Distributed Systems Cambridge University Press

Distributed Systems: An Algorithmic Approach, Second Edition provides a balanced and straightforward treatment of the underlying theory and practical applications of distributed computing. As in the previous version, the language is kept as unobscured as possible—clarity is given priority over mathematical formalism. This easily digestible text: Features significant updates that mirror the phenomenal growth of distributed systems Explores new topics related to peer-to-peer and social networks Includes fresh exercises, examples, and case studies Supplying a solid understanding of

the key principles of distributed computing and their relationship to real-world applications, Distributed Systems: An Algorithmic Approach, Second Edition makes both an ideal textbook and a handy professional reference.

Contextual Teaching and Learning

Corwin Press

In India, a country of enormous historical importance as it is, historical writings, in the modern sense of historiography, started only with Kalhana (12th cent), the celebrated author of Rajatarangini. Since then a considerable number of works serving the purpose of history have been written in various languages, e.g. Sanskrit, Persian, Hindi, etc. From the middle of the nineteenth century, along with the emergence of modern India, an ardent desire to know the glorious past of the motherland was felt and within a few

decades rose a school of Indian scholar who wrote valuable monographs on diverse aspects of ancient Indian history and civilization. The present work is an elegant product of this school, a bold step to the abovementioned direction. It is a collection of a series of six lectures delivered at the Patna University in 1922. It deals with Magadha, major part of present Bihar, most important centre of cultural, political and socio-economic mobilizations in ancient and medieval India. It played a major role in the socio-political and cultural life of the rest of the country. Glories of Magadha virtually presents the glories of the then India. In spite of his strong nationalistic impulses, the learned author has taken great pain to restrain his emotions which otherwise might have desisted him from the responsibility of a historian. He has supported his view with

all available documents and at some places has carried on scholarly polemics. The work elaborately present : Magadha as gleaned from the Vedas, Puranas, Buddhists and Jaina classics, accounts of the Greek and Chinese travelers; pre-Aryan civilization in Mithila; Brahmanism, Buddhism, Jainism and Islam in Magadha; rule of the dynasties like Nandas, mauryas, Sungas, Kanvas, Andhras, Kusanas, Guptas and Palas. Muslim invasion and fall of Magadha; its capitals: Vaisalt, Rajagrha and Pataliputra; analysis of the edicts of Asoka; universities of Nalanda Vikramasila and Odantapura. Apart from the historical importance, it will be of great use to the scholars and average students engaged in the study of the educational system in ancient and medieval India. The work is profusely illustrated and contains useful bibliography.

A dictionary of contemporary Newari Asian Educational Services

Contextual teaching and learning (CTL) is a system for teaching that is grounded in brain research. Brain research indicates that we learn best when we see meaning in new tasks and material, and we discover meaning when we are able to connect new information with our existing knowledge and experiences. Students learn best, according to neuroscience, when they can connect the content of academic lessons with the context of their own daily lives. Johnson discusses the elements of the brain-compatible contextual teaching and learning system: making meaningful connections; investing school work with significance; self-regulated learning; collaboration; critical and creating thinking; nurturing the individual; reaching high standards; and using authentic assessment. Drawing on the practices of teachers in kindergarten through university, Johnson provides numerous examples of how to use each part of the CTL system.

A wholesome and uniform Materia Media has been a fond dream, but an elusive goal, for men of Ayurveda since long, largely due to the widespread disagreement over the choice of herbal sources of various drugs and also due to the persistent indifference of practitioners towards the problem. Even those people who are highly concerned about the rot have been groping in the dark as to the ways and means of getting out of the present quagmire.

The Gopālarājavamśāvalī Cambridge University Press

This 1966 book provides a series of concise, accessible essays reflecting on the development of Persian fiction during the modern period. The structure of the text is broadly chronological, with chapters allocated to key authors, literary movements, and social changes. This is a valuable volume for anyone interested in Persian literature.

Coding Theory Studies in Modern German Literature

Brilliantly comic and almost unbearably moving, Jerry Pinto's *Em and the Big Hoom* is one of the most powerful and original fiction debuts of recent years. She was always *Em* to us. There may have been a time when we called her something ordinary like *Mummy*, or *Ma*, but I don't remember. She was *Em*, and our father, sometimes, was the *Big Hoom*. In a tiny flat in Bombay Imelda Mendes - *Em* to her children - holds her family in thrall with her flamboyance, her manic affection and her cruel candour. Her husband - to whom she was once 'Buttercup' - and her two children must bear her 'microweathers', her swings from laugh-out-loud joy to dark malevolence. In *Em and the Big Hoom*, the son begins to unravel the story of his parents: the mother he loves and hates in the same moment and the unusual man who courted, married and protected her - as much from herself as from the world. 'It is utterly persuasive and deeply affecting: stylistically adventurous it is never self-indulgent; although suffused with pain it shows no trace of self-pity. Parts of it are extremely funny, and its pages are filled with endearing and eccentric characters' Amitav Ghosh 'Pinto chases the elusive portrait of a mother who simply said of herself that she was mad. As I read this novel, that also portrays a very tender marriage and the life of a Goan family in Bombay, it drowned me. I mean that in the best way. It plunged me into a world so vivid and capricious, that when I finished, I found something had shifted and changed within myself. This is a world of magnified and dark emotion. The anger is a primal force, the sadness wild and raw. Against this, the jokes are hilarious, reckless, free falling This is a rare, brilliant book, one that is wonderfully different from any other that I have read coming out of India' Kiran Desai 'A child's-eye view of madness and sorrow, full of love, pain, and,

unaccountably, much wild comedy. ne of the very best books to come out of India in a long, long time' Salman Rushdie Jerry Pinto has been a mathematics tutor, school librarian and journalist and is now associated with Meljoi, an NGO that works in the sphere of child rights. He has edited several anthologies including, most recently, an anthology on his native city, Mumbai.

BIOINFORMATICS Gyan Books

The latest edition of this classic is updated with new problem sets and material The Second Edition of this fundamental textbook maintains the book's tradition of clear, thought-provoking instruction. Readers are provided once again with an instructive mix of mathematics, physics, statistics, and information theory. All the essential topics in information theory are covered in detail, including entropy, data compression, channel capacity, rate distortion, network information theory, and hypothesis testing. The authors provide readers with a solid understanding of the underlying theory and applications. Problem sets and a telegraphic summary at the end of each chapter further assist readers. The historical notes that follow each chapter recap the main points. The Second Edition features: * Chapters reorganized to improve teaching * 200 new problems * New material on source coding, portfolio theory, and feedback capacity * Updated references Now current and enhanced, the Second Edition of *Elements of Information Theory* remains the ideal textbook for upper-level undergraduate and graduate courses in electrical engineering, statistics, and telecommunications.

Female Ascetics in Hinduism Motilal Banarsidass

Development urbanism is an interdisciplinary field that focuses on sustainable urban development as a means to combat poverty and protect the environment in the so-called "developing" world. Based on his experiences teaching, researching and practicing in India, the author discusses some of the problems related to the urban transition of India, including the air pollution, the contamination and depletion of fresh water resources, the precarious food situation, the lack of proper housing, and various environmental and human health problems related to motorized transportation. He also proposes a number of possible solutions, including the use of plants and natural ventilation to create clean indoor air, the revitalization of an existing system of water canals, the creation of vertical kitchen gardens in a rehabilitation colony, a strategy for

making an entire neighborhood car-free and a design for self-designed, low-cost housing.

Selected Papers on Comparative Tai Studies U of M Center for South East Asian Studi

Some justification seems to be necessary for the addition of yet another History of Iranian Literature to the number of those already in existence. Such a work must obviously contain as many novel features as possible, so that a short explanation of what my collaborators and I had in mind when planning the book is perhaps not superfluous. In the first place our object was to present a short summary of the material in all its aspects, and secondly to review the subject from the chronological, geo graphical and substantial standpoints - all within the compass of a single volume. Such a scheme precludes a formal and complete enumeration of names and phenom ena, and renders all the greater the obligation to accord most prominence to matters deemed to be of greatest importance, supplementing these with such figures and forms as will enable an impression to be gained of the period in question - all this is far as possible in the light of the most recent discoveries. A glance at the table of contents will suffice to give an idea of the multifarious approach that has been our aim. We begin at the very first traces of evidence bearing on our subject and continue the narrative up to the present day. Geographically the book embraces Iran and its neighbouring countries, while it should be remarked that Iranian literature in its fullest sense also includes Indo-Persian and Judeo-Persian works.

Coding theory is concerned with successfully transmitting data through a noisy channel and correcting errors in corrupted messages. It is of central importance for many applications in computer science or engineering. This book gives a comprehensive introduction to coding theory whilst only assuming basic linear algebra. It contains a detailed and rigorous introduction to the theory of block codes and moves on to more advanced topics like BCH codes, Goppa codes and Sudan's algorithm for list decoding. The issues of bounds and

decoding, essential to the design of good codes, features prominently. The authors of this book have, for several years, successfully taught a course on coding theory to students at the National University of Singapore. This book is based on their experiences and provides a thoroughly modern introduction to the subject. There are numerous examples and exercises, some of which introduce students to novel or more advanced material.

History of Iranian Literature Franz Steiner Verlag Wiesbaden GmbH

In this book the author has first investigated the concept of the devadasi as found in the cultural history of South India, especially in Tamil Nadu. Hereafter the function and form of the devadasi tradition are examined within the Temple Ritual of Tamil Nadu. This is not the study of the fact of the devadasi tradition, but of its meaning and the mode of production of that meaning.

The Borrowers CRC Press

Selected short stories by a 20th century Bengali author.

Vedic Physics John Wiley & Sons

The Borrowers live in the secret places of quiet old houses; behind the mantelpiece, inside the harpsichord, under the kitchen clock. They own nothing, borrow everything, and think that human beings were invented just to do the dirty work. Arrietty's father, Pod, was an expert Borrower. He could scale curtains using a hatpin, and bring back a doll's teacup without breaking it. Girls weren't supposed to go borrowing but as Arrietty was an only child her father broke the rule, and then something happened which changed their lives. She made friends with the human boy living in the house...

The Indigenous Drugs of India CBS

Publishers & Distributors Pvt Limited, India
Vermiculture and organic farming has attracted the attention on naturalists, ecologists and workers in applied sciences such as Agriculture, Pest Management, Horticulture, Sericulture etc., at global scenario. Agricultural chemicals increase tremendous pressure on agroecosystem. Increasing use of chemical fertilizers and pesticides lead to serious problems in agroecosystem such as air, water and soil pollution, pest resistance, pest resurgence, secondary pest out break, killing of beneficial and non target

organisms, destruction of ecocycles and endemic soil fauna, drying of soil, etc. The use of biofertilizers, vermicompost, biological pest control technique will certainly add great relevance in solving the above problems. Therefore, in the present book, attempts have been made on Vermiculture and Vermicomposting, Biofertilizers and their Production and Production of Biological Pest Control Agents. Importance of biofertilizers, species diversity, applications and production technique for Rhizobium, Azotobacter, Azolla, Blue-green algae, Mycorrhizae, Azospirillum, Green manure, Organic composting have been described under the chapter Biofertilizers and their Production, while, under the chapter production of biological pest control agents, emphasis is given on the importance of biological pest control technique and mass production techniques of various BCA such as Trichogramma, Chilonus blackburni, Cryptolaemus montrouzieri and Crysoperla carnea. This book is need of modern agriculture and useful guide to naturalist, students, teachers, farmers, researchers and industrialist. Contents Chapter 1: Vermiculture and Vermicomposting; Chapter 2: Biofertilizers and their Production; Phosphate solubilizing microorganisms, Rhizobium production, Azotobacter production, Azospirillum production, Blue green algae (BGA) production, Azolla production, Mycorrhiza production, Green manure, Organic matter and composting; Chapter 3: Production Techniques for Biological Pest Control Agents; Mass production technique for trichogramma, Mass production technique for chelonus blackburni, Mass production technique for cryptolaemus montrouzieri, Mass production technique for chrperla carnea.

A History of Prostitution from Antiquity to the Present Day A Puffin Book

The present book comprises of two sections, A and B. Section A has the text of the lectures during the Training Course in Ethnobotany, and the section B has some of the material and exercise handled by the trainees during the Workshop and in practical classes. The sequence of the lectures has been so arranged as to gradually and step by step introduce the scope, methodology, and applications of the subject along with the subjects of preparation of scientific papers and research projects. This book will not only popularize the important subject of Ethnobotany but will also provide basic instructions for person freshly interested or inducted into this discipline.
