 What if you could combine the agility, adaptability, and cohesion of a small team with the power and resources of a giant organization? When General Stanley McChrystal took command of the Joint Special Operations Task Force in Iraq in 2003, he quickly realized that conventional military tactics were failing. The allied forces had a huge advantage in numbers, equipment and training - but none of the enemy's speed and flexibility. McChrystal and his colleagues discarded a century of conventional wisdom to create a 'team of teams' that combined extremely transparent communication with decentralized decision-making authority. Faster, flatter and more flexible, the task force beat back al-Qaeda. In this powerful book, McChrystal and his colleagues show how the challenges they faced in Iraq can be relevant to any leader. Through compelling examples, the authors demonstrate that the 'team of teams' strategy has worked everywhere from hospital emergency rooms to NASA and has the potential to transform organizations large and small. Provides a social history of how the CIA used the psychedelic drug LSD as a tool of espionage during the early 1950s and tested it on U.S. citizens before it spread into popular culture, in particular the counterculture as represented by Timothy Leary, Allen Ginsberg, Ken Kesey, and others who helped spawn political and social upheaval.

Jackaroo; n. a male station hand. That is according to the "Australian Slang Dictionary" whereas the Macquarie Dictionary gives a more realistic version. "A jack of all trades". Certainly a jackaroo is far more than 'a male station hand', which will be evident as the reader moves through this recount of the writer's five years of 'Station Management Apprenticeship', possibly a more precise definition of the word. ('Station' being a large sheep and/or cattle property/ranch). The origin of the word 'jackaroo' has been debated as long as the word has been in existence, but the most popular belief is that early English migrants, who worked on stations in the Australian Outback, were given the name of "Jack Raw", being raw to the ways of the Australian bush. One such English migrant, whose name was Jack Carew may have had an influence on the foundation of the word. There is also the more recent female counterpart, known as a jillaroo. It is however, generally agreed that the word has no connection with the famed Australian icon, the kangaroo.

This study seeks to clarify the nature of light infantry. General characteristics of light infantry forces are identified, and an analysis of how light forces operate tactically and how they are supported is presented. In the process, the relationship of the light infantry ethic to its organization is evaluated, and the differences between light infantry and conventional infantry is illuminated. For the purpose of this study, the term conventional infantry refers to modern-day motorized and mechanized infantry and to the large dismounted infantry forces typical of the standard infantry divisions of World War II, the Korean War, and the Vietnam War. The study concludes that light infantry is unique

and distinct. A light infantry ethic exists and manifests itself in a distinctive tactical style, in a special attitude toward the environment, in a freedom from dependence on fixed lines of communication, and in a strong propensity for self-reliance. The study is based on a historical analysis of 4 light infantry forces employed during and since World War II: The Chindits, in the 1944 Burma campaign against the Japanese; The Chinese communist Forces during the Korean War; British operations in Malaya and Borneo 1948-66; and the First Special Service Force in the mountains of Italy 1942-44. -- p.
