This War Report provides detailed information on every armed conflict which took place during 2014, offering an unprecedented overview of the nature, range, and impact of these conflicts and the legal issues they created. In Part I the Report describes its criteria for the identification and classification of armed conflicts under international law, and the legal consequences that flow from this classification. It sets out a list of armed conflicts in 2014, categorising each as international, non-international, or a military occupation, with estimates of civilian and military casualties. In Part II, each of these conflicts

are examined in more detail, with an overview of the belligerents, means and methods of warfare, the applicable treaties and rules, and any prosecutions for, investigations into, or robust allegations of war crimes. Part III of the Report provides detailed thematic analysis of key legal developments which arose in the context of these conflicts, allowing for a more in-depth reflection on cross-cutting questions and controversies. The Report gives a full and accessible overview of armed conflicts in 2014. It should be the first port of call for everyone working in the field.

Rowman & Littlefield
Asia has witnessed a proliferation of free trade agreements (FTAs) since the turn of the millennium. The first regional agreement - the ASEAN FTA - was transformed into the ASEAN Economic Community at the end of 2015. In the meantime, ASEAN forged five ASEAN+1 FTAs and began to negotiate a sixteen-

member Regional Comprehensive Economic Partnership (RCEP) Agreement. In parallel, the U.S.-led Trans-Pacific Partnership (TPP), supporting U.S. foreign policy of "Pivot to Asia", was broadly agreed in October 2015. The RCEP and the TPP are accompanied by other mega-regional integration processes developing elsewhere in the world, including the Transatlantic Trade and Investment Partnership for the European Union and the United States, and the Pacific Alliance among four Latin American member states. Meanwhile, APEC is also striving to meet its Bogor Goal targets and create a Free Trade Area of the Asia-Pacific. Each of

these mega-regionals aims to achieve greater trade and investment liberalization and facilitation and more harmonized trade and investment rules so that all member economies can participate in the global value chain of production. Instead of undermining, these regional exercises can be building blocks for a more liberal global trading system supported by the World Trade Organization. This book ruminates on these regional agreements, their economic and strategic rationales and challenges during negotiations and afterwards. The book brings together eminent scholars and experts to deepen our understanding of the

complex nature of the mega-regional trade agreements and their implications. It is useful both for the academic and research community and for policymakers who focus on trade and economic cooperation issues.

EBOOK: Accounting: What the Numbers Mean United Nations

This book examines the myriad ways in which war is culturally reassembled, appropriated, and commodified as it manifests itself in our culture and invades our public imagination and becomes an indelible part of our landscape through fashion, movies, graphic novels, television etc.

France College of Law Publishing
France is among the

countries most affected by the global pandemic, both in terms of health and economic impact. Output is expected to have declined by around 9 percent in 2020. The authorities put in place a large emergency fiscal package to address the crisis, focused on preserving jobs and providing liquidity for households and firms, supplemented by additional stimulus measures to support the economic recovery in 2021 and beyond. The banking sector entered the crisis with comfortable buffers and, together with the support of the ECB's accommodative monetary policy, facilitated the provision of credit to the economy. The increased leverage,

however, poses solvency risks to the corporate sector. A partial recovery with GDP growth at about 5 1/2 percent is expected in 2021. Risks to the outlook are large, dominated by the virus dynamics and, together with other risks, tilted somewhat to the downside.
