 Developing innovative efficient and sensitive spectroscopic and optical techniques for studying biomedically relevant molecules, structures and processes in vitro and

in vivo is a field of rapidly growing interest. This symposium book covers novel and exciting approaches in biomedical spectroscopy. Several chapters deal with infrared and Raman spectroscopy. These complimentary vibrational spectroscopic techniques are capable of monitoring molecular structures as well as structural changes. Such studies are of interest for understanding diseases at a molecular level as well as for developing techniques for efficient early diagnosis based on molecular structural information. The chapters demonstrate also applications vibrational spectroscopy in

proteomics and the characterization of micro organisms. The second section of the book introduces surface enhanced Raman scattering (SERS), demonstrates the application of the effect in the biomedical field and develops the concept of multifunctional nanosensors. The measurement of intrinsic optical signals from biological objects such as nerve tissue are discussed in the next section of the book. Chapters deal also with Coherent anti-Stokes Raman scattering (CARS) and fluorescence fluctuation spectroscopy. Other chapters illustrate how photons of very different energies, in the Terahertz and in the ultra violet range,

can be used to retrieve molecular structural information from native biomolecules. The electrical properties of protein molecules adsorbed onto a gold substrate are studied by using a scanning Kelvin nanoprobe in a microarray format. The final chapters in the book demonstrate the powerful combination of different spectroscopic techniques for the characterization of biomolecules as well as native and engineered biomaterials. These chapters combine information from Raman and Inelastic Neutron Scattering, optical absorbance and energy dispersive X-ray analysis, positron annihilation lifetime spectroscopy (PALS), ^1H NMR, and ^{129}Xe

NMR X-ray diffraction and fluorescence resonance energy transfer.

 42 kraftvolle Saftrezepte gegen Krebs: Zur natürlichen Abwehr und Behandlung von Krebs durch die Zufuhr von Vitaminen und Mineralien, die dein Körper in diesem Kampf benötigt Von Joe Correa CSN Etwa 10-12 Millionen Menschen erkranken jedes Jahr an Krebs. Darum gehört Krebs zu den

häufigsten Todesarten der modernen Welt. In den vergangenen Jahrzehnten hat Krebs epidemische Ausmaße angenommen und betrifft etwa einen von zwei Männern und eine von drei Frauen. Mit 7-8 Millionen Todesopfern jährlich kann ich zurecht behaupten, dass der Kampf gegen Krebs eine wichtige Priorität darstellen sollte. Einige Statistiken sagen, dass Brustkrebs bei Frauen und Lungenkrebs bei Männern die beiden häufigsten Krebsarten der Welt sind. Eine der Hauptgründe für diese Krankheit ist unser moderner Lebensstil, der uns verschiedenen Toxinen, Krebs erregenden Substanzen und Stress aussetzt. Aber der wichtigste Grund für die meisten Menschen

ist unsere ungesunde Ernährung. Der Mangel an den grundlegenden Nährstoffen schwächt unser Immunsystem, was wiederum zu ernsthaften und langfristigen Gesundheitsschäden führt und eventuell Krebs verursacht. Das meiste Essen steckt voller künstlicher Geschmacksverstärker, Farbstoffen, Zusatzstoffen, Stabilisatoren und Präservativen. Obwohl einige dieser Substanzen harmlos sind, sind viele extrem toxisch und kann unserem Organismus wichtige Nährstoffe entziehen. Obwohl die meisten Menschen diese Fakten kennen, finden sie dennoch nicht genügend Zeit, um ihre Mahlzeiten zu planen. Darum wird Fast Food immer

beliebter. Aus diesen Gründen sollten Säfte deine erste Wahl sein, wenn es darum geht Krebs zu bekämpfen und fernzuhalten. Sie erfordern kaum Zeit, aber versorgen dich mit einer erstaunlichen Anzahl an Nährstoffen, die dein Körper braucht, um dein Immunsystem zu stärken und das Krebsrisiko zu senken. Diese Krebs abwendenden Saftrezepte wurden erstellt, um dich innerhalb weniger Minuten mit den wichtigsten Nährstoffen zu versorgen. Versuche sie und sehe selbst, welchen Unterschied sie in deinem Leben ausmachen!
