The Joint Contracts Tribunal's (JCT) Standard Form of Building Contract, one of the most common standard contracts used in the UK to procure building work, is updated regularly to take account of changes in legislation and industry practice and relevant court decisions from litigation. The JCT 05 Standard Building Contract: Law and Administration is a second edition to the authors' earlier award-winning *The JCT98 Building Contract: Law and Administration*, and clarifies complex issues surrounding obligations and rights under the contract. This makes it an essential reference for construction professionals, employers, contractors, and lawyers new to construction seeking to update and consolidate their knowledge. The book also provides the knowledge and understanding of the contract, which are a fundamental part of the education of most students who go on to become managers and leaders in the construction industry. It thoroughly works through the provisions of the contract in simple language, using case law examples and relevant statute to demonstrate approaches to its interpretation.

Defective construction work, whether the result of inadequate design, faulty workmanship or poor materials – or some combination of these failings – is a frequent cause of legal disputes. Someone is usually to blame, either the builder or one or more of the professional consultants, or even the entire project team. It is important therefore that the project team should possess a good working knowledge of their responsibilities and liabilities. Written by a solicitor with over twenty years of experience of building disputes, this book examines the responsibilities and liabilities of the project team when defects occur. It sets out the background role of the common law and statute and includes detailed discussion of important case law affecting the construction process from inception through to completion, together with a consideration of the impact of letters of intent, 'no contract' situations, and specific provisions of model conditions of contract.
