Ignatius of Antioch and the Second Sophistic John Benjamins Publishing
Mediterranean Coastal Pollution focuses on scientific and technical information on the progress of measures and initiatives relative to the control of pollution in the Mediterranean. The book commences by pointing to the Mediterranean Action Plan. Particularly given consideration are the related legislation, the environmental assessment and management components of the plan, and present stage of the plan. The book also discusses the remedies and initiatives that need to be undertaken in the event of marine accidents. The methods to measure the quantity of pollutants in water is also discussed. The text also presents experiments and studies that focus on the control of the effects of hazardous chemicals on coastal waters. Marine studies and research on coastal waters are discussed, and the trends, methodologies, and recommendations are outlined to support the findings. Sewage treatment and proper disposal methods of hazardous substances on coastal waters are also discussed. Comparisons are then made between conventional sewage treatment processes and new processes. The book is a valuable source of data for scholars and readers who are interested in mitigating the effects of pollution on coastal waters.

From Order to Chaos Mohr Siebeck

Déodat de Sédaine (1872-1921) is best known for his piano music but his compositions included orchestral and vocal works, including opera, cantata and incidental music. Claude Debussy described Sédaine's music as "exquisite and rich with ideas." The early works were influenced by Impressionist harmonies, church modes, cyclic techniques, folk-like melodies and Andalusian motives. Sédaine's style changed dramatically in 1907 when he left Paris and began to include Catalan elements in his compositions - a transition that has hitherto gone unrecognized. Robert Waters provides a much-needed study of the life and works of Sédaine, focusing on the composer's regionalist philosophy. Sédaine's engagement with folk music was not a patriotic gesture in the vein of nationalistic composers, but a way of expressing regional identity within France to counter the restrictive styles sanctioned by the Paris Conservatory. His musical philosophy mirrored larger social and political debates regarding anti-centralist positions on education, politics, art and culture in fin de siècle France. Such debates involved political and social leaders whom Sédaine knew and personally admired, including the writer Maurice Barrès and the poet Frédéric Mistral. The book will appeal to those specializing in French music, European ethnic musics, piano music and French music history.

"The" London Journal of Botany BRILL

"Ignatius of Antioch was the earliest Christian writer to develop a theology of church order and ministry that bears comparison with what became normative in later Christendom as that of bishops, priests and deacons. Allen Brent has produced a new account of the origin of such a concept of

ministerial order in the religious cults and civic institutions of the pagan Greek city-states of Asia Minor in the second sophistic."--BOOK JACKET.

Volume 10: Philosophy of Religion Cambridge University Press

The first dictionary and analysis of an extremely complex Inuit dialect, published in 1876 by a French missionary.

La polysémie, ou, L'empire des sens Springer

The book concerns the inscription written on wall plaster discovered in 1967 at Deir cAlla in the Jordan Valley, and published in 1976. Using new data and the discussions about the text available to date, it deals with six different aspects of study of the text, namely the archaeological context, the palaeography, the general interpretation as well as the interpretation of several separate passages, the language used, and its relation to Old Testament studies.

Debates of the Legislative Assembly of United Canada, 1841-1867 Gunter Narr Verlag

This volume offers an important contribution to the comparative historical study of languages. Most of the articles deal with topics concerning the Indo-European proto-language as well as the individual languages descended from it. Essays in Finno-Ugric philology complete the volume. The book is divided in 8 sections: I. Indo-European, II. Anatolian, III. Indic, IV. Iranian and Armenian, V. Celtic, VI. Germanic Languages, VII. Slavic and Albanian, VIII. Fennougrica and Altaica.

An Account of the Polynesian Race: Comparative vocabulary of the Polynesian and Indo-European languages. With a preface by Prof. W. D. Alexander. 1885 Springer Science & Business Media

Today, cyber security, cyber defense, information warfare and cyber warfare issues are among the most relevant topics both at the national and international level. All the major states of the world are facing cyber threats and trying to understand how cyberspace could be used to increase power. Through an empirical, conceptual and theoretical approach, *CyberConflict* has been written by researchers and experts in the fields of cyber security, cyber defense and information warfare. It aims to analyze the processes of information warfare and cyber warfare through historical, operational and strategic perspectives of cyberattack. It is original in its delivery because of its multidisciplinary approach within an international framework, with studies dedicated to different states - Canada, Cuba, France, Greece, Italy, Japan, Singapore, Slovenia and South Africa - describing the state's application of information warfare principles both in terms of global development and "local" usage and examples. Contents 1. Canada's Cyber Security Policy: a Tortuous Path Towards a Cyber Security Strategy, Hugo Loiseau and Lina Lemay. 2. Cuba: Towards an Active Cyber-defense, Daniel Ventre. 3. French Perspectives on Cyber-conflict, Daniel Ventre. 4. Digital Sparta: Information Operations and Cyber-warfare in Greece, Joseph Fitsanakis. 5. Moving Toward an Italian Cyber Defense and Security Strategy, Stefania Ducci. 6. Cyberspace in Japan's New Defense Strategy, Daniel Ventre. 7. Singapore's Encounter with Information Warfare: Filtering Electronic Globalization and Military Enhancements, Alan Chong. 8. A Slovenian Perspective on Cyber Warfare, Gorazd Praprotnik, Iztok Podbregar, Igor Bernik and Bojan Tigar. 9. A South African Perspective on Information Warfare and CyberWarfare, Brett van Niekerk and Manoj Maharaj. 10. Conclusion, Daniel

Ventre

Die Welt des Menschen — Die Welt der Philosophie L'herméneutique analogique du Judaïsme antique d'après les témoins textuels d'Isaïe

This book is a compilation of the review papers, expositions and some of the technical works of Leo Kadanoff, a theoretical physicist. The objective is to put together a group of not-too-technical writing in which he discusses some issues in condensed matter physics, hydrodynamics, applied mathematics and national policy. This expanded edition is divided into five sections. The first section contains review papers on hydrodynamics, condensed matter physics and field theory. Next is a selection of papers on scaling and universality, particularly as applied to phase changes. A change of pace is provided by a series of papers on the critical analysis of simulation models of urban economic and social development. The book concludes with a series of recent papers on complex patterns. Each major section has an introduction designed to tie the work together and to provide perspective on the subject matter. Contents: Fundamental Issues in Hydrodynamics, Condensed Matter and Field Theory, Scaling and Phase Transitions, Simulations, Urban Studies, and Social Systems, Turbulence and Chaos, Complex Patterns. Readership: Condensed matter physicists, applied mathematicians and computer scientists. Keywords: Order; Chaos; Critical; Statistical Mechanics; Phase Transition; Scaling; Universality; Dynamics; Turbulence; Renormalization. Reviews: "World Scientific has made available a collection of Leo's reviews, essays columns and commentaries which is a feast in several senses: the strategy and tactics of science, the science itself, the history of several important developments in science, and as a bonus a beautifully illustrated collection of essays on computational science. The average reader may find this, the final section of the book, most interesting, but for me the account of his discovery of scaling, for which, inexplicably, he did not receive the Nobel prize, is most intriguing. Leo's combination of verve, frankness and insight makes this a very good read." P W Anderson Princeton Univ. "Publication of this volume will be very useful, especially for young readers. The papers disseminated over many journals acquire a new quality by being collected together. Readers not only can see a result in its final form, but also can trace its evolution." J Fluid Mechanics "It remains fascinating and often inspirational material, for the author has helped found fields and illuminate areas wherever he worked." Mathematical Reviews *The Balaam Text from Deir 'Alla Re-evaluated* John Wiley & Sons

The present volume is a continuation of the series Contemporary Philosophy. As with the earlier volumes in the series, the present Chronicles purport to give a survey of significant trends in contemporary philosophy. The need for such surveys has, I believe, increased rather than decreased over the years. The philosophical scene appears, for various reasons, more complex than ever before. The continuing process of specialization in most branches, the increasing contact between philosophers from various cultures, the emergence of new schools of thought, particularly in philosophical logic and in the philosophy of language and ethics, and the increasing attention being paid to the history of philosophy in discussions of contemporary problems, are the most important contributing factors. Surveys of the present kind are a valuable source of knowledge of this complexity. The surveys may therefore help to strengthen the Socratic element of modern philosophy, the intercultural dialogue or Kommunikationsgemeinschaft. So far, nine volumes have been published in this series, viz. Philosophy of Language and Philosophical Logic (Volume 1),

Philosophy of Science (Volume 2), Philosophy of Action (Volume 3), Philosophy of Mind (Volume 4), African Philosophy (Volume 5), Medieval Age Philosophy (Volumes 6/1 and 6/2), Asian Philosophy (Volume 7), Philosophy of Latin America (Volume 8), and Aesthetics and Philosophy of Art (Volume 9). *Proceedings of the Society of Biblical Archaeology* BRILL

Annales du Musée Guimet BRILL

The late Middle English "Weye of Paradys" and its French source "La Voie de Paradis" use the theme of the allegorical journey to Paradise. Essentially they are popular guides to confession, adaptations for the layman of more specialized works in Latin such as Raymond of Pennaforte's "Summa de Poenitentia," This edition presents critical texts of both "The Weye of Paradys" and "La Voie de Paradis" and analyzes the relations of the English text with its immediate (French) and distant (Latin) sources. This work makes the English and French texts available in print for the first time and places them in the wider field of popular penitential literature.

D?at de S?rac BRILL

The Encyclopedia of Christian Theology, translated from the French Dictionnaire Critique de Théologie 2nd Edition, features over 530 entries, contributed by 250 scholars from fifteen different countries. Alphabetically arranged entries provide the reader a critical overview of the main

theological questions and related topics, including concepts, events, councils, theologians, philosophers, movements, and more. Hailed as a "masterpiece of scholarship," this reference work will be of great interest and use for scholars, students of religion and theology as well as general readers.
