This dictionary, the first of its kind in Turkological studies, will prove to be an invaluable research tool for those studying the Crimea, Ukraine, as well as Eurasian Nomadism. It is the result of year-long painstaking research into the etymology of Crimean pre-Russian habitation names, providing insight into

the Turkic, Greek, Caucasian place-names in a comparative context, as well as the histories of these cities, towns and villages themselves. The dictionary contains approximately 1,500 entries, preceded by an introduction with notes on the history of the Crimea and the structure of habitation names. For the reader's convenience, many entries are classified in indices

which follow the main part of the book. Additionally, three detailed primary source maps, separately indexed, are appended to the dictionary, as well as a map showing the administration network of the Crimea at the end of the Crimean Tatar Khanate. EmpireA Historical-Etymological Dictionary of Pre-Russian Habitation Names of the Crimea Burnaby was a captain in the British Army who spent his winter leave of absence of 1876 riding 2000 miles through Asiatic Turkey, on the eve of the Russo-Turkish War. Burnaby questioned everyone he met regarding the imminent war; the author believed, from the impressions of his

informants, that the Ottoman Empire would probably lose. By the time he published the account the Turkish Army had "gallantly withstood their foe. My reasons for arriving at the above-mentioned opinion will be found in these volumes. They merely contain a sort of verbal photograph ... of what I saw and heard during the journey."

This volume illustrates how language revival movements in Russia and elsewhere have often followed a specific pattern of literacy bias in the promotion of a minority's heritage language, partly neglecting the social and relational aspects of orality. Using the Vepsian

Renaissance as an example, this volume brings to the surface a literacy-orality dualism new to the discussion around revival movements. In addition to the more-theoretically oriented scopes, this book addresses all the actors involved in revival movements including activists, scholars and policy-makers, and opens a discussion on literacy and orality, and power and agency in the

multiple relational aspects of written and oral practices. This study addresses issues common to language revival movements worldwide and will appeal to researchers of linguistic anthropology, sociolinguistics, education and language policy, and culture studies. Hamito-Semitic Etymological Dictionary Createspace Independent Publishing Platform This is the

second volume in a series of critical reviews of the chemical thermodynamic data of those elements of particular importance in the safety assessment modeling of high-level radioactive waste storage and disposal facilities. The objective of these reviews is to provide a set of reliable thermodynamic data that can be used to describe the behaviour of these elements under

conditions relevant for radioactive waste disposal systems and the geochemical environments. The present volume is a review of experimental data reported in the literature for americium. On a few occasions, where no data existed, comparisons and estimates were made based on experimental data on analog lanthanide elements. The basic philosophy was to

develop a minimum set of solid phases and solution species of americium that would fit all experimental data being reviewed.

This is a dictionary of Cebuano Visayan, the language of the central part of the Philippines and much of Mindanao. Although the explanations are given in English, the aim of this work is not to provide

English equivalents but to explain Cebuano forms in terms of themselves. It is meant as a reference work for Cebuano speakers and as a tool for students of the Cebuano language. There is a total of some 25,000 entries and an addenda of 700 forms which were prepared after the dictionary had been composed. This dictionary is the product of eleven years work by more than a hundred

persons. The work was edited by John Wolff but the sources are entirely native, and all illustrations are composed by native speakers. To date, this work probably represents the most authoritative dictionary of the Cebuano Visayan language. Folklife Annual BRILL

far the only comparable work to date, M. Cohen's Essai comparatif sur le vocabulaire et la phonétique du chamito-semitique, published in 1947, which contains much less material and is now outdated. The Dictionary comprises more than 2,500 lexical items and includes an introduction providing valuable information on the historical phonology of Hamito-Semitic as well as an

and travels in Asia, from the earliest ages to the present time. [With a map.] Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of

the explicit endeavor to “Europeanize” the world. From the decline of the Roman Empire to the polycentrism of today’s world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from “mare nostrum” to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as

boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated

cultural and intellectual region.

Continuity and often violent change in medieval Persia are revealed in this detailed study of aspects of Persian history during three turbulent centuries (1040–1335 A.D.). An extensive introduction provides the chronological framework for this examination of the vital areas of administrative, economic, and social

history. This book is a major contribution from the pen of a scholar whose knowledge of the sources of the history of Islamic Persia and of the country itself is hardly to be matched by any living Western scholar. Lambton provides an

astonishing amount of information and also uniquely deep insights into Persian history and society.
