Quand Marion, Alexandre et Gaël se rendent en Bretagne pour les vacances, il faut évidemment que le mystère les y attende. Plusieurs fois par semaine, dans le petit village où ils résident, l'électricité disparaît : portables, ampoules, piles... Incroyable ! Et si c'était un coup de l'Ankou, le valet de la mort des légendes bretonnes ? Il faut dire que, pour un peu, les enfants y croiraient. La tempête, et puis cette silhouette fantômatique qui leur rappelle vaguement quelque chose... Mais, grâce à l'aide de Nolwenn, une jeune bretonne, Marion va mettre à jour une société secrète préparant le retour du royaume d'Arthur, le roi légendaire ! Eh oui, quand on vous dit que les vacances de Marion, c'est tout un programme...

The Spectacle of the Scaffold

This report provides actionable advice on how to design and implement fiscal policies for both development and climate action. Building on more than two decades of research in development and environmental economics, it argues that well-designed environmental tax reforms are especially valuable in

developing countries, where they can reduce emissions, increase domestic revenues, and generate positive welfare effects such as cleaner water, safer roads, and improvements in human health. Moreover, these reforms need not harm competitiveness. New empirical evidence from Indonesia and Mexico suggests that under certain conditions, raising fuel prices can actually increase firm productivity. Finally, the report discusses the role of fiscal policy in strengthening resilience to climate change. It provides evidence that preventive public investments and measures to build fiscal buffers can help safeguard stability and growth in the face of rising climate risks. In this way, environmental tax reforms and climate risk-management strategies can lay the much-needed fiscal foundation for development and climate action.

Discusses structural and physiochemical effects of irradiation and presents techniques to model and monitor radiation events. Describes the use of radiation as a sterilization method in the biomedical, pharmaceutical, and food industries. Examines current topics in the stability and stabilization of polymers exposed to ionizing radiation. Reviews advances in the use of radiation with photosensitive metathesis polymers, chemical amplification, and dry-develop resist technology.

During the 1980s, capitalism triumphantly secured its global reach, anti-communist ideologies hammered home socialism's inherent failure, the New Left increasingly moved into the

professional middle class--and many of feminism's earlier priorities were marginalized. "Identity politics", often formulated in terms of social reconstructionism or multiculturalism, has increasingly suppressed materialist feminism's systematic perspective, replacing it with discourse analysis or cultural politics. *Materialist Feminism: A Reader* argues against the retreat to multiculturalism for keeping invisible the material links among the explosion of meaning-making practices in highly industrialized social sectors, the exploitation of women's labor, and the appropriation of women's bodies that continues to undergird the scramble for profits and state power in multinational capitalism.

Foucault's writings on power and control in social institutions have made him one of the modern era's most influential thinkers. Here he argues that punishment has gone from being mere spectacle to becoming an instrument of systematic domination over individuals in society - not just of our bodies, but our souls. Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and

visionaries whose ideas shook civilization and helped make us who we are.

This book provides a thorough overview of the ongoing evolution in the application of artificial intelligence (AI) within healthcare and radiology, enabling readers to gain a deeper insight into the technological background of AI and the impacts of new and emerging technologies on medical imaging. After an introduction on game changers in radiology, such as deep learning technology, the technological evolution of AI in computing science and medical image computing is described, with explanation of basic principles and the types and subtypes of AI. Subsequent sections address the use of imaging biomarkers, the development and validation of AI applications, and various aspects and issues relating to the growing role of big data in radiology. Diverse real-life clinical applications of AI are then outlined for different body parts, demonstrating their ability to add value to daily radiology practices. The concluding section focuses on the impact of AI on radiology and the implications for radiologists, for example with respect to training. Written by radiologists and IT professionals, the book will be of high value for radiologists, medical/clinical physicists, IT specialists, and imaging informatics professionals.

In this lively study of the development and transformation of voices of female

offenders in nineteenth-century England, Anne Schwan analyzes a range of colorful sources, including crime broadsides, reform literature, prisoners' own writings about imprisonment and courtroom politics, and conventional literary texts, such as *Adam Bede* and *The Moonstone*. Not only does Schwan demonstrate strategies for interpreting ambivalent and often contradictory texts, she also provides a carefully historicized approach to the work of feminist recovery. Crossing class lines, genre boundaries, and gender roles in the effort to trace prisoners, authors, and female communities (imagined or real), Schwan brings new insight to what it means to locate feminist (or protofeminist) details, arguments, and politics. In this case, she tracks the emergence of a contested, and often contradictory, feminist consciousness, through the prism of nineteenth-century penal debates. The historical discussion is framed by reflections on contemporary debates about prisoner perspectives to illuminate continuities and differences. *Convict Voices* offers a sophisticated approach to interpretive questions of gender, genre, and discourse in the representation of female convicts and their voices and viewpoints.

How did Paris and its musical landscape influence Verdi's *La traviata*? In this book, Emilio Sala re-examines *La traviata* in the cultural context of the

French capital in the mid-nineteenth century. Verdi arrived in Paris in 1847 and stayed for almost two years: there, he began his relationship with Giuseppina Strepponi and assiduously attended performances at the popular theatres, whose plays made frequent use of incidental music to intensify emotion and render certain dramatic moments memorable to the audience. It is in one of these popular theatres that Verdi probably witnessed one of the first performances of Dumas fils' *La Dame aux camélias*, which became hugely successful in 1852. Making use of primary source material, including unpublished musical works, journal articles and rare documents and images, Sala's close examination of the incidental music of *La Dame aux camélias* - and its musical context - offers an invaluable interpretation of *La traviata*'s modernity.

A brilliant work from the most influential philosopher since Sartre. In this indispensable work, a brilliant thinker suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

In the post-World War I American climate of isolationism, nativism, democratic expansion of civic rights, and consumerism, Italian-born star Rodolfo Valentino and Italy's dictator Benito Mussolini became surprising paragons of authoritarian male power and mass appeal. Drawing on extensive archival research in the United States and Italy, Giorgio Bertellini's work shows how their popularity, both political and erotic, largely depended on the efforts of public opinion managers, including publicists, journalists, and even ambassadors. Beyond the democratic celebrations of the Jazz Age, the promotion of their charismatic masculinity through spectacle and press coverage inaugurated the now-familiar convergence of popular celebrity and political authority. This is the first volume in the new Cinema Cultures in Contact series, coedited by Giorgio Bertellini, Richard Abel, and Matthew Solomon.

This book illustrates, that the fungal cell wall is critical for the biology and ecology of all fungi and especially for human fungal pathogens. Readers will learn, that the composition of the fungal cell wall is a unique structure, which cannot be found in the human host. Consequently, the chapters outline, how the immune systems of both animals and humans have evolved to recognize conserved and unique elements of the fungal cell wall. As an application example, the authors also show, that the three-dimensional structures of the cell wall are excellent targets for the development of antifungal agents and chemotherapeutic strategies. With the combination of biological findings and medical outlooks, this volume is a fascinating read for scientists, clinicians and biomedical students.

In this newest installment in Chicago's series of Jacques Derrida's seminars, the renowned philosopher attempts one of his most ambitious goals: the first truly philosophical argument against the death penalty. While much has been written against the death penalty, Derrida contends that Western philosophy is massively, if not always overtly, complicit with a logic in which a

sovereign state has the right to take a life. Haunted by this notion, he turns to the key places where such logic has been established—and to the place it has been most effectively challenged: literature. With his signature genius and patient yet dazzling readings of an impressive breadth of texts, Derrida examines everything from the Bible to Plato to Camus to Jean Genet, with special attention to Kant and post-World War II juridical texts, to draw the landscape of death penalty discourses. Keeping clearly in view the death rows and execution chambers of the United States, he shows how arguments surrounding cruel and unusual punishment depend on what he calls an “anesthetical logic,” which has also driven the development of death penalty technology from the French guillotine to lethal injection. Confronting a demand for philosophical rigor, he pursues provocative analyses of the shortcomings of abolitionist discourse. Above all, he argues that the death

penalty and its attendant technologies are products of a desire to put an end to one of the most fundamental qualities of our finite existence: the radical uncertainty of when we will die. Arriving at a critical juncture in history—especially in the United States, one of the last Christian-inspired democracies to resist abolition—The Death Penalty is both a timely response to an important ethical debate and a timeless addition to Derrida’s esteemed body of work.

A rich compendium of Western art by women, this book also contains essays which examine the many economic, social, and political forces that have shaped the art over years of pivotal change. The women profiled played an important role in gaining the acceptance of women as men's peers in artistic communities. Their independent spirit resonates in studios and galleries throughout the country today. Photos.
