As the single most populous nation in Africa, Nigeria recently overtook South Africa as the largest economy on the continent. Natural resources, oil and gas in particular, comprise the country's single largest revenue-earner but the 170m person economy also has seen significant activity in recent years into the industrial, financial, telecoms and - as of 2013 - power sectors. Hydrocarbons reserves have traditionally attracted the vast majority of domestic and foreign investment in Nigeria. Oil production capacity has remained at roughly 2.5m barrels per day (bpd) since the start of 2000, although output fell to 2.2m bpd on average in 2012. Still, the country has long operated below its true potential and government efforts in recent years have sought to increase local value addition, by boosting refining capacity and minimising theft and bunkering. The country's banking sector has been through a significant shake-up as well, resulting in a far healthier and more robust financial industry, while reforms in the telecoms and

agricultural sectors have strengthened medium-term prospects.

The prodigious economic growth of India and China over the last three decades has ensured their rightful prominence in the global economic order. The two players opened up their respective economies to liberalization and market regulations, which led to a tectonic shift from agriculture-based economies to manufacturing and service-based economies. In this context, Comparative Development of India and China offers contemporary research on economic, technological, sectoral and sociocultural issues by highlighting the opportunities as well as vulnerabilities in the development of the two fastest growing nations in the world. It unveils the similarities of thought and practices, and explores the plethora of possibilities for collaborative effort that may serve to contribute to the prosperity and progress of both the countries. The perspectives presented by various Indian and Chinese scholars in this edited volume provide varied outlooks and insights on these two nations, albeit within a single thematic framework.

"Startup India, Stand-up India" "Can India be a 'Startup Capital'?" Can the youth in the states have the opportunities in the form of start-ups, with innovations, whether it be manufacturing, service sector or agriculture? --- Narendra Modi, Prime Minister of India Startup India Stand up Our Prime Minister unveiled a 19-point action plan for start-up enterprises in India. Highlighting the importance of the Standup India Scheme, Hon'ble Prime minister said that the job seeker has to become a job creator. Prime Minister announced that the initiative envisages loans to at least two aspiring entrepreneurs from the Scheduled Castes, Scheduled Tribes, and Women categories. It was also announced that the loan shall be in the ten lakh to one crore rupee range. A startup India hub will be created as a single point of contact for the entire startup ecosystem to enable knowledge exchange and access to funding. Startup India campaign is based on an action plan aimed at promoting bank financing for start-up ventures to boost entrepreneurship and encourage startups with jobs creation. Startup India is a flagship initiative of the Government of India, intended to build a strong ecosystem for nurturing innovation and Startups in the country. This will drive sustainable economic growth and generate large scale employment opportunities. The Government, through this initiative aims to empower Startups to grow through innovation and design. What is Startup India offering to the Entrepreneurs? Stand up India backed up by Department of Financial Services (DFS) intends to bring up Women and SC/ST entrepreneurs. They have planned to support 2.5 lakh borrowers with Bank loans (with at least 2 borrowers in both the category per branch) which can be returned up to seven years. PM announced that "There will be no income tax on startups' profits for three years" PM plans to reduce the involvement of state government in the startups so that entrepreneurs can enjoy freedom. No tax would be charged on any startup up to three years from the day of its establishment once it has been approved by Incubator. India Government is promoting finance for start-up ventures and providing incentives to further boost entrepreneurship, manufacturing and job creation. The correct choice of business is an extremely essential step in the process of 'being your own boss'. This handbook contains few formulations of cosmetic products, properties and manufacturing process with flow diagrams of various products. After gathering the above information of products, the decision of choosing an appropriate one will no longer be a cumbersome process. The Fast-Moving Consumer Goods (FMCG) sector, also called the consumer packaged goods (CPG) sector, is one of the largest industries worldwide. As the purse strings tighten company costs need to be cut without this affecting performance or sales. A common solution to this problem is to restructure the organization of the company i.e. adjust the lines and boxes on the organization chart with the aim of setting it up for high performance. This inevitably fails because an organization is a system; change one aspect and other facets will also change. Organization Design: Engaging with change looks at how to (re) design the organizational system in order to increase productivity, performance and value; providing the knowledge and methodology to design an agile organization capable of handling the kind of continuous organizational change that all businesses face. The book clarifies why and how organizations need to be in a state of readiness to design or redesign and emphasizes that people as well as business processes must be part of design considerations. Responding to developments across the world since the first edition, this book covers, among other topics: Technology changes that have impacted upon organizations Increased demands for 'sustainability' and corporate social responsibility The pressure on organizations to be smarter, more efficient and more effective Whilst the material on this subject targets a wide management audience, this book is specifically written for consultants, OD/HR practitioners and line managers working together to achieve the goal of organizational redesign for changing circumstances. Aided by a range of pedagogical features, this book is a must-read for students or practitioners involved in the field of organizational design, development and change.

With the rapid development of cloud computing and digital transformation, well-designed cloud-based architecture is always in urgent need. Illustrated by project cases from the Chinese technology company Alibaba, this book elaborates how to design a cloud-based application system and build them on the cloud. Cloud computing is far from being just a resource provider; it offers database, storage and container services that can help to leverage key advantages for business growth. Based on this notion, authors from the Alibaba Cloud Global Technology Services introduce new concepts and cutting-edge technology in the field, including cloud-native, high-availability and disaster tolerance design on cloud, business middle office, data middle office, and enterprise digital transformation. Resting upon Alibaba's years of practice and achievements in the field of cloud technology, the volume also elucidates the methodology and practice solutions of digital construction, including methodology, product tools, technical processes, architecture design, cloud application capacity assessment and optimization, etc. The book will appeal to researchers, students, and especially IT practitioners, professionals, and managers interested in cloud computing, digital transformation, cloud migration, business middle office, data middle office, as well as the Alibaba Cloud itself.

Supplying a product to the most customers possible in an effective and cost-efficient way is the primary goal of the sales and distribution sector of a business, since the profits from sales are responsible for the majority of an organization's revenue. However, with countless brands vying for the customers' attention, the ability to create a demand for a product and subsequently supply that demand is often the key to a business's success. There is a need for studies that seek to understand the complementary roles of an organization's sales force and distribution team to ensure relevancy in today's globalized world. Sales and Distribution Management for Organizational Growth is a pivotal reference source that provides vital research on the organization of sales and the sales force, their geographic deployment, and distribution and channel management including how to develop customer-oriented distribution systems. While highlighting topics including expense control, personnel training, and channel design, this book is ideally designed for business students, marketing professionals, executive members, finance analysts, operations employees, academicians, industry professionals, researchers, and students seeking current research on implementing sales strategy and distribution systems to maximize profits and remain a marketplace competitor.

While major strides need to be taken to promote inclusive growth, critical developments across the country's economy continue to heighten investor appetite. This was given a significant boost with the victory of Daw Aung San Suu Kyi's National League for Democracy (NLD) over the ruling Union Solidarity and Development Party (USDP) in the November 2015 national elections. The NLD is expected to build upon efforts taken by outgoing President U Thein Sein to improve transparency, promote peace and increase spending on health and education, which have to some degree alleviated the strain left behind by decades of military rule. With the incoming NLD administration expected to prioritise inclusive growth, the outlook for all segments of Myanmar's population is looking significantly more positive.
