A modern reimagining of a classic fairy tale by one of most bewitching, idiosyncratic British writers of the twentieth century. Bella Winter has hit a low. Homeless and jobless, she is the mother of a toddler by a man whose name she didn't quite catch, and her once pretty face is disfigured by the scar she acquired in a car accident. Friendless and without family, she's recently disentangled herself from a selfish and indifferent boyfriend and a cruel and indifferent mother. But she shares a quality common

to Barbara Comyns's other heroines: a bracingly unsentimental ability to carry on. Before too long, Bella has found not only a job but a vocation; not only a place to live but a home and a makeshift family. As Comyns's novel progresses, the story echoes and inverts the Brothers Grimm's macabre tale *The Juniper Tree*. Will Bella's hard-won restoration to life and love come at the cost of the happiness of others?

A bright, talented junior at Catamount College in the druggy 1970s, Gillian Brauer strives to realise more than a poet's craft in her workshop with the charismatic, anti-establishment professor Andre Harrow. For Gillian has fallen in love - with Harrow, with his aesthetic sensibility and bohemian lifestyle, with his secluded cottage, with the mystique of his imposing, russet-haired French wife, Dorcas. A sculptress, Dorcas has outraged the campus and alumnae with the crude, primitive, larger than life-sized wooden totems that she has exhibited under the motto 'We are beasts and this is our consolation'. As if mesmerised, Gillian enters the rarefied world of the Harrows. She is special, even though she

knows her classmates have preceded her here. She is helpless. She is powerful. And she will learn in full the meaning of Dorcas' provocative motto . . .

**Ferocious Wild Beasts!** Penguin Books Limited

A celebration of the visual contributions of the bestiary--one of the most popular types of illuminated books during the Middle Ages--and an exploration of its lasting legacy. Brimming with lively animals both real and fantastic, the bestiary was one of the great illuminated manuscript traditions of the Middle Ages. Encompassing imaginary creatures such as the unicorn, siren, and griffin; exotic beasts including the tiger, elephant, and ape; as well as animals native to Europe like the beaver, dog, and hedgehog, the bestiary is a vibrant testimony to the medieval

understanding of animals and their role in the world. So iconic were the stories and images of the bestiary that its beasts essentially escaped from the pages, appearing in a wide variety of manuscripts and other objects, including tapestries, ivories, metalwork, and sculpture. With over 270 color illustrations and contributions by twenty-five leading scholars, this gorgeous volume explores the bestiary and its widespread influence on medieval art and culture as well as on modern and contemporary artists like Pablo Picasso and Damien Hirst. Published to accompany an exhibition on view at the J. Paul Getty Museum at the Getty Center May 14 to August 18, 2019.

Winner of the Sierra Club's 2021 Rachel Carson Award One of Chicago Tribune's Ten Best Books of 2021 Named a Top Ten Best Science Book of 2021 by Booklist and Smithsonian Magazine "At once thoughtful and thought-provoking," *Beloved Beasts* tells the story of the modern conservation movement through the lives and ideas of the people who built it, making "a crucial addition to the literature of our troubled time" (Elizabeth Kolbert, author of *The Sixth Extinction*). In the late nineteenth century, humans came at long last to a devastating realization: their rapidly industrializing and globalizing societies were driving scores of animal species to extinction. In *Beloved Beasts*, acclaimed science journalist Michelle Nijhuis traces the history of the movement to protect and conserve other forms of life. From early battles to save charismatic species such as the American bison and bald eagle to today's global effort to defend life on a larger scale, Nijhuis's "spirited and engaging" account documents "the changes of heart that changed history" (Dan Cryer, *Boston Globe*). With "urgency, passion, and wit" (Michael Berry, *Christian Science Monitor*), she describes the vital role of scientists and activists such as Aldo Leopold and Rachel Carson, reveals the origins of vital organizations like the Audubon Society and the World Wildlife Fund, explores current efforts to protect species such as the whooping crane and the black rhinoceros, and

confronts the darker side of modern conservation, long shadowed by racism and colonialism. As the destruction of other species continues and the effects of climate change wreak havoc on our world, *Beloved Beasts* charts the ways conservation is becoming a movement for the protection of all species including our own.

An unforgettable collection of novellas from the author of *Legends of the Fall* explores the line between civilization and the "wild men." Jim Harrison is an American master. *The Beast God Forgot to Invent* offers stories of culture and wildness, of men and beasts and where they overlap. A wealthy man retired to the Michigan woods narrates the tale of a younger man decivilized by brain damage. A Michigan Indian wanders Los Angeles, hobnobbing with starlets and screenwriters while he tracks an ersatz Native-American activist who stole his bearskin. An aging alpha canine, the author of three dozen throwaway biographies, eats dinner with the ex-wife of his overheated youth, and must confront the man he used to be.
