 A new
 assembly
 language
 programming
 book from a

well-loved
 master. Art of
 64-bit
 Assembly
 Language
 capitalizes on
 the long-lived
 success of
 Hyde's

seminal The Art of Assembly Language. Randall Hyde's *The Art of Assembly Language* has been the go-to book for learning assembly language for decades. Hyde's latest work, *Art of 64-bit Assembly Language* is the 64-bit version of this popular text. This book guides you through the maze of assembly language programming by showing how to write assembly

code that mimics operations in High-Level Languages. This leverages your HLL knowledge to rapidly understand x86-64 assembly language. This new work uses the Microsoft Macro Assembler (MASM), the most popular x86-64 assembler today. Hyde covers the standard integer set, as well as the x87 FPU, SIMD parallel instructions, SIMD scalar instructions (including

high-performance floating-point instructions), and MASM's very powerful macro facilities. You'll learn in detail: how to implement high-level language data and control structures in assembly language; how to write parallel algorithms using the SIMD (single-instruction, multiple-data) instructions on the x86-64; and how to write stand alone assembly programs and assembly

code to link with HLL code. You'll also learn how to optimize certain algorithms in assembly to produce faster code.

For
seventeen-year-old Lena, living in the trailer park with the rest of town's throwaways isn't exactly paradise. Dealing with a drunken father who can't keep his fists to himself doesn't help matters

either. The only good thing in her life, other than track, is the mysterious man who visits her dreams, promising to find her. When a chair burns her arms, Lena chalks it up to stress-induced crazy. Yet as bizarre incidents escalate, even being crazy can't explain it all away... until one day dream guy does find her. Tarek lost Lena seventeen years ago after she was accused of treason and

marked Tainted. He finally discovers her reborn on Earth into a life of suffering as punishment for her crime. However, someone else has already found her... and wants her dead. Willing to sacrifice everything, he fights to keep her safe so she can live the only life she's ever known-even if that life doesn't include him.

What's so
tough about
building a
solar
collector?
Most people
think it's time
they tried to
do their part
at lowering
their monthly
utility bills or
curbing
climate
change, but
they suspect
that their
dream of
building a hot
water solar
collector is
more than
they can

handle. In some cases, this may be true. However, if you have already performed your own plumbing repairs, this project may not be as difficult as and more affordable than you imagine. This down-to-earth guide can show you just how possible such a project can be. With simple step-by-step instructions, fifty-six clear illustrations, and a complete parts list from a major

hardware store, you may fulfill your dream of going solar sooner than you think. This is an excellent book with clear and well thought out plans. With a little investment of time and the parts listed, you will have a worthy product that will save money and provide satisfaction. A. J. Shea I am very impressed with the plans for this solar hot water system. I think it was easy to understand

and complete with material lists and where to get them. I am looking forward to building one soon. Dean Cardin For anyone wanting to build their own solar collector, this is a great tool. Like others have said, follow the directions with respect to the materials specified. BigBear Fortitude Graphic Arts Books A little bit of this, a little bit of that. Shit, Niggas need to know!

the field of
construction
history,
covering
themes such
as: - Building

actors -
 Building materials -
 The process of building -
 Structural theory and analysis -
 Building services and techniques -
 Socio-cultural aspects -
 Knowledge transfer - The discipline of Construction History The papers cover various types of buildings and structures, from ancient times to the 21st century, from all over the world. In addition, thematic papers address

specific themes and highlight new directions in construction history research, fostering transnational and interdisciplinary collaboration. Building Knowledge, Constructing Histories is a must-have for academics, scientists, building conservators, architects, historians, engineers, designers, contractors and other professionals involved or interested in the field of

construction history. This is volume 1 of the book set.

The Orchards Meet the Apricots CRC Press
 YOU CAN BUILD IT is a new ongoing series of instruction books on the art of LEGO® custom building, from the producers of BRICKJOURNAL magazine!
 Spinning off from BrickJournal's popular "You Can Build It" column, these FULL-COLOR books are loaded with nothing but

STEP-BY-STEP INSTRUCTION S by some of the top custom builders in the LEGO fan community. BOOK ONE is for beginning-to-intermediate builders, and features instructions for custom creations including Miniland figures, a fire engine, Christmas ornaments, a street vignette, plus miniscale models from "a galaxy far, far away," and more! So if you're ready to go beyond

the standard LEGO sets available in stores and move into custom building with the bricks you already own, this ongoing series will quickly take you from novice to expert builder, teaching you key building techniques along the way! Creative Stress Createspace Independent Publishing Platform What can you make from junk you throw away? Join the ScrapKins, a

crafty monster family who live in a recycling center, as they give step by step instructions to turn towel tubes and milk cartons into pirate ships, bird feeders, dinosaurs and more! Share a project with your kids with true DIY fun at home! Perfect for teachers, school classrooms, afterschool programs, babysitters, caretakers, homeschool, parties. MADE IN USA For Ages 6-9 years "Scrapkins

was an exciting way for our students to actually experience the benefits of recycling while also using their imaginations to create the most wonderful art projects! Our students looked forward to art with Mr. Yanish and were highly invested in the artistic process. The Scrapkins program connects well with our first grade curriculum and gave our students

another outlet to express themselves at school. It was wonderful to see the looks of pride and accomplishment as all of our students successfully completed a project." Brianna Berkowitz, 1st Grade Teacher Lefferts Garden Charter School Brooklyn, NY Hammers Don't Build Houses Createspace Independent Publishing Platform Over 2 million copies sold worldwide! Be inspired to create and

build amazing models with your LEGO® bricks! The LEGO Ideas Book is packed full of tips from expert LEGO builders on how to make jet planes reach new heights, create fantastic fortresses, swing through lush jungles, have fun on the farm and send space shuttles out of this world! This awesome ideas book is divided into six themed chapters - transport, buildings, space,

kingdoms, adventure, and useful makes - to inspire every member of the family to get building. With over 500 models and ideas, this book is perfect for any LEGO fan - young or young at heart - who want to make their models cool, fun and imaginative.

June 2014 This

version March 2015 Set in the 1980's most of the drama for this time traveling adventure is set in the Pitt Rivers Museum Oxford UK. Lilly's family has an extraordinary secret, one they have kept for four generations. Lilly's proud to be different and special. At Halloween she's happy to stay at home and cast spells with her mum and her Grandmother rather than go out trick or treating like the other kids.

At 12 years old, she thinks she knows it all. But then Lilly becomes unsettled by odd events, like seeing the sinister man in the white shoes staring at her while she walks the dogs, and then local children start to go missing. When her mum doesn't come back from one of her regular night-time jaunts, Lilly's grandmother thinks it's time to tell her the whole story. Lilly has second thoughts about whether

her family's secret is a blessing, or a curse...
Build Your Own LEGO Town!
 No Starch Press
 "Imagine...living in a home that cost you nothing to heat or cool, building this home yourself, growing your own vegetables year round in this home, no utility bills, easily available 'limitless natural resources' to build this type of home, a more earth friendly civilization..." -
