The Winds of Change Lynne Barrett-Lee

Osteopathic medicine currently serves the health needs of more than 30 million Americans. In this book the author chronicles the history of this once-controversial medical movement from its origins in the nineteenth century to the present, describing the philosophy and practice of osteopathy as well as its impact on medical care.

To build electronic projects that can sense the physical world, you need to build circuits based around sensors: electronic components that react to physical phenomena by sending an electrical signal. Even with only basic electronic components, you can build useful and educational sensor projects. But if you incorporate Arduino or Raspberry Pi into your project, you can build much more sophisticated projects that can react in interesting ways and even connect to the Internet. This book starts by teaching you the basic electronic circuits to read and react to a sensor. It then goes on to show how to use Arduino to develop sensor systems, and wraps up by teaching you how to build sensor projects with the Linux-powered Raspberry Pi.

Maurice Blanchot, the Thought from Outside Butterworth-Heinemann

Shaye Eastly has never been in the presence of kings, or magic. In fact, she has never ventured further from her small village in the mortal kingdom of Nautia than the capital square. But when a stranger appears to help her evade the palace guards who've come to arrest her for suspected sorcery, Shaye must trust her new companion, Aydan, to keep her safe. As they flee to Medeisia, the ancient land of sorcerers, Shaye is quickly wrapped up in a dangerous world with a target on her back as long-dormant abilities spark and a family history she's never known begins to unravel before her. Meanwhile, Aydan's wanted status and complicated relationship with the royal family

leads them down a path they cannot turn from. In the midst of imprisonment, torture, and rising political tension, Shaye and Aydan must rely on each other and decide if their feelings for one another can survive the horrors they endure, the implications that come with her growing power, and the family legacies that will follow them forever.

Before reading my private 'confessions'* please bear in mind the following: (1) My husband Joe and I are soul-mates. Nothing - including a smouldering lone father or Joe's teeny mid-life crisis - could ever come between us. (Hopefully he won't find out about smouldering Lone Father's sexed-up exposé of our secret 'affair' last year.) (2) Offspring Katie and Jack are well-adjusted and happy - even if Jack thinks he's a dog and Katie wants to be a Pussy Cat Doll. (3) VBF Louise makes new motherhood appear unnaturally glamorous. It simply isn't normal to fit back into size zero jeans so soon after giving birth - and I have the jelly belly to prove it. (4) I did not cynically engineer my close personal friendship with Celebrity Mom Angelica Law just to get invited to red carpet events. The whole newspaper-paparazzi-telly thing was NOT my fault - I can't help it if I've got star quality in bucket-loads, can I? *Note: The publisher 'borrowing' my diary and printing its contents does not amount to a confession. My arm had to be twisted very hard ...

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

This is the first English translation of the seminar Martin Heidegger gave during the Winter of

1934-35, which dealt with Hegel's Philosophy of Right. This remarkable text is the only one in which Heidegger interprets Hegel's masterpiece in the tradition of Continental political philosophy while offering a glimpse into Heidegger's own political thought following his engagement with Nazism. It also confronts the ideas of Carl Schmitt, allowing readers to reconstruct the relation between politics and ontology. The book is enriched by a collection of interpretations of the seminar, written by select European and North American political thinkers and philosophers. Their essays aim to make the seminar accessible to students of political theory and philosophy, as well as to open new directions for debating the relation between the two disciplines. A unique contribution, this volume makes available key lectures by Heidegger that will interest a wide readership of students and scholars.

In these two essays, two of the most important French thinkers of our time reflect on each other's work. In so doing, novelist/essayist Maurice Blanchot and philosopher Michel Foucault develop a new perspective on the relationship between subjectivity, fiction, and the will to truth. The two texts present reflections on writing, language, and representation that question the status of the author/subject and explore the notion of a "neutral" voice that arises from the realm of the "outside." This book is crucial not only to an understanding of these two thinkers, but also to any overview of recent French thought.

When an unidentified five-year-old girl is shot on a grimy street in London, Jury knows this will be one of the hardest investigations of his career. He is joined by his colleague DI Johnny Blakeley, head of the paedophile unit of New Scotland Yard, who suspects Viktor Baumann, owner of an iniquitous house on the same street - an operation Blakeley has been long trying to shut down. Meanwhile, at Angel Gate, where Jury's trusty sidekick, Melrose Plant, is now a gardener, an unidentified woman has been murdered in the grounds of Declan Scott's estate. First on the scene is commander of the Devon and Cornwall police, Brian Macalvie. Three years earlier, Declan Scott's four-year-old stepdaughter, Flora, was abducted and shortly after her disappearance, her mother died too, leaving Declan bereft. Together Jury, Macalvie, Blakeley and Plant rake over the past and the present and find that all sign posts point to the guilt of Viktor Baumann, who happens to be Flora's father. But when no one in this case is exactly who they seem, how can Jury be sure?
