The tale of the epic rivalry between two foundational paleontologists to find bigger and better bones in the American West, perfect for readers of Steve Sheinkin and Candace Fleming. Today we take for granted the idea that dinosaurs once roamed the earth. But two hundred years ago, the very concept of an extinct species did not exist. When an English scientist proposed

in 1841 that Dino Saur ("terrible lizards") had come and gone, it was only a theory, a new way of explaining the "dragon" and "giant" bones scattered across the globe. But when proof turned up seventeen years later, it was not only incontrovertible; it was massive. *Tooth and Claw* tells the story of the feverish race between two brilliant, driven, and insanelly competitive scientists--Edward Drinker Cope and Othniel Charles Marsh--to uncover more and more monstrous fossils in the newly opened Wild West. Between them, they discovered dozens of major dinosaur species and established the new discipline of paleontology in America. But their bitter thirty-year rivalry--a "war" waged on wild plains and mountains, in tabloid newsprint, and in Congress--dramatically wrecked their professional and private lives even as it brought alive for the public a vanished prehistoric world. "A woman on the run... Grace came to Longtooth, Alaska looking for a safe place to hide. All she wanted was to keep her head down, do her job, and enjoy the peace and quiet. But even as Bon's last remains are polished off, his sons and daughters must all jostle for a position in the new hierarchy. While the problem of evil remains a perennial challenge to theistic belief, little attention has been paid to the special problem of animal pain and suffering. This absence is especially conspicuous in our Darwinian era when theists are forced to confront the fact that animal pain and suffering has gone on for at least tens of millions of years, through billions of animal generations. Evil of this sort might not be especially problematic if the standard of explanations for evil employed by theists could be applied in this instance as well. But there is the central problem: all or most of the explanations for evil cited by theists seem impotent to explain the reality of animal pain and suffering through evolutionary history. *Nature Red in Tooth and Claw* addresses the evil of animal pain and suffering directly, scrutinizing explanations that have been offered for such evil.

Plenty of predators use their monstrous jaws and piercing claws to attack their prey, but many creatures wield these adaptations as defensive mechanisms, too. Readers may be surprised that an animal as cute as the red panda can fiercely protect itself from a snow leopard and that there's a kind of frog that can jab its

version of a bony claw through its skin. Every animal needs to have some kind of weapon if they want to survive in a wild world. Illustrative photographs, fun fact boxes, and a concluding graphic organizer support and enhance this high-interest volume.

Japan's monastic warriors have fared poorly in comparison to the samurai, both in terms of historical reputation and representations in popular culture. Often maligned and criticized for their involvement in politics and other secular matters, they have been seen as figures separate from the larger military class. However, as Mikael Adolphson reveals in his comprehensive and authoritative examination of the social origins of the monastic forces, political conditions, and warfare practices of the Heian (794-1185) and Kamakura (1185-1333) eras, these "monk-warriors"(sōhei) were in reality inseparable from the warrior class. Their negative image, Adolphson argues, is a construct that grew out of artistic sources critical of the established temples from the fourteenth century on. In deconstructing the sōhei image and looking for clues as to the characteristics, role, and meaning of the monastic forces, *The Teeth and Claws of the Buddha* highlights the importance of historical circumstances; it also points to the fallacies of allowing later, especially modern, notions of religion to exert undue influence on interpretations of the past. It further suggests that, rather than constituting a separate category of violence, religious violence needs to be understood in its political, social, military, and ideological contexts.

This new collection of short stories from T.C. Boyle finds him at his mercurial best. Inventive, wickedly funny, sometimes disturbing, these are stories about drop-outs, deadbeats and kooks. Take the man who shares his apartment with a wildcat won in a drunken bet; the drive-time shock jock hallucinating from sleep deprivation for a publicity stunt; the suburban woman who joins a pack of dogs, eating rabbits and baying at the moon. With a unique deftness of touch and a keen eye for the telling detail, Boyle has mapped the strange underworld of America.
