Malevich, El Lissitzky, and Alexander Rodchenko into her very own architectural language."--Publisher's website.

**Building Urban Landscapes** The Monacelli Press, LLC  
Covering architecture, interiors and design, this unique book is stuffed full of amazing concepts and revolutionary products, all chosen by the team behind Dezeen, the world's most influential online architecture and design magazine.  
**The Complete Zaha Hadid** The Complete Zaha Hadid This expanded and up-to-date volume showcases Zaha Hadid's remarkable and inspiring work over the course of her career The Complete Zaha Hadid Zaha Hadid is the leading

architect in the world, and is the first female recipient of the prestigious Pritzker Prize (2004). This is the complete monograph of Hadid's works, from her early, unbuilt projects and ideas from her student years to her very latest projects around the world, including the Aquatics Centre for the London 2012 Olympic Games, the Guangzhou Opera House in China, and the Eli & Edythe Broad Art Museum in Michigan, USA. The book also includes her furniture, product and exhibition designs. **The Complete Zaha Hadid** Zaha Hadid is one of the most important and influential architects in the world. This is a complete monograph of Hadid's early, unbuilt and built works, from her student years to the latest projects under development, and includes her furniture, stage and exhibition designs. Projects constructed, in planning or under construction are located around the globe. An introduction by Aaron Betsky, 2008 Director of the Venice Architecture Biennale, examines the architect's career, both in the context of architectural history and as a manifestation of the current and future state of architecture. **The Complete Zaha Hadid**

Architecture is the art and science of accommodating the lives we want to live. Our cities and buildings aren't givens; they are the way they are because that is as far as we have come to date. They are the best efforts of our ancestors and fellow planetizens, and if they have shortcomings, it is up to us to continue that effort, pick up where they left off. Bjarke Ingels Group's (BIG) grand mission is to find a pragmatic utopia, shaping not only a particular structural entity, but the kind of world we wish to inhabit. This book examines BIG's odyssey of architectural adaptation

**The Complete Zaha Hadid**

*The World Is Not a Rectangle* Hatje Cantz

For more than thirty years, British photographer Simon Phipps has been documenting the rebuilding of Britain after the Second World War through the work of architects. His archive documents Britain's post-war modernism and new brutalism in architecture and recognizes the architect's enormous contribution to the transformation of the political and social landscape of the country in the aftermath of WW II. Significant building on a mass scale was realized and new building techniques were pioneered alongside innovative layouts, resulting in buildings of outstanding quality, displaying radical new forms. The construction ranged from public and private housing, to

schools and universities, churches, museums, galleries, commercial and, ultimately, entire new towns. This new book features around 200 of Simon Phipps's photographs of some 160 buildings in all parts of England completed between the 1950s until the 1980s. They create a confrontation of buildings and architectural fragments, evoking a distinct atmosphere of brutalism. The essays and a conversation with architect Kate Macintosh contextualize brutalism in architecture from a British perspective. **Exhibition: Museum im Bellpark Kriens, Switzerland (26.08.-05.11.2017).**

**Zaha Hadid** The Monacelli Press, LLC Richard Rogers was born in Florence in 1933. He was educated in the UK and then at the Yale School of Architecture, where he met Norman Foster. Alongside his partners, he has been responsible for some of the most radical designs of the twentieth century, including the Pompidou Centre, the Millennium Dome, the Bordeaux Law Courts, Leadenhall Tower and Lloyd's of London. He chaired the Urban Task Force, which pioneered the return to urban living in the UK, was chief architectural advisor to the Mayor of London, and has also advised the mayors of Barcelona and Paris. He is married to Ruth Rogers, chef and owner of the River Café in London. He was knighted in 1991 by Queen Elizabeth II, and made a life peer in 1996. He has been awarded the Légion d'Honneur, the Royal Institute of British Architects' Royal Gold Medal, and the Pritzker Prize, architecture's highest honour. Richard Brown is Research Director at Centre for London, the independent think tank for London. He was previously Strategy Director at London Legacy Development Corporation, Manager of the Mayor of London's Architecture and Urbanism Unit, and an urban regeneration researcher at the Audit Commission.

**The World as an Architectural Project** Pan Macmillan

Even in her very early work, Zaha Hadid made innovative use of graphic techniques such as penetration, distortion, curvature, strongly reduced perspectives, to portray her architectural designs from a refreshing new angle. In this way her unmistakable concepts of architectural space originated, and it is no surprise that the London architect makes full use of the full range of possibilities afforded by today's electronic design tools to create her inimitable forms. This present publication documents the most important of her recent projects, revealing how Zaha Hadid has risen to the digital challenge. Patrik Schumacher

teaches at the Architectural Association in London.

**Dezeen Book of Ideas** Phaidon Press

A major monograph of American architect Andrew Bromberg that explores how landscapes, both natural and human, inspire his designs. The work of Andrew Bromberg, creative director of the global architecture and design practice Aedas and a leading light in cutting-edge design of skyscrapers and large-scale developments, has appeared across Asia and the Arab peninsula. Born in the United States but now inhabiting the craggy mixture of natural and human-made rocks that defines Hong Kong, Bromberg considers cities not just as collections of buildings but as human-made landscapes shaped by social and economic forces equivalent to the erosions, accretions, uplifts, and explosions that shape the natural world. Through a series of chapters that explore the exceptional urban sites of Bromberg's buildings, architecture critic Aaron Betsky reveals how Bromberg visualizes his settings and relates his designs to the dynamic contexts in which they appear. Bromberg shows through his drawings and photographs what nature has meant, and still means, to him, observations that help readers understand the concept of urban development in relation to its natural origins.

**Tadao Ando** Simon and Schuster

A ground-breaking visual survey of architecture designed by women from the early twentieth century to the present day 'Would they still call me a diva if I were a man?' asked Zaha Hadid, challenging as she did so more than a century of stereotypes about female architects. In the same spirited approach, *Breaking Ground* is a pioneering visual manifesto of more than 200 incredible buildings designed by women all over the world. Featuring twentieth-century icons such as Julia Morgan, Eileen Gray and Lina Bo Bardi, and the best contemporary talent, from Kazuyo Sejima to Elizabeth Diller and Grafton Architects, this book is, above all else, a ground-breaking celebration of extraordinary architecture.

**Beautiful China** Springer Science & Business Media

Open the door into 100 of the most beautiful and pioneering houses of the past two decades. With featured architects including Daniel Libeskind, Herzog & de Meuron, and Zaha Hadid, this is a dependable global digest of the nuances, challenges, and opportunities of turning all the emotional and practical requirements of "home" into a constructed...

**Fluid Totality** Princeton Architectural Press

Fluid Totality presents the avant-garde architectural visions of one of the most innovative academic institutions of our time--Studio Hadid at the University of Applied Arts Vienna. The studio founded by Zaha Hadid 15 years ago has meanwhile developed into a globally renowned think tank. The book analyzes these developments in the context of a comprehensive process of digitization and the resulting global changes in our habitats. On the basis of theoretical and analytical essays by influential

contemporary architectural theorists and critics, as well as numerous articles and statements by renowned architects and others who have been involved during the history of the studio, this volume presents the result of fifteen years of pioneering work in an international context; the particular focus being the projects of the last five years.

*Breaking Ground* Birkhäuser  
Zaha Hadid: Heydar Aliyev Centre is devoted to the new cultural center designed by Zaha Hadid in the Azerbaijani

capital of Baku. As one of the most important cultural centers in the country, the building houses a variety of institutions under one roof. With the design, the renowned architect won the architecture competition in 2007. Photographs by Helene Binet and Iwan Baan display the building in all of its facets, making it possible for the reader to experience its formal, haptic, and spatial qualities. Essays explain conceptual and technical aspects of this impressive piece of architecture.
