**Sun and Moon** Collins  
From the number one  
Astronomy publisher, a  
beautiful  
astrophotography book,  
showcasing the most  
spectacular space  
photography, taken from  
locations across the

globe. Marvel at the  
wonders of the universe  
captured by the most  
talented  
astrophotographers. A  
perfect gift for all  
interested in exploring the  
mysteries of our solar  
system and beyond. Be  
captivated by 140 winning  
and shortlisted images  
from the 2021 Astronomy  
Photographer of the Year  
competition, hosted by

the Royal Observatory,  
Greenwich. These awe-  
inspiring images are  
submitted in several  
categories: aurorae,  
galaxies, our Moon, our  
Sun, people and space,  
planets, comets and  
asteroids, skyscapes,  
stars and nebulae, and a  
young competitor  
category. Each image is  
accompanied by caption,  
photographer, location,

and technical details. There is also a location map showing the origin of all images and a visual appendix of all images. The judges are from an expert panel of distinguished astronomy experts. The Exhibition The National Maritime Museum hosts an exhibition of the winners of the Astronomy Photographer of the Year competition, showcasing these incredible images of the sky.

*of the Year: Collection 8*  
 Flame Tree Calendars  
 Any amateur astronomer who is interested in astrophotography, particularly if just getting started, needs to know what objects are best for imaging in each month of the year. These are not necessarily the same objects that are the most spectacular or intriguing visually. The camera reveals different things and has different requirements. What objects in the sky tonight are large enough, bright enough, and high enough

to be photographed? This book reveals, for each month of the year, the choicest celestial treasures within the reach of a commercial CCD camera. Helpful hints and advice on framing, exposures, and filters are included. Each deep sky object is explained in beautiful detail, so that observers will gain a richer understanding of these astronomical objects. This is not a book that dwells on the technology of CCD, Webcam, wet, or other types of

astrophotography. Neither is it a book about in-depth computer processing of the images (although this topic is included).

Detailed discussions of these topics can be found in other publications. This book focuses on what northern latitude objects to image at any given time of the year to get the most spectacular results.

**Royal Observatory  
Greenwich - Astronomy  
Photographer of the  
Year Desk Diary 2020**

Collins

All the winning and shortlisted images from

the 2014 Astronomy Photographer of the Year competition, which is organized by the Royal Observatory, Greenwich. The images are submitted in one of the following categories: - Earth and Space- Our Solar System- Deep Space- Young Astronomy Photographer of the Year And can also be entered for one of the special prizes: - Best Newcomer- People and Space- Robotic Scope Each image is accompanied by caption, photographer, location and technical

details. Exhibition Every year the Royal Observatory, Greenwich hosts a free exhibition of the winners of the Astronomy Photographer of the Year competition, showcasing some incredible images of the sky.

[Astronomy Photographer of the Year 2013](#) Collins Invaders have exploded the sun's nearest star.

Will the death of Earth's sun be next? While trying to keep up with his school studies and ensuring his

football team stays top of the league, it's Johnny's job to safeguard planet Earth. When invaders turn a nearby star into a supernova, Johnny must act to protect the sun. Johnny and his sister Clara prepare to travel in their space ship to the galactic capital for help, but their mission is stalled when Johnny discovers that his mysterious elder brother Nicky is on the side of the invaders . . . So begins an epic adventure across space involving killer clones, a spy trial and devious alien twins. Will

Johnny save his brother, and planet Earth, in time? Keith Mansfield's vivid space adventure will wow fans of action stories and science fiction.

*ASTRONOMY PHOTOGRAPHER OF THE YEAR* Collins

A stunning ebook with clear navigation for admirers of astrophotography. This ebook has been built to W3C accessibility guidelines and will work with text to speech. The layout has been redesigned with clear navigation links to each of

the competition entries within the Maps section. It is compatible with all ereading apps and devices.

*The World at Night* Collins

A collection of astrophotography taken from and around the Central West of NSW, Australia

*Night Skies of the Central West* Royal Museums Greenwich

All the winning and shortlisted images from the 2015 Astronomy Photographer of the Year competition, which is hosted by the Royal

Observatory, Greenwich. The images are submitted in one of the following categories: - Earth and Space- Our Solar System- Deep Space- Young Astronomy Photographer of the Year And can also be entered for one of the special prizes: - Best Newcomer- People and Space- Robotic Scope Each image is accompanied by caption, photographer, location and technical details. Exhibition Every year the Royal Observatory, Greenwich hosts a free exhibition of

*Astronomy Photographer of the Year: Collection 4*  
 Hachette UK  
 A showcase of the most spectacular space photography of its kind, taken from locations across the globe. Marvel at the wonders of the universe captured by the most talented astrophotographers. A

perfect gift for all interested in exploring the mysteries of our solar system and beyond. Best viewed on Kindle Fire in landscape view.

**The 100 Best Astrophotography Targets** HarperCollins UK  
 Did you know that stars are seasonal? That Orion is one of the brightest constellations? That a single day on Venus is longer than an entire year on Venus? Space has captivated mankind since the beginning of time. Fifty years ago, Neil Armstrong became the

first man to step on the moon and since then our knowledge of astronomy has continued to expand. With so many mysteries yet to be solved, science journalist Abigail Beall takes readers on an astonishing journey though the landscape of space. In *The Art of Urban Astronomy*, you will be guided through the seasons and learn about the brightest stars and constellations, the myths and legends of astronomy and how to identify star clusters and galaxies with just your eyes or a pair of

binoculars. For urban dwellers wrapped up in the rush and bustle of the city, it can be calming and truly valuable to take the time simply to stop, look and reconnect with nature. Packed full of seasonal star charts, constellation charts and fascinating facts, this is the perfect guide for those who have looked up at the night sky and don't know where to begin. After reading this book, you'll never look up in the same way again. *Royal Observatory Greenwich - Astronomy*

*Photographer of the Year Desk Diary 2018*  
Bloomsbury Publishing  
Featuring remarkable landscapes and powerful portraits, Dave Brosha's first book of photography transports the viewer to stunning Arctic and Subarctic locations. "Epic, awesome shots ..." -- Martin Hartley, National Geographic contributing photographer "Amazing shots ..." --Phil Plait, "Bad Astronomy" from Discover magazine "One of the most celebrated creative photographers in the world ..." --Nikon

"Critically acclaimed ... spectacular photos ..." -- The Globe and Mail Dave Brosha is one of Canada's most passionate and widely published photographers. On a continual journey to seek out and capture the beauty of this world, he produces work that covers a wide spectrum of photographic genres. With stunning photographs taken in Greenland, Iceland, the Northwest Territories, Nunavut, the Torngats of Newfoundland and Labrador, and the Yukon this remarkably

original portfolio will amaze viewers and inspire everyone to reconsider the nature of these sometimes forgotten landscapes.

 o  
[Astronomy Photographer of the Year](#) Royal  
 Museums Greenwich  
 Nestled on the south side of the Thames just east of central London is the town of Greenwich. Long famous as the location of the Prime Meridian and the center of Greenwich Mean Time, Greenwich is full of remarkable attractions for the visitor. At its heart are the world-class collections of the Royal Museums Greenwich--The Royal

Observatory, the Cutty Sark, the National Maritime Museum, and the Queen's House. Each year they welcome more than 2.5 million visitors, making them one of the top ten visitor attractions in the entire United Kingdom. Together they illustrate the importance of the sea, ships, time, and the stars, and their relationship with people. Royal Museums Greenwich Kids' Handbook offers a guided tour of all four of the fabulous Royal Museums Greenwich--a tour that's

designed especially for young visitors. Packed with facts, games, activities, puzzles, and stickers, this book is the perfect preparation for a trip to Greenwich, and the perfect souvenir for after a successful visit. Set sail for adventure!

*Royal Observatory Greenwich - Astronomy Photographer of the Year Desk Diary 2021* Alpha Edition

A stunning selection of over 30 astronomical images that will take your breath away. Produced in connection with the Royal

Observatory Greenwich's Astronomy Photographer of the Year award this week-to-view desk diary features some of the finest examples of astronomy captured by some of the most talented photographers.

Royal Observatory Greenwich - Astronomy Photographer of the Year Desk Diary 2022 Springer Science & Business Media This book showcases the most spectacular space photography of its kind, taken from locations across the globe. Marvel at the wonders of the

universe captured by the most talented astrophotographers. A perfect gift for all interested in exploring the mysteries of our solar system and beyond. Be captivated by 140 winning and shortlisted images from the 2019 Insight Investment Astronomy Photographer of the Year competition, hosted by the Royal Observatory, Greenwich. These awe-inspiring images are submitted in several categories: aurorae, skylscapes, people and space, the sun and moon,

planets, comets and asteroids, stars and nebulae, galaxies and a young competitor category. Each image is accompanied by caption, photographer, location and technical details. There is also a location map showing the origin of all images and a visual appendix of all images. *Northern Lights: The definitive guide to auroras* Collins This week-to-view desk diary will take your breath away. Produced in connection with the Royal Observatory Greenwich's

Astronomy Photographer of the Year award, this wall calendar features some of the finest examples of astronomy. Informative text accompanies each work and the datepad features previous and next month's views.

**Astronomy  
Photographer of the  
Year** Bloomsbury

Publishing  
Following the Next  
Generation Science  
Standards focusing on the  
universe and its stars, this  
enlightening book delves  
deep into the scientific

study of stars, analyzing  
their behavior and  
composition, as well as  
their life cycles. Readers  
will learn fascinating  
facts, such as just how big  
they can get, how many  
there are in the universe,  
and the spectacular  
fashion in which some die.  
Readers can explore the  
universe of nebulae, the  
interstellar dust from  
which stars are born.  
Treat your star-gazers to  
a terrific guide.

**Astronomy  
Photographer of the  
Year** The Rosen  
Publishing Group, Inc

Ted took a big deep  
breath then fired up the  
engines. The rocket's  
boosters rumbled into  
action like a hungry bear  
belly. "No adventure can  
start without a countdown  
" shouted Ted over the  
roar of the engines. 5 . . .  
4 . . . 3 . . . 2 . . . 1 . . .  
**BEAR BLAST OFF** In this  
richly illustrated book,  
astronomer Elizabeth  
Avery takes children and  
their parents on an  
educational and exciting  
journey through space. In  
these captivating pages, a  
bear named Ted takes off  
for a trip through the solar

system with his best friend--a flower named, aptly, Fleur. The pair explore our moon, and from there they head out to places no being from Earth has yet visited: our neighboring planets Mars and Venus, more distant locales like Jupiter and Saturn, and even the source of all Earth's energy, the Sun. At each stop in this winning adventure, the pair learns basic scientific facts that are presented at a level that early readers can grasp. The result is a trip that is simultaneously

instructive and entertaining, an interplanetary romp that will inspire kids to follow their scientific dreams.

*Teds Space Adventure*  
Collins

A spectacular pictorial history of astronomical exploration, for anyone who has gazed at the sky and wondered what lies beyond From the beginning of time, human beings have looked up at the stars and speculated on other worlds. Published to mark the fiftieth anniversary of the first moon landing, Sun and

Moon tells the story of that burning human need to comprehend the universe, from Neolithic observatories that mark the solstice to the latest space telescopes. It shows, for the first time, how the development of photography and cartography - the means of documenting other worlds - is linked indelibly to the charting of the heavens, from the first image on a glass plate to the Hubble Space Telescope.

Astronomy Photographer of the Year Collins

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this

book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.  
[The Astronomy Puzzle Book](#) Chronicle Books  
 An invaluable resource for those interested in the

history of the celebrated Prime Meridian, this book is packed with information on the different ways in which 0° longitude has been marked across the world. It explains the origins of longitude and what the ability to determine it has meant for navigation.
