The book includes dozens of must-have record-keeping, assessment, and reference forms, as well as how-to video links that provide show Jan in action with diverse readers.

New Perspectives on Microsoft Access 2002 Cambridge University Press

This book presents the use of a microprocessor-based digital system in our daily life. Its bottom-up approach ensures that all the basic building blocks are covered before the development of a real-life system. The ultimate goal of the book is to equip students with all the fundamental building blocks as well as their integration, allowing them to implement the applications they have dreamed up with minimum effort.

Molecular Associations in Biology provides information pertinent to molecular biology. This book discusses several topics, including DNA replication,

calculation of intermolecular energies, and thermodynamic parameters of polynucleotides. Organized into 35 chapters, this book starts with an overview of the specific association of the purine and pyrimidine bases in the nucleic acids, which provides the basis for storage, expression, and transmission of genetic information. This text then explores the secondary structures, interactions, and replication processes of nucleic acids. Other chapters consider the complex biological process of protein synthesis. This book discusses as well the methods of photodynamic action, which is significant in detecting energy transfer from dye to the biomolecule and identifying the free radicals produced. The final chapter deals with the macroscopic properties of molecular systems, which refer to such concepts as volume, mass, pressure, temperature, and pH. This book is a valuable resource for biophysicists, organic chemists, biochemists, and biologists.

Surveying for Construction 5e is an essential textbook for students of engineering new to surveying, and will also appeal to students of building and environmental studies and archaeology. Offering a strong grounding in land and construction surveying, the authors clearly and comprehensively guide the reader through the principles, methods and equipment used in modern-day surveying. Taking into account recent advances in the field, the material has been fully updated and revised throughout including new and up-to-date coverage of levelling, total stations, detail surveys, and EDM. A new chapter on GPS technology has been added. In keeping with the practical nature of the book, there are chapters on setting out construction works and surveying existing buildings, which guide the reader step-by-step through the fundamental procedures. The clear and methodical nature of the explanations, supported by a wide range of exercises and examples, make Surveying for Construction 5e an invaluable and modern introduction to surveying. Key features include:

- Fully updated coverage and new material throughout, including a new chapter on GPS
- New Learning Objectives and Chapter Summaries which guide the student through the learning process and highlight the key principles and methods for each chapter
- Numerous diagrams and figures which give students a clear and detailed understanding of equipment and procedures
- Extensive boxed examples and exercises that guide students through real-world surveying methods and calculations

Website material: online material for creating your own surveying project allows students to practice the methods and techniques they have learnt

Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation.

Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact and outcome. Section 3 provides manuals and programs for intervention effectively provided as group activities. Section 4 explains how to design a full programme that integrates therapeutic interventions with group programmes as well as services provided by other agencies. The final section looks at peer support and self help, providing manuals and resources that support programmes and interventions not requiring professional or practitioner direction. *The Magical Night Bed Time Story* Springer Science & Business Media

'If The Girl on the Train was the woman of 2015, then Sophie Stark is this year's model. Anna North's novel, The Life and Death of Sophie Stark, has been a hit in America, with Lena Dunham describing its protagonist as a "totally unforgettable female antihero". Out now - soon every girl on every train will be reading it! Sunday Times Who is the real Sophie Stark? The Life and Death of Sophie Stark is the story of an enigmatic film director, told by the six people who loved her most. Brilliant, infuriating, all-seeing and unknowable, Sophie Stark makes films said to be 'more like life than life itself'. But her genius comes at a terrible cost: to her husband, to the brother she left behind, and to an actress who knows too much. With shades of We Are All Completely Beside Ourselves, A Visit from the Goon Squad and Where'd You Go, Bernadette, it combines a uniquely appealing sensibility with a compulsively page-turning plot. 'Thriller-paced, with mysteries revealed at every turn. The great mystery at the centre is Sophie Stark, a totally unforgettable female anti-hero who conforms to absolutely none of our expectations and suffers deeply for it' Lena Dunham 'North is a natural, butter-smooth storyteller' Maggie Shipstead, author of SEATING ARRANGEMENTS 'I read THE LIFE AND DEATH OF SOPHIE STARK with my heart in my mouth. Not only a dissection of genius and the havoc it can wreak, but also a thunderously good story' Emma Donoghue, author of ROME 'Jennifer Egan, eat your heart out! Sam Baker 'A captivating portrait of the artist as a young woman. It's a story that examines the notion of artistic legacy and meditates on the ethics involved in film-making and storytelling' THE INDEPENDENT 'Gripping and graceful' THE GUARDIAN 'The year's must read' GLAMOUR
