MICHAEL VALENCIA

Proceedings of the ... Canadian Symposium on Remote Sensing Duke University Press

Tenth in a series of annual reports comparing business regulations in 185 economies, *Doing Business 2013* measures regulations affecting 11 areas of everyday business activity around the world.

Doing Business 2013 Frontiers Media SA

This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Central Valley Project Studies Emerald Group Publishing

'This is a very business-like book in its approach. It has an impressive global reach in its authorship, focal areas and use of evidence; it hits all the major practical challenges of family firms in a spirit that is fresh and current; and it deals with the cutting-edge themes and issues that are uppermost

in the minds of owners, executives, advisors and researchers in the field.' - Nigel Nicholson, London Business School, author, *Managing the Human Animal*, *Family Wars* and *The 'I' of Leadership* Acclaim for the first edition: 'The authors have taken a lot of pain in putting this handbook together. As the name indicates, this is an excellent handbook for researchers.' - *Global Business Review* 'The Handbook of Research on Family Business has collected and synthesized a broad variety of topics by notable researchers who share a common dedication to family business research. This Handbook provides a comprehensive treatment that advances the frontiers of knowledge in family business, provoking valuable thoughts and discussion. The Handbook will serve as both an authoritative and comprehensive reference work for researchers investigating family enterprises.' - A. Bakr Ibrahim, Concordia University, Montreal, Canada 'Although family business research is a young discipline it is both necessary and important. For the wellbeing and future development of our society the survival of prosperous and passionate family business entrepreneurs is indispensable. In order to help the families in business to better understand how to succeed with their enterprises we need qualified and updated research. This book is the answer!' - Hans-Jacob Bonnier, Bonnier Business Press Group, Sweden and 6th Generation Chairman of the Family Business Network - International 'This Handbook is a unique compilation of the most important and the best recent family business research. The field has grown so rapidly that this effort will be a mark for the research to follow. The Handbook of Research on Family Business will be the reference for scholars in family business for many years to come. It will also stimulate new ideas in research.' - John L. Ward, IMD, Switzerland and Northwestern University, US During the previous decade, the multi-disciplinary field of family business has advanced significantly in terms of advances in theory, development of sophisticated empirical instruments, systematic measurement of family business activity, use of alternative research methodologies and deployment

of robust tools of analysis. This second edition of the Handbook of Research on Family Business presents important research and conceptual developments across a broad range of topics. The contributors – notable researchers in the field – explore the frontiers of knowledge in family business entrepreneurship and stimulate critical thinking, enriching the repository of theoretical frameworks and methodologies. The Handbook takes a systematic and rigorous approach by providing in-depth insights into the dynamics of family business, its context and the significant role of stakeholders. Ultimately, this scholarly compendium of extant family business papers is an invaluable resource for researchers, educators, family business consultants, family business owner-managers and students.

Artificial intelligence (AI) is a branch of computer science that models the human ability of reasoning, usage of human language and organization of knowledge, solving problems and practically all other human intellectual abilities. Usually it is characterized by the application of heuristic methods because in the majority of cases there is no exact solution to this kind of problem. The Mexican International Conference on Artificial Intelligence (MICAI), a yearly international conference series organized by the Mexican Society for Artificial Intelligence (SMIA), is a major international AI forum and the main event in the academic life of the country's growing AI community. In 2010, SMIA celebrated 10 years of activity related to the organization of MICAI as is represented in its slogan: "Ten years on the road with AI". MICAI conferences traditionally publish high-quality papers in all areas of artificial intelligence and its applications. The proceedings of the previous MICAI events were also published by Springer in its Lecture Notes in Artificial Intelligence (LNAI) series, vols. 1793, 2313, 2972, 3789, 4293, 4827, 5317, and 5845. Since its foundation in 2000, the conference has been growing in popularity and improving in quality.

This book reviews the current knowledge of the globally circulating SARS-CoV-2 variants, highlights their distinct genetic characteristics and associated conformational changes in the viral spike protein, and profoundly discusses the mechanisms of convergent evolution that led to the rise of these mutated strains at different geographic regions during the Covid-19 pandemic. Furthermore, the book explores how these variants do and may impact the efficacy of established neutralizing antibody-based (nAb) vaccines and therapeutics by analysing latest in vivo and in vitro clinical data. Finally, the author discusses ways on how nAb Covid-19 treatment derived immune escape of SARS-CoV-2 could be minimized in the future.
