up with illustrators Hunt Emerson, John Spelling, and Adam Pasion to show how this process has been played out again and again throughout history--and has slowly but surely led to hard-won rights for the people along the way. Focusing on the English-speaking nations, Wilson and Dickson chronicle the struggles of the Luddites and Swing Riots in the early 1800s, through the

Irish Rebellions that lasted through 1922; from the suffragettes in 1918 to Rosa Parks and the bus boycott of the mid-1950s; from the trial of Nelson Mandela to the Occupy movement that has only just begun. By illuminating the variety of protests--and the valuable connections among them--through an accessible art form, *Fight the Power!* shows that there is a point to the struggle, fight

by fight, win by win. **Abolishing Corporal Punishment of Children** Rowman & Littlefield Publishers Anna, the interracial child of a white father and black mother, explores questions and yearnings she has about her identity by "switching" skin-colors with her father. With wit, compassion and a very light and non-didactic hand, this book examines issues of

concern not only to interracial children, but to all children who have ever worried about their differences. Full-color illustrations. *Country Market Survey* Council of Europe You can count on Rick Steves to tell you what you really need to know when traveling in Belgium. With this guide, you'll ride bikes over cobblestone streets and embark on cruises through charming

canals. Stop and smell the tulips as you hike past whirring windmills. Visit the ultramodern European Parliament. Explore beyond the cosmopolitan bustle of Brussels with trips to Ghent and Antwerp. When it's time for a break, sample fine chocolates or sip local beers—each served in its own distinctive glass. Rick's candid, humorous advice will guide you to good-value

hotels and restaurants. He'll help you plan where to go and what to see, depending on the length of your trip. You'll get up-to-date recommendations about what is worth your time and money. More than just reviews and directions, a Rick Steves guidebook is a tour guide in your pocket. This first edition guide replaces Rick Steves' *Snapshot Bruges & Brussels*, ISBN 9781612382296.

Also included are discount coupons to help stretch your dollar. With this book in hand, there's no

reason for you and your kids to be bored in Vancouver. Kids' Vancouver OUP Oxford Features on cover and title page - Building a Europe for and with children. **Board of Trade Journal** Hachette UK Winner of the Duff Cooper Prize, King Leopold's Ghost is the true and haunting account of Leopold's brutal regime and its lasting effect on a ruined nation. With an introduction

by award-winning novelist Barbara Kingsolver. In the late nineteenth century, when the great powers in Europe were tearing Africa apart and seizing ownership of land for themselves, King Leopold of Belgium took hold of the vast and mostly unexplored territory surrounding the Congo River. In his devastatingly barbarous colonization of this area, Leopold stole

its rubber and ivory, pummelled its people and set up a ruthless regime that would reduce the population by half. While he did all this, he carefully constructed an image of himself as a deeply feeling humanitarian. King Leopold's Ghost is the inspiring and deeply moving account of a handful of missionaries and other idealists who travelled to Africa and unwittingly found themselves in the middle of a gruesome

holocaust. Instead of turning away, these brave few chose to stand up against Leopold. Adam Hochschild brings life to this largely untold story and, crucially, casts blame on those responsible for this atrocity. Council of Europe Run blazingly fast queries on complex graph datasets with the power of the Neo4j graph database About This Book Get acquainted with graph database systems and apply them in real-world use cases Use Cypher query language, APOC and other Neo4j extensions to derive meaningful analysis from complex data sets. A practical guide filled with

ready to use examples on querying, graph processing and visualizing information to build smarter spatial applications. Who This Book Is For This book is for developers who want an alternative way to store and process data within their applications. No previous graph database experience is required; however, some basic database knowledge will help you

understand the concepts more easily. What You Will Learn Understand the science of graph theory, databases and its advantages over traditional databases. Install Neo4j, model data and learn the most common practices of traversing data Learn the Cypher query language and tailor-made procedures to analyze and derive meaningful representation s of data Improve graph techniques with the help of precise procedures in the APOC library Use Neo4j advanced extensions and plugins for performance optimization. Understand how Neo4j's new security features and clustering architecture are used for large scale deployments. In Detail Neo4j is a graph database that allows traversing huge amounts of data with ease. This book aims at quickly getting you started with the popular graph database Neo4j. Starting with a brief introduction to graph theory, this book will show you the advantages of using graph databases along with data modeling techniques for graph databases. You'll gain practical hands-on experience with commonly used and lesser known features for updating graph store with Neo4j's Cypher query language. Furthermore,

you'll also learn to create awesome procedures using APOC and extend Neo4j's functionality, enabling integration, algorithmic analysis, and other advanced spatial operation capabilities on data. Through the course of the book you will come across implementation examples on the latest updates in Neo4j, such as in-graph indexes, scaling, performance improvements

, visualization, data refactoring techniques, security enhancements, and much more. By the end of the book, you'll have gained the skills to design and implement modern spatial applications, from graphing data to unraveling business capabilities with the help of real-world use cases. Style and approach A step-by-step approach of adopting Neo4j, the world's

leading graph database. This book includes a lot of background information, helps you grasp the fundamental concepts behind this radical new way of dealing with connected data, and will give you lots of examples of use cases and environments where a graph database would be a great fit [Belgium](#) Packt Publishing Ltd The main focus of this book is on the causation of starvation in general and of

famines in particular. The author develops the alternative method of analysis—the 'entitlement approach'—concentrating on ownership and exchange, not on food supply. The book also provides a general analysis of the characterization and measurement of poverty. Various approaches used in economics, sociology, and political theory are critically examined. The predominance of distributional issues, including distribution between different occupation groups, links up the problem of conceptualizing poverty with that of analyzing starvation.

the section: The British fur farmer. *Apparel, Belgium* More than nine million soldiers died in World War I. At the same time, a US-led effort saved nearly ten million civilians from starvation behind the lines during the German occupation, yet one of America's greatest humanitarian efforts is virtually unknown today. In this gripping book, Jeffrey B. Miller tells the remarkable

history of two American and Belgian citizen-created organizations that led a massive food relief program for civilians trapped in German-occupied Belgium and northern France. Herbert Hoover, then a successful international businessman, was the driving force behind the effort, coercing and bullying the governments of Germany, Great Britain, France, and the United

States to allow a group of idealistic young volunteers to organize in occupied Belgium and coordinate the distribution of tons of food and clothing to desperate Belgians. These crusaders, known as CRB delegates, had to maintain strict neutrality as they watched the Belgians suffer under the harsh German regime. Miller tells compelling stories of German brutality,

Belgian relief efforts, and the idealistic Americans who went into German-occupied Belgium from October 1914 up to May 1917, when they were forced to leave after the April entry into the war of the United States. Yanks interweaves the history of the time with fascinating personal stories of volunteers, diplomats, a young Belgian woman who started a dairy farm to feed Antwerp's children, the

autocratic head of the Belgian relief organization, and the founder of the American organization, who would become known to the world as the Great Humanitarian and later, largely because of his work in Belgium and post-war Europe, would become the thirty-first president of the United States.
