The fields of Economic Geography and International Business share an interest in the same phenomena, whilst each provides both a differing perspective and different research methods in attempting to understand those phenomena. The *Routledge Companion to the Geography of International Business* explores the nature and scope of inter-disciplinary work between Economic Geography and International Business in explaining the central issues in the international economy.

Contributions written by leading specialists in each field (including some chapters written by inter-disciplinary teams) focus on the nature of multinational firms and their strategies, where they choose to locate their activities, how they create and manage international networks and the key relationships between multinationals and the places where they place their operations. Topics covered include the internationalisation of service industries, the influence of location on the competitiveness of firms and the economic dynamism of regions and where economic activity takes place and how knowledge, goods and services flow between locations. The book examines the

areas for fruitful interdisciplinary work between International Business and Economic Geography and sets out a road map for future joint research, and is an essential resource for students and practitioners of International Business and Economic Development.

This important and
original book places
the case study in
international business
research in its
historical context,
critically evaluates
current case study
practices in the field
and proposes a more
pluralistic future for
case research within
international business
and international
management research.
While the case study is
the most popular
qualitative research
strategy in the field,
only a narrow selection
of possible approaches
is currently used. IB

and IM researchers typically rely on a case study approach that could be characterized as 'qualitative positivism'. The editors and contributors look beyond this disciplinary convention and encourage greater pluralism in IB and IM case research. Their key argument is that increased awareness of prevailing disciplinary conventions - and their limitations - increases the potential for methodological innovation and versatility in case research. The contributions provide critical, novel and innovative perspectives on the case study in IB and IM research. The book offers inspiration to case authors and an authoritative methodological

reference for those publishing and reviewing case research. It will also be highly regarded by postgraduate and doctoral students in IB and IM as well as both qualitative and quantitative researchers in the field.

Oxford IB Diploma Programme IB Prepared: Business Management (Online) Taylor & Francis Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach.

Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.
