Daodejing Harper Collins
"The son of a prominent Japanese mathematician who came to the United States after World War II, Ken Ono was raised on a diet of high expectations and little praise. Rebelling against his pressure-cooker of a life, Ken determined to drop out of high school to follow his own path. To obtain his father's approval, he invoked the biography of the famous Indian mathematical prodigy Srinivasa Ramanujan, whom his father revered, who had twice flunked out of college because of his single-minded devotion to mathematics. Ono describes his rocky path through college and graduate school, interweaving Ramanujan's story with his own and telling how at key moments, he was inspired by Ramanujan and guided by mentors who encouraged him to pursue his interest in exploring Ramanujan's

mathematical legacy. Picking up where others left off, beginning with the great English mathematician G.H. Hardy, who brought Ramanujan to Cambridge in 1914, Ono has devoted his mathematical career to understanding how in his short life, Ramanujan was able to discover so many deep mathematical truths, which Ramanujan believed had been sent to him as visions from a Hindu goddess. And it was Ramanujan who was ultimately the source of reconciliation between Ono and his parents. Ono's search for Ramanujan ranges over three continents and crosses paths with mathematicians whose lives span the globe and the entire twentieth century and beyond. Along the way, Ken made many fascinating discoveries. The most important and surprising one of all was his own humanity."

Revised and updated with the latest scientific research and updated case studies, the business classic that offers a revealing look at psychopaths in the workplace—how to spot their destructive behavior and stop them from creating chaos in the modern corporate organization. Over the past decade, *Snakes in Suits* has become the definitive book on how to discover and defend yourself against psychopaths in the office. Now, Dr. Paul Babiak and Dr. Robert D. Hare return

with a revised and updated edition of their essential guide. All of us at some point have—or will—come into contact with psychopathic individuals. The danger they present may not be readily apparent because of their ability to charm, deceive, and manipulate. Although not necessarily criminal, their self-serving nature frequently is destructive to the organizations that employ them. So how can we protect ourselves and our organizations in a business climate that offers the perfect conditions for psychopaths to thrive? In *Snakes in Suits*, Hare, an expert on the scientific study of psychopathy, and Babiak, an industrial and organizational psychologist and a leading authority on the corporate psychopath, examine the role of psychopaths in modern corporations and provide the tools employers can use to avoid and deal with them. Together, they have developed the B-Scan 360, a research tool designed specifically for business professionals. Dr. Babiak and Dr. Hare reveal the secret lives of psychopaths, explain the ways in which they manipulate and deceive,

and help you to see through their games. The rapid pace of today's corporate environment provides the perfect breeding ground for these "snakes in suits" and this newly revised and updated classic gives you the insight, information, and power to protect yourself and your company before it's too late.

Changing the Game Wave
Books

"A major contribution to the study of global events in times of global media. *Owning the Olympics* tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover." —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by

broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the "New China"—a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities—including the Chinese Communist Party itself—seek to influence and control the narratives

through which the Beijing Games will be understood.

Eschewing series and performative typography, Douglas Kearney's *Sho* aims to hit crooked licks with straight-seeming sticks. Navigating the complex penetrability of language, these poems are sonic in their espousal of Black vernacular traditions, while examining histories, pop culture, myth, and folklore. Both dazzling and devastating, *Sho* is a genius work of literary precision, wordplay, farce, and critical irony. In his "stove-like imagination," Kearney has concocted poems that destabilize the spectacle, leaving looky-loos with an important uncertainty

about the intersection between violence and entertainment.

The Norton Field Guide to Writing Penguin

Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS, this New York Times bestseller is "an extraordinary achievement" (The New Yorker)—a magnificent, profoundly humane "biography" of cancer—from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure, control, and conquer it to a radical new understanding of its essence. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist's precision, a historian's perspective, and a biographer's passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of

discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out "war against cancer." The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, *The Emperor of All Maladies* provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

If you struggle with low self-esteem, or you're seeking positive and effective ways of building a healthy sense of self-worth, this much-anticipated fourth edition of the best-selling classic by Matthew McKay is your go-to guide. This fully revised edition features an innovative application of acceptance and commitment therapy (ACT) to self-esteem, and utilizes updated cognitive behavioral therapy (CBT) to help you create positive change and thrive. Circumstances and

status can affect self-esteem—many factors can contribute to the way we see ourselves—but the one contributing factor that all people who struggle with low self-esteem have in common is our thoughts. Of course we all have a better chance of feeling good about ourselves when things are going well, but it's really our interpretation of our circumstances that can cause trouble, regardless of what they are. This revised and updated fourth edition of the best-selling *Self-Esteem* uses proven-effective methods of CBT and relevant components of ACT to help you raise low self-esteem by working on the way you interpret your life. You'll learn how to differentiate between healthy and unhealthy self-esteem, how to uncover and analyze negative self-statements, and how to create new, more objective and positive self-statements to support your self-esteem rather than undermine it. And with cutting-edge material on defusion and values, you'll learn to let go of judgmental, self-attacking thoughts and act in accordance with what matters to you most, enhancing your sense of

self-worth. If you struggle with low or unhealthy self-esteem, this new edition of *Self-Esteem*, packed with evidence-based tips and techniques, has everything you need to improve the way you see yourself for better overall well-being.

Changing the Game is set at a fictional university in the mid-1990s. A debate over the role of athletics quickly expands to encompass demands that women's sports and athletes receive more resources and opportunities. The result

is a firestorm of controversy on and off campus. Drawing on congressional testimonies from the Title IX hearings, players advance their views in student government meetings, talk radio shows, town meetings, and impromptu rallies. As students wrestle with questions of gender parity and the place of athletics in higher education, they learn about the implementation—and implications—of legal change in the United States.

"Fundraising has a major problem facing its sustainability, and it has nothing to do with the charitable tax deduction, with the transfer of wealth, or with the new generation of donors -- the millennials. It has everything to do with donor retention. Average donor retention rates for first time donors hover at a dismal less than 30% rate. Yet a focus on acquisition cannot be the whole solution -- not when studies reveal that donor acquisition costs seven times as much as retention. It's more cost effective to keep the donors an organization has than to chase new

ones. A well-executed, strategic donor relations program is key to successful fundraising. In this book, Lynne Wester of Donor Relations Guru® helps you rethink donor relations practices and offers specific tips for more powerful acknowledgements, stewardship and impact reporting, recognition, and donor engagement."-- Publisher's website.

"The Knowledge Illusion is filled with insights on how we should deal with our individual ignorance and collective wisdom."

—Steven Pinker We all think we know more than we actually do. Humans have built hugely complex societies and technologies, but most of us don't even know how a pen or a toilet works. How have we achieved so much despite

understanding so little? Cognitive scientists Steven Sloman and Philip Fernbach argue that we survive and thrive despite our mental shortcomings because we live in a rich community of knowledge. The key to our intelligence lies in the people and things around us. We're constantly drawing on information and expertise stored outside our heads: in our

bodies, our environment, our possessions, and the community with which we interact—and usually we don't even realize we're doing it. The human mind is both brilliant and pathetic. We have mastered fire, created democratic institutions, stood on the moon, and sequenced our genome. And yet each of us is error prone, sometimes irrational, and often ignorant. The fundamentally communal nature of intelligence and knowledge explains why we often assume we know more than we really do, why political opinions and false beliefs are so hard to change, and why individual-oriented approaches to education and management frequently fail. But our collaborative minds also enable us to do amazing things. The Knowledge Illusion contends that true genius can be found in the ways we create intelligence using the community around us.
