Perspectives: Year 2

(Haralambos and Holborn AQA A Level Sociology) Springer

Drawing on interdisciplinary, cross-national perspectives, this open access book contributes to the development of a coherent scientific discourse on social exclusion of older people. The book considers five domains

of exclusion (services; economic; social relations; civic and socio-cultural; and community and spatial domains), with three chapters dedicated to analysing different dimensions of each exclusion domain. The book also examines the interrelationships between different forms of exclusion, and how outcomes and processes of different kinds of exclusion can be related to one another. In doing so, major cross-cutting themes, such as rights and identity, inclusive service infrastructures, and displacement of marginalised older adult groups, are considered. Finally, in a series of chapters written by international policy stakeholders and policy researchers, the book analyses key

policies relevant to social exclusion and older people, including debates linked to sustainable development, EU policy and social rights, welfare and pensions systems, and planning and development. The book's approach helps to illuminate the comprehensive multidimensionality of social exclusion, and provides insight into the relative nature of disadvantage in later life. With 77 contributors working across 28 nations, the book presents a forward-looking research agenda for social exclusion amongst older people, and will be an important resource for students, researchers and policy stakeholders working on ageing.

The preparation, serving and eating of food are common features of all human societies, and have been the focus of study for numerous anthropologists - from

Sir James Frazer onwards - from a variety of theoretical and empirical perspectives. It is in the context of this previous anthropological work that Jack Goody sets his own observations on cooking in West Africa. He criticises those approaches which overlook the comparative historical dimension of culinary, and other, cultural differences that emerge in class societies, both of which elements he particularly emphasises in this book. The central question that Professor Goody addresses here is why a differentiated 'haute cuisine' has not emerged in Africa, as it has in other parts of the world. His account of cooking in West

Africa is followed by a survey of the culinary practices of the major Eurasian societies throughout history - ranging from Ancient Egypt, Imperial Rome and medieval China to early modern Europe - in which he relates the differences in food preparation and consumption emerging in these societies to differences in their socio-economic structures, specifically in modes of production and communication. He concludes with an examination of the world-wide rise of 'industrial food' and its impact on Third World societies, showing that the ability of the latter to resist cultural domination in food, as in other things, is related to the nature of their pre-existing socio-economic structures.

The arguments presented here will interest all social scientists and historians concerned with cultural history and social theory.

Sociology of Interdisciplinarity

Collins

The sociology of sport is a core discipline within the academic study of sport. It helps us to understand what sport is and why it matters. Sociological knowledge, implicit or explicit, therefore underpins scholarly enquiry into sport in every aspect. The Routledge Handbook of the Sociology of Sport is a landmark publication that brings together the most important themes, theories and issues within the sociology of sport, tracing the contours of the discipline and surveying the state-of-the-art. Part One explores the main theories and analytical approaches that define contemporary sport

sociology and introduces the most important methodological issues confronting researchers working in the social scientific study of sport. Part Two examines the connections and divisions between sociology and cognate disciplines within sport studies, including history, anthropology, economics, leisure and tourism studies, philosophy, politics and psychology. Part Three investigates how the most important social divisions within sport, and in wider society, are addressed in sport sociology, including 'race', gender, class, sexuality and disability. Part Four explores a wide range of pressing contemporary issues associated with sport, including sport and the

body, social problems associated with sport, sport places and settings, and the global aspects of sport.

Written by a team of leading international sport scholars, including many of the most well-known, respected and innovative thinkers working in the discipline, the Routledge Handbook of the Sociology of Sport is an essential reference for any student, researcher or professional with an interest in sport.

Sport, Mental Illness and Sociology John Wiley & Sons

This edited collection explores Positive Sociology of Leisure (PSL) as a subfield relating to leisure studies, sociology of leisure, and sociology of happiness. Defined

as an area of research that examines social aspects of leisure life with a focus on the optimal functioning of relationship, group, community, organization, and other social units, PSL differs from more critical forms of sociology in that its starting point is social positives. The contributions draw on a range of diverse disciplinary backgrounds to consider various meanings of leisure across themes such as: ageing; sex, sexuality and family; community, youth, and education; and arts and creativity. Positive Sociology of Leisure will be a key reference within the field of sociology of leisure, as well as an important introductory book for those interested in

leisure studies.

consequences for those involved in interdisciplinary research, which has been advocated as the zenith of research practice for many years, quite often in direct response to questions that cannot be answered (or even preliminarily investigated) by disciplines working separately. It produces fresh insights into the lived experiences and actual contents of interdisciplinarity, rather than simply commentating on how it is being explicitly advocated. We present empirical studies on large-scale energy research projects from the United Kingdom, Norway, and Finland. The book presents a new framework, the Sociology of Interdisciplinarity,

which unpacks interdisciplinary research in practice. This book will be of interest to all those interested in well-functioning interdisciplinary research systems and the dynamics of doing interdisciplinarity, including real ground-level experiences and institutional interdependencies.
