## JOSHUA KASEY

**Copenhagen** Independently Published  
 Shivya Nath quit her corporate job at age twenty-three to travel the world. She gave up her home and the need for a permanent address, sold most of her possessions and embarked on a nomadic journey that has taken her everywhere from remote Himalayan villages to the Amazon rainforests of Ecuador. Along the way, she lived with an indigenous Mayan community in Guatemala, hiked alone in the Ecuadorian Andes, got mugged in Costa Rica, swam across the border from Costa Rica to Panama, slept under a meteor shower in the cracked salt desert of Gujarat and learnt to conquer her deepest fears. With its vivid descriptions, cinematic landscapes, moving encounters and uplifting adventures, *The Shooting Star* is a travel memoir that maps not just the world but the human spirit.

- The ultimate insider's guide to Copenhagen - Features interesting and unusual places not found in traditional travel guides - Part of the international 111 Places/111 Shops series with over 250 titles and 1.5 million copies in print worldwide - Appeals to both the local market (more than 600,000 people call Copenhagen home) and the tourist market (more than 8.5 million people visit Copenhagen every year!) - Fully illustrated with 111 full-page color photographs Surrounded by water, Copenhagen is a well-loved destination for travelers, but it is also a very popular place to live among Danes. This new city guide has something to offer both, taking in overlooked and inconspicuous places that lie outside the usual mainstream attention. Jan Gralle and Vibe Skytte present an alternative vision of their city, opening up insights to special and forgotten places. Many of the locations described in the book are outside, which is largely down to the Copenhageners love of spending time outdoors. As soon as the sun peaks out from behind the clouds, everyone flocks to the harbor, to the water, onto the many enchanting squares and the numerous street cafés. This book is an invitation to both locals and visitors to drift, to explore the city from new perspectives and allow themselves to be seduced by its variety and its charm.

With 29 percent of all trips made by bicycle, Copenhagen is considered a model of green transport. This book considers the underlying political conditions that enabled cycling to appeal to such a wide range of citizens in Copenhagen and asks how this can be replicated elsewhere. Despite Copenhagen's global reputation, its success has been a result of a long political struggle and is far from completely secure. Car use in Denmark is increasing, including in Copenhagen's suburbs, and new developments in Copenhagen include more parking for cars. There is a political tension in Copenhagen over the spaces for cycling, the car, and public transit. In considering examples of backlashes and conflicts over street space in Copenhagen, this book argues that the kinds of debates happening in Copenhagen are very similar to the debates regularly occurring in cities throughout the world. This makes Copenhagen more, not less, comparable to many cities around the world, including cities in the United States. This book will appeal to upper-level undergraduates and graduates in urban geography, city planning, transportation, environmental studies, as well as transportation advocates, urban policy-makers, and anyone concerned about climate change and looking to identify paths forward in their own cities and localities.

**Copenhagen, the Old Historical City, Etc** Taylor & Francis

The book develops a new approach to urban development in which leisure, pleasure or experiences are seen as key drivers. History, authenticity, urban qualities, local culture and leisure offerings or a vibrant retail sector are thus assets in local development also outside of the big cities. Globalization and high mobility are necessary aspects of the development, which entails the development of high urban profiles in a globalized and highly competitive world. Apart from experiential qualities a critical urban size, is also required. Experience qualities can be connected to urban design, where particular designs stimulate citizens' learning and activity in the urban space. They can also be connected to more tourist related large scale projects of experiential mass consumption with fun parks and shopping. A combination of the two approaches has been developed to promote for example car brands and cities through experiential car museums. New stakeholders, new network based forms of cooperation and new entrepreneurial strategies are connected to urban development in 'the experience economy'. In particular new network based approaches are needed if small and rural places should also reap the fruits of the experience economy. This book was originally published as a special issue of European Planning Studies.

Guilty. One word on a beggar's cardboard sign. And now he is dead, stabbed in a wintry Copenhagen street, the second homeless victim in as many weeks. Dagbladet reporter Jensen, stumbling across the body on her way to work, calls her ex lover DI Henrik Jungersen. As, inevitably, old passions are rekindled, so are old regrets, and that is just the start of Jensen's troubles. The front page is an open goal, but nothing feels right..... When a third body turns up, it seems certain that a serial killer is on the loose. But why pick on the homeless? And is the link to an old murder case just a coincidence? With her teenage apprentice Gustav, Jensen soon finds herself putting everything on the line to

discover exactly who is guilty ... Hugely compelling debut thriller from leading BBC R4 story writer. Translation rights sold in Denmark and Germany. Audio sold UK

**Pocket Rough Guide Copenhagen (Travel Guide)** Island Press

Named a Best Book of the Year by NPR and Science Friday A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

**Living Pictures, Missing Persons** Penguin Random House India Private Limited

This book examines a rapidly emerging new topic in urban settlement patterns: the role of shrinking cities. Much coverage is given to declining fertility rates, ageing populations and economic restructuring as the factors behind shrinking cities, but there is also reference to resource depletion, the demise of single-company towns and the micro-location of environmental hazards. The contributions show that shrinkage can occur at any scale - from neighbourhood to macro-region - and they consider whether shrinkage of metropolitan areas as a whole may be a future trend. Also addressed in this volume is the question of whether urban shrinkage policies are necessary or effective. The book comprises four parts: world or regional issues (with reference to the European Union and Latin America); national case studies (the United States, India, China, Korea, Taiwan, Germany, Romania

and Estonia); city case studies (Detroit, Buffalo, Cleveland, Naples, Belfast and Halle); and broad issues such as the environmental consequences of shrinking cities. This book will be of interest to scholars and practitioners working in the fields of urban studies, economic geography and public policy.

*Time Out Copenhagen* gives the lowdown on where to go and what to see in this most civilised of cities. With the help of local experts, the guide takes you beyond the clichés - into the neighbourhoods of Vesterbro, Nørrebro, Østerbro and Frederiksberg, where most Copenhageners live and go out, sampling the full extent of its museums, restaurants, cafés and shops. Copenhagen is still celebrated for its historic royal palaces and mid-century design, but it's now taken on a new identity as the style, gastronomic and green capital of Europe.

*And Now to Denmark* Routledge

Kerrigan is writing a guide book to his adopted city of Copenhagen. Specifically, a guide to the city's drinking establishments-of which there are more than 1,500. Thus, it is a project potentially without end, and one with a certain amount of numbness built into it, through countless drinks imbibed. And that is part of the point: for Kerrigan, an American expat fleeing a brutal family tragedy, has plenty he wants to numb. The only problem with his project is his research associate, a voluptuous, green-eyed gal who makes him tremble with forgotten desire. Kerrigan in Copenhagen is a love story. It is also a deeply human, Joycean romp through a magical city-its people, history, literature, and culture-giving Copenhagen its literary due and establishing Kennedy as a tremendously gifted novelist.
