Reading Literature and Writing Argument ABC-CLIO

This volume includes a collection of eighteen essays that provide a decisive input to the study of logic and argumentation theory by some of the finest specialists in these areas, covering the main schools of thought and contemporary trends at the beginning of the 21st century. In these essays, the authors clarify the status of what we currently call, ambiguously and problematically, "logic" and "argumentation theory", and discuss the no less controversial issue of the relationship between these two concepts when applied to the study of argumentation and its problems. At the same time, they take stock of the most recent developments of argumentation theory considered as an ongoing research subject. It is the first time in the last few decades that a work this comprehensive and up-

to-date on such matters has been published. This volume is an essential tool for all of those interested in the study of the relations between logic and argumentation, particularly at the university level. It provides not only an introduction to these subjects, but also the necessary framework for further specialised research development in the future.

Feminism and Affect at the Scene of Argument Taylor & Francis

Now available in three thematic volumes, the second edition of Moral Issues in Global Perspective is a collection of the newest and best articles on current moral issues by moral and political theorists from around the globe. Each volume seeks to challenge the standard approaches to morality and moral issues shaped by Western liberal theory and to extend the inquiry beyond the context of North America. Covering a broad range of issues and arguments, this collection includes critiques of traditional liberal accounts of rights, justice, and moral values, while raising questions about the treatment of disadvantaged groups within and across societies affected by globalization. Providing new perspectives on issues such as war and terrorism, reproduction, euthanasia, censorship, and the environment, each volume of Moral Issues in Global Perspective incorporates work by race, class, feminist, and disability theorists. In Moral Issues, the third of the three volumes, issues such as euthanasia and health care, reproductive issues, pornography and hate speech, animal rights, and environmental ethics are examined in the context of globalization and of differing social contexts and practices. Sixteen essays are new, one of which was written especially for this volume. Moral Issues in Global Perspective is available in three separate volumes--Moral and Political Theory, Human Diversity and Equality, and Moral Issues.

A landmark publication in the social sciences, Linda Lindsey's *Gender* is the most comprehensive textbook to explore gender sociologically, as a critical and fundamental dimension of a person's identity, interactions, development, and role and status in society. Ranging in scope from the everyday lived experiences of individuals to the complex patterns and structures of gender that are produced by institutions in our global society, the book reveals how understandings of gender vary across time and place and shift along the intersecting lines of race, ethnicity, culture, sexuality, class and religion. Arriving at a time of enormous social change, the new, seventh edition extends its rigorous, theoretical approach to reflect on recent events and issues with insights that challenge conventional thought about the gender binary and the stereotypes that result. Recent and emerging topics that are investigated include the #MeToo and LGBTQ-rights movements, political misogyny in the Trump era, norms of masculinity, marriage and family formation, resurgent feminist activism and praxis, the gendered workplace, and profound consequences of neoliberal globalization. Enriching its sociological approach with interdisciplinary insight from feminist, biological, psychological, historical, and anthropological perspectives, the new edition of *Gender* provides a balanced and broad approach with readable, dynamic content that furthers student understanding, both of the importance of gender and how it shapes individual trajectories and social processes in the U.S. and across the globe.

Arguments and Arguing Macmillan

This book brings together in one place David Hitchcock's most significant published articles on reasoning and argument. In seven new chapters he updates his thinking in the light of subsequent scholarship. Collectively, the papers articulate a distinctive position in the philosophy of argumentation. Among other things, the author: • develops an account of "material consequence" that permits evaluation of inferences without problematic postulation of unstated premises. • updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion. • advances a general theory of relevance. • provides comprehensive frameworks for evaluating inferences in reasoning by analogy, means-end reasoning, and appeals to considerations or criteria. • argues that none of the forms of arguing ad hominem is a fallacy. • describes proven methods of teaching critical thinking effectively.

Perspectives on International Relations: Power, Institutions, and Ideas shows students new to the field how theories (perspectives) of international affairs—realism, liberalism, constructivism (identity), and critical theory—play a decisive role in explaining every-day debates about world affairs. Why, for example, do politicians and political scientists disagree about the causes of the ongoing conflict in Syria, even though they all have the same facts? Or, why do policymakers disagree about how to deal with North Korea when they are all equally well informed? The new Sixth

Edition of this best-seller includes updates on Brexit, the rise of Donald Trump and other populist leaders, and continuing developments for ISIS, Syria, and Russia.

Perspectives on Theory Cengage Learning

This seventh edition of *Canadian Politics* includes twelve new chapters, with ten new contributing authors and coverage of six new subjects.
