Sojourner in the Promised Land Lulu.com  
Today, many Christians, concerned and challenged by contemporary trends in society and religion, are bewildered and perhaps tempted to leave the Church and manage on their own. Courage and Conviction is addressed to discerning adult Christians who seek something between high theology and pious platitudes. Ranging from consideration

of Christian identity, via the challenge of faith-filled living in a world of diversity, to suggestions for mature discipleship today, these reflections—building on Scripture studies, cultural anthropology, and life experience—are offered by way of support, encouragement, and perhaps further enlightenment.

**So Tall Within** Wipf and Stock Publishers

Sojourner in the Promised Land presents an unusual parallel history in which Shippo surrounds her professional writings about the Latter-day Saints with

an ongoing personal description of her encounters with them. By combining a portrait of the dynamic evolution of contemporary Mormonism with absorbing intellectual autobiography, Shipps illuminates the Mormons and at the same time shares with the reader what it has been like to be an intimate outsider in a culture that remains for her both familiar and strange.

For more than a century, Mars has been at the center of debates about humanity's place in the cosmos.

Focusing on perceptions of the red planet in scientific works and science fiction, *Dying Planet* analyzes the ways Mars has served as a screen onto which

humankind has projected both its hopes for the future and its fears of ecological devastation on Earth. Robert Markley draws on planetary astronomy, the history and cultural study of science, science fiction, literary and cultural criticism, ecology, and astrobiology to offer a cross-disciplinary investigation of the cultural and scientific dynamics that have kept Mars on front pages since the 1800s. Markley interweaves chapters on science and science fiction, enabling him to illuminate each arena and to explore the ways their concerns overlap and influence one another. He tracks all the major scientific developments, from observations through primitive telescopes in the seventeenth century to data returned by the rovers that landed on Mars in 2004. Markley describes how

major science fiction writers—H. G. Wells, Kim Stanley Robinson, Philip K. Dick, Edgar Rice Burroughs, Ray Bradbury, Robert Heinlein, and Judith Merril—responded to new theories and new controversies. He also considers representations of Mars in film, on the radio, and in the popular press. In its comprehensive study of both science and science fiction, *Dying Planet* reveals how changing conceptions of Mars have had crucial consequences for understanding ecology on Earth.

**The Sojourner** Routledge

*A Journey In Imagination* offers the hope of an alternative to a world convulsed by hostility and violence. Through an imaginative journey into Bible stories, incidents, and verses, the possibility of reversing hostility in both personal and

communal life is explored. Biblical hospitality is neither a head in the sand nor a pie in the sky pleasantry. Instead it is the daring and challenging work of reversing hostility through seeing the 'other' fully as a human being. We may be failing at relationships, but that does not mean that we are doomed forever to fail. Too many of the tensions between the haves and the have-nots, between races, and between different religious traditions seem to have only two alternatives: violence and more violence. Life and relationships do not have to be this way. By exploring incidents that demonstrate alternatives to hostility, the book addresses this failure of imagination. This book is also a response to the accusation that the God of the Old Testament is little more than a God of

vengeance and violence. To the contrary, the God of the Old Testament is the same God to whom Jesus prayed. Throughout the Bible, God yearns for a reversal of hostility.

Ain't I A Woman? Academic Conferences and publishing limited

Although the Jet Propulsion Laboratory in Pasadena, California, has become synonymous with the United States' planetary exploration during the past half century, its most recent focus has been on Mars. Beginning in the 1990s and continuing through the Mars Phoenix mission of 2007, JPL led the way in engineering an impressive, rapidly evolving succession of Mars orbiters and landers, including roving robotic vehicles whose successful deployment onto the Martian surface posed some of the most

complicated technical problems in space flight history. In *Exploration and Engineering*, Erik M. Conway reveals how JPL engineers' creative technological feats led to major breakthroughs in Mars exploration. He takes readers into the heart of the lab's problem-solving approach and management structure, where talented scientists grappled with technical challenges while also coping, not always successfully, with funding shortfalls, unrealistic schedules, and managerial turmoil. Conway, JPL's historian, offers an insider's perspective into the changing goals of Mars exploration, the ways in which sophisticated computer simulations drove the design process, and the remarkable evolution of landing technologies over a thirty-year period. "A

masterpiece of research and writing."—*Quest: History of Spaceflight Quarterly* "A 'must' for any reader of modern astronomy who wants insights into how the lab conducts its research, solves problems, and handle[s] technological challenges."—*Midwest Book Review* "A great tale of ambition, mishap and recovery, building on extensive archival research and interviews with JPL managers, scientists and engineers, to deliver a detailed overview of each mission's feats and failures . . . *Exploration and Engineering* is a great book for everyone seriously interested in the struggles and achievements of JPL as NASA's centre for Mars exploration."—*Sky at Night* Erik M. Conway is a historian of science and technology at the Jet Propulsion

Laboratory, California Institute of Technology. He is the author of *Atmospheric Science at NASA: A History*. *Mars* Springer Science & Business Media *Thinking Orientals* is a groundbreaking study of Asian Americans and the racial formation of twentieth-century American society. It reveals the influential role Asian Americans played in constructing the understandings of Asian American identity. It examines the unique role played by sociologists, particularly sociologists at the University of Chicago, in the study of the "Oriental Problem" before World War II and also analyzes the internment of Japanese Americans during the war and the subsequent "model minority" profile. Hunter S. Thompson Lyons Press A straightforward guide to understanding

the hidden cultural challenges of adapting to life abroad. Combining intercultural theory and the voices of sojourners who talk about their experiences, it maps out the process of resisting, accepting and adapting to cultural difference. We see that all sojourners, from tourists, to expatriates to immigrants, go through a similar learning dynamic. We learn that intercultural experiences can be deep or shallow, and that hidden cultural difference can increase sojourner prejudice. The book examines intercultural sensitivity while avoiding “feel good” idealizations about cross-cultural contact. It brings clarity to debates regarding the importance of cultural difference and the effects of globalization. An essential resource for

sojourners, language teachers and intercultural educators.

Lunar and Planetary Rovers Government Printing Office

Safwat Marzouk offers a biblical vision for what it means to be an intercultural church, one that fosters just diversity, integrates different cultural articulations of faith and worship, and embodies an alternative to the politics of assimilation and segregation. A church that fosters intercultural identity learns how to embrace and celebrate difference, which in turn enriches its worship and ministry. While the church in North America might see migration as an opportunity to serve God's kingdom by showing hospitality to the migrant and the alien, migration offers the church an opportunity to renew itself by rediscovering the biblical

vision of the church as a diverse community. This biblical vision views cultural, linguistic, racial, and ethnic differences as gifts from God that can enrich the church's worship, deepen the sense of fellowship in the church, and broaden the church's witness to God's reconciling mission in the world. Today's church faces the challenge of what it means to be church in the light of the ever-growing diversity of the population. This may entail advocacy work on behalf of the undocumented, asylum seekers, and refugees, but the church also faces the question of how to welcome the stranger, the migrant, and the refugee into the heart of the worshipping community. This may mean changing worship, leadership, or ministry styles to embrace diverse communities in the

church's neighborhood. Marzouk surveys numerous biblical texts from the early ancestor stories of Israel to the Prophets, to the Gospels and Acts, the letters of Paul, and Revelation. The stories introduce themes of welcoming strangers, living as aliens, playing host to outsiders, discovering true worship, and seeking common language for expressing faith. Discussion questions are provided to encourage conversation on this complex and important topic.

**Hospitality and the Other** Sojourner in the Promised Land  
Cowan, who was caretaker on Thompson's ranch and a trusted friend, paints a sensitive portrait of a man who redefined participatory journalism, who captured the decadence of the era, and generally consumed more drugs and

alcohol than any other living creature on the planet.

InterVarsity Press

This absorbing book tells the story of Mars since the dawn of mankind's curiosity for celestial wonders. It covers everything, right from our ancient beliefs, through the revolution in our concepts of the cosmos around us in the 1600s, to the present day knowledge and beyond. It takes the reader on a journey all the way to the futuristic visions of science fiction and terraformed Mars with conditions suitable to Earth life. The story is told in a readable form with an absence of technical jargon. The text is supported by informative imagery and a simple, but inspiring layout with some special features such as a "flip movie" of the

rotation of Mars.

**Robots in Space** A&C Black

In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that is not widely known. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker, and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought.

*Critical issues in the history of spaceflight* Oxford University Press, USA

At a time when the cooperation between white abolitionists and African Americans was limited, as was the alliance between the woman suffrage movement and the abolitionists, Sojourner Truth was a figure that brought all factions together by her skills as a public speaker and by her common sense. She worked with acumen to claim and actively gain rights for all human beings, starting with those who were enslaved, but not excluding women, the poor, the homeless, and the unemployed. Truth believed that all people could be enlightened about their actions and choose to behave better if they were educated by others, and persistently acted upon these beliefs.

*Black Feminist Thought* Oxford

University Press

What motivates people to work for

justice? Recent studies have moved away from an emphasis on specific principles and toward an understanding of social and cultural forces. But what about times in history when distinct ideas were critical for positive change? The pre-Civil War abolitionist movement represents one such time. During an era when race-based slavery was buttressed by the machinery of civil law, many people developed arguments for freedom and equity that were grounded in divine law. There were Methodist witnesses for justice who lived by this distinction between civil and godly authority. While Methodism, as an institution, betrayed its founding opposition to slavery, many within the movement expressed a prophetic vision. A vibrant counterculture borrowed from

Scripture and modern philosophy to argue for a “higher law” of justice. The world-changing ideas that overcame slavery in America were not disembodied and ethereal. They were mediated through the lives of multidimensional individuals. Sojourner Truth, Luther Lee, Laura Haviland, Henry Bibb, and Gilbert Haven were very different from one another. Yet they were animated by similar ideas, grounded in faith, and shaped by a common commitment to human rights. Working on Mars University of Hawaii Press

Industry and society are complex socio-technical systems, and both face problems that can only be solved by collaboration between different disciplines. Collaboration between

academia and practice is also needed to develop viable solutions. Many engineering problems also require such an approach, which is known as Transdisciplinary Engineering (TE). This book presents the proceedings of the 26th ISTE International Conference on Transdisciplinary Engineering, held in Tokyo, Japan, from 30 July - 1 August 2019. The title of the conference was: Transdisciplinary Engineering for Complex Socio-technical Systems, and of the 86 submitted papers, 68 peer-reviewed papers by authors from 17 countries were delivered at the conference. These papers range from theoretical and conceptual to strongly pragmatic. They address industrial best practice and are grouped here under 10 themes: advanced robotics for smart

manufacturing; design of personalized products and services; engineering methods for industry 4.0; additive and subtractive manufacturing; decision supporting tools and methods; complex systems engineering; big data analytics in manufacturing and services; concurrent engineering; cost modeling; and digital manufacturing, modeling and simulation. Presenting the latest research results and knowledge of product creation processes and related methodologies, the book will be of interest to researchers, design practitioners, and educators alike.

*Interludes and Irony in the Ancestral Narrative* Duke University Press

This book fills a need for a complete history of the Lunar Roving Vehicle used on Apollo 15, 16 and 17, drawing on

many photographs never before published. It also tells the story of the robotic rovers used on Mars, and concludes with a description of the new designs of rovers planned for The New Vision for Exploration now underway at NASA. The book provides extensive quotes from the astronauts who drove the LRV on the Moon from interviews conducted especially for the book. It also details new material from interviews of engineers and managers at the Jet Propulsion Laboratory covering the robotic rovers, Sojourner, Spirit and Opportunity.

*A Companion to the History of American Science* Routledge

In this informed and lyrical collection of interwoven essays, Lisa Knopp explores the physical and cultural geography of

the Mississippi, Missouri, and Platte, rivers she has come to understand and cherish. At the same time, she contemplates how people experience landscape, identifying three primary roles of environmental perception: the insider, the outsider, and the outsider seeking to become an insider. Viewing the waterways through these approaches, she searches for knowledge and meaning. Because Knopp was born and raised just a few blocks away, she considers the Mississippi from the perspective of a native resident, a “dweller in the land.” She revisits places she has long known: Nauvoo, Illinois, the site of two nineteenth-century utopias, one Mormon, one Icarian; Muscatine, Iowa, once the world’s largest manufacturer of pearl (mussel shell)

buttons; and the mysterious prehistoric bird- and bear-shaped effigy mounds of northeastern Iowa. On a downriver trip between the Twin Cities and St. Louis, she meditates on what can be found in Mississippi river water—state lines, dissolved oxygen, smallmouth bass, corpses, family history, wrecked steamboats, mayfly nymphs, toxic perfluorinated chemicals, philosophies. Knopp first encountered the Missouri as a tourist and became acquainted with it through literary and historical documents, as well as stories told by longtime residents. Her journey includes stops at Fort Bellefontaine, where Lewis and Clark first slept on their sojourn to the Pacific; Little Dixie, Missouri’s slaveholding, hemp-growing region, as revealed through the life of Jesse

James's mother; Fort Randall Dam and Lake Francis Case, the construction of which destroyed White Swan on the Yankton Sioux Reservation; and places that produced unique musical responses to the river, including Native American courting flutes, indie rock, Missouri River valley fiddling, Prohibition-era jazz jam sessions, and German folk music. Knopp's relationship with the Platte is marked by intentionality: she settled nearby and chose to develop deep and lasting connections over twenty years' residence. On this adventure, she ponders the half-million sandhill cranes that pass through Nebraska each spring, the ancient varieties of Pawnee corn growing at the Great Platte River Road Archway Monument, a never-broken tract of tallgrass prairie, the sugar beet

industry, and the changes in the river brought about by the demands of irrigation. In the final essay, Knopp undertakes the science of river meanders, consecutive loops of water moving in opposite directions, which form around obstacles but also develop in the absence of them. What initiates the turning that results in a meander remains a mystery. Such is the subtle and interior process of knowing and loving a place. What the River Carries asks readers to consider their own relationships with landscape and how one can most meaningfully and responsibly dwell on the earth's surface. Winner of the 2013 Nebraska Book Award for Nonfiction Honorable Mention for the Association for Literature and the Environment's 2013 Environmental

Creative Nonfiction Award

Dying Planet Multilingual Matters

From celebrated author Gary D. Schmidt comes a picture book biography of a giant in the struggle for civil rights, perfectly pitched for readers today. Sojourner Truth was born into slavery but possessed a mind and a vision that knew no bounds. *So Tall Within* traces her life from her painful childhood through her remarkable emancipation to her incredible leadership in the movement for rights for both women and African Americans. Her story is told with lyricism and pathos by Gary D. Schmidt, one of the most celebrated writers for children in the twenty-first century, and brought to life by award winning and fine artist Daniel Minter. This combination of talent is just right for introducing this

legendary figure to a new generation of children.

Narrative of Sojourner Truth Illustrated  
Orbis Books

A Companion to the History of American Science offers a collection of essays that give an authoritative overview of the most recent scholarship on the history of American science. Covers topics including astronomy, agriculture, chemistry, eugenics, Big Science, military technology, and more Features contributions by the most accomplished scholars in the field of science history Covers pivotal events in U.S. history that shaped the development of science and science policy such as WWII, the Cold War, and the Women's Rights movement  
**Thinking Orientals** John Wiley & Sons  
The stories of Hagar, Dinah, and Tamar

stand out as strangers in the ancestral narrative. They deviate from the main plot and draw attention to the interests and fates of characters who are not a part of the ancestral family. Readers have traditionally domesticated these strange stories. They have made them "familiar"--all about the ancestral family. Thus Hagar's story becomes a drama of deselection, Shechem and the Hivites become emblematic for ancestral conflict with the people of the land, and Tamar becomes a lens by which to read providence in the story of Joseph. This study resurrects the question of these stories' strangeness. Rather than allow the ancestral narrative to determine their significance, it attends to each interlude's particularity and detects ironic gestures made toward the

ancestral narrative. These stories contain within them the potential to defamiliarize key themes of ancestral identity: the ancestral-divine relationship, ancestral relations to the land and its inhabitants, and ancestral self-identity. Perhaps the ancestral family are not the only privileged partners of God, the only heirs to the land, or the only bloodline fit to bear the next generation.

Knowledge management in the space industry University of Illinois Press

This is the biography of a contested memory, how it was born, grew, changed the world, and was changed by it. It's the story of the story of how the Church of Jesus Christ of Latter-day Saints began. Joseph Smith, the church's founder, remembered that his first

audible prayer, uttered in spring of 1820 when he was about fourteen, was answered with a vision of heavenly beings. Appearing to the boy in the woods near his parents' home in western New York State, they told Smith that he was forgiven and warned him that Christianity had gone astray. Smith created a rich and controversial historical record by narrating and documenting this event repeatedly. In *First Vision*, Steven Harper shows how Latter-day Saints (beginning with Joseph Smith) and others have remembered this experience and rendered it meaningful. When and why and how did Joseph Smith's first vision, as saints know

the event, become their seminal story? What challenges did it face along the way? What changes did it undergo as a result? Can it possibly hold its privileged position against the tides of doubt and disbelief, memory studies, and source criticism - all in the information age? Steven Harper tells the story of how Latter-day Saints forgot and then remembered accounts of Smith's experience and how Smith's 1838 account was redacted and canonized. He explores the dissonance many saints experienced after discovering multiple accounts of Smith's experience. He describes how, for many, the dissonance has been resolved by a reshaped collective memory.
