A cascade of TUPE cases, notably and centrally upon the service provision change, and the subsequent enactment of the Collective Redundancies and the Transfer of Undertakings (Protection of Employment) (Amendment) Regulations 2014 by the UK Government, have made necessary this fourth edition of TUPE: Law & Practice. The new 2014 Amendment Regulations, in force from 31 January 2014, are intended to clarify the issues raised by recent cases and also to reduce the burdens on employers of small enterprises. This guide provides analysis of the new 2014 TUPE Amendment Regulations including: the scope to "service provision changes" (i.e. outsourcing/contracting-out and in), as well as clarification of the Regulation 3; key changes relating to transfer dismissals and changes to terms and conditions; pensions obligations under TUPE; clarified 'joint' consultation rights; the confusing application of TUPE where the transferor is insolvent. Lawyers, politicians and policymakers, HR practitioners, as well as

academics, will find this book brings them up to speed on TUPE. This book aims to keep pace with these changes, providing practical advice and cutting edge analysis. Corporate Insolvency and Rescue Law Society Publishing
The subject of bank stability has been under a great amount of political and legislative scrutiny since the mid-2007 to late-2009 global financial crisis.

However, these efforts have centred on developed economies. Little coverage is given to strategies adopted by many developing economies. While there is a global discourse on the subject of insolvency generally, there is ample scope to contribute to the growing body of work on the narrow subject of bank insolvencies. This book provides a unique perspective on

an emerging theme in at least two respects. First is the focus on selected developing economies and selected developed economies in the EMEA region alongside cross-border developments, with the objective of deciphering the regulatory approach to bank insolvencies. The second is the analytical consideration of methods that may be implemented to preclude or resolve bank insolvencies in

developing economies. This book explores the nexus between developing economies and their banking institutions. Developing economies are acutely dependent on their banks for the functioning of their cash-based economies. Recent events, however, suggest a weakness in the long-term viability of some of their banks and a mixed-bag regulatory

approach to redress this weakness. This book evaluates the effectiveness of regulatory frameworks in selected developing economies that are designed to prevent or resolve the insolvency of banks. At a time of global economic uncertainty, this book will prove to be a valuable resource to the discourse on the viability of banks, businesses, and economies in developing

States.

This edited volume is based on the European Law Institute's (ELI) project 'Rescue of Business in Insolvency Law'. The project ran from 2013 to 2017 under the auspices of the ELI and was conducted by Bob Wessels and Stephan Madaus, who were assisted by Gert-Jan Boon. The study sought to design

(elements of) a legal framework that will enable the further development of coherent and functional rules for business rescue in Europe. This includes certain statutory procedures that could better enable parties to negotiate solutions where a business becomes financially distressed. Such a framework also includes rules to determine in which procedures and under which conditions an enforceable solution can be imposed upon creditors and other stakeholders despite their lack of consent. The project had a broad scope, and extended to consider frameworks that can be used by (non-financial) businesses out of court, and in a pre-insolvency context. Part I of this book, the ELI Instrument as approved by the ELI Council and General Assembly, features 115 recommendations on a wide variety of themes affected by the rescue of financially distressed businesses, such as the legal rules for professions and courts, treatment and ranking of creditors' claims, contract, corporate and labour law as well as laws relating to transaction avoidance. Part II consists of national reports that sketch the legal

<p>landscape in 13 States and of an 'Inventory Report on International Recommendations from Standard-Setting Organisations', both of which provided insight for the drafting of the Instrument.
