"Essential reading for anyone who wants to understand history - and then go out and change it." -President Barack Obama Nelson Mandela was one of the great moral and political leaders of his time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. After his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela was at the center of the most compelling

and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is still revered everywhere as a vital force in the fight for human rights and racial equality. *Long Walk to Freedom* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela told the extraordinary story of his life -- an epic of struggle, setback, renewed hope, and ultimate triumph. The book that inspired the major motion picture *Mandela: Long Walk to Freedom*.

In *Secession and Security*, Ahsan I. Butt argues that states rather than separatists determine whether a secessionist struggle will be peaceful, violent, or genocidal. He investigates the strategies, ranging from negotiated concessions to large-scale repression, adopted by states in response to separatist movements. Variations in the external security environment, Butt argues, influenced the leaders of the Ottoman Empire to use peaceful concessions against Armenians in 1908 but escalated to genocide against the same community in 1915; caused Israel to reject a Palestinian state in the 1990s; and shaped peaceful splits in Czechoslovakia in 1993 and the Norway-Sweden union in 1905.

Butt focuses on two main cases—Pakistani reactions to Bengali and Baloch demands for independence in the 1970s and India's responses to secessionist movements in Kashmir, Punjab, and Assam in the 1980s and 1990s. Butt's deep historical approach to his subject will appeal to policymakers and observers interested in the last five decades of geopolitics in South Asia, the contemporary Israeli-Palestinian conflict, and ethno-national conflict, separatism, and nationalism more generally.

As the reviver of true Islamic teachings, Hazrat Mirza Ghulam Ahmad(as) portrayed to the world the God of Islam; a God Who speaks and exists. Allah is the name of the One, Supreme-Being also known as God in other faiths. Throughout this book, Hazrat Ahmad(as) details the nature of Allah and how one can establish a living connection with him, leading toward the certainty of His existence. He describes Allah's attributes and what they mean for us, as humans and believers. Hazrat Ahmad(as), through divine signs and proof from the Quran, Sunnah and Hadith proved that Allah talks today as he spoke before. This book answers many questions about Allah - leading toward a better and enlightened understanding of the Creator, ultimately helping us toward better worship of Allah. This book also highlights the deep love Hazrat Ahmad(as) had for Allah.

Polymeric Gels: Characterization, Properties and Biomedical Applications covers the fundamentals and applications of polymeric gels. Particular emphasis is given to their synthesis, properties and characteristics, with topics such as natural, synthetic, and smart polymeric gels, medical applications, and

advancements in conductive and magnetic gels presented. The book covers the basics and applications of hydrogels, providing readers with a comprehensive guide on the types of polymeric gels used in the field of biomedical engineering. Provides guidance for decisions on the suitability and appropriateness of a synthetic route and characterization technique for particular polymeric networks Analyzes and compares experimental data Presents in-depth information on the physical properties of polymeric gels using mathematical models Uses an interdisciplinary approach to discuss potential new applications for both established polymeric gels and recent advances

Journey of Hope - Authorized by Mother Teresa Disha Publications

This book explains how colonial legacies and the postcolonial state of Pakistan negatively influenced the socio-political and cultural dynamics and the security situation in Pakistan's Pashtun 'tribal' areas, formerly known as the Federally Administered Tribal Areas (FATA). It offers a local perspective on peace and conflict resolution in Pakistan's Pashtun 'tribal' region. Discussing the history and background of the former-FATA region, the role of Pashtun conflict resolution mechanism of Jirga, and the persistence of colonial-era Frontier Crimes Regulations (FCR) in the region, the author argues that the persistence of colonial legacies in the Pashtun 'tribal' areas, especially the FCR, coupled with the overarching influence of the military on security policy has negatively impacted the security situation in the region. By focusing on the Jirga and Jirga-based Lashkars (or Pashtun militias), the book demonstrates how Pashtuns have engaged in their own initiatives to handle the rise of militancy in their region.

Moreover, the book contends that, even after the introduction of constitutional reforms and FATA's merger with the Khyber Pakhtunkhwa province, little has changed in the region, especially regarding the treatment of 'tribal' Pashtuns as equal citizens of Pakistan. This book explains, in detail, why indigenous methods of peace and conflict resolution, such as the Jirga, could play "some" role towards long-term peace in the South Asian region. Historically and contextually informed with a focus on North-West Pakistan, this book will be of interest to academics researching South Asian Studies, International Relations, Peace and Conflict Studies, terrorism, and traditional justice and restorative forms of peace-making.

It all started with a poem that I sent to Mother Teresa when she was still with us. The poem was called 'The Nun I Love'. She responded with a letter thanking me for the poem and, inviting me to come work with her and the Sisters of Charity in Calcutta, India. I could not resist answering her invitation and gladly accepted. Over 300 pages with 100+ quotes and pictures from Ana's journey to Calcutta.

Drawing on insights from theoretical engagements with borders and subalternity, *Beyond Religion in India and Pakistan* suggests new frameworks for understanding religious boundaries in South Asia. It looks at the ways in which social categories and structures constitute the bordering logics inherent within enactments of these boundaries, and positions hegemony and resistance through popular religion as an important indication of wider developments of political and social change. The book also

shows how borders are continually being maintained through violence at national, community and individual levels. By exploring selected sites and expressions of piety including shrines, texts, practices and movements, Virinder S. Kalra and Navtej K. Purewal argue that the popular religion of Punjab should neither be limited to a polarised picture between formal, institutional religion, nor the 'enchanted universe' of rituals, saints, shrines and village deities. Instead, the book presents a picture of 'religion' as a realm of movement, mobilization, resistance and power in which gender and caste are connate of what comes to be known as 'religious'. Through extensive ethnographic research, the authors explore the reality of the complex, dynamic and contested relations that characterize everyday material and religious lives on the ground. Ultimately, the book highlights how popular religion challenges the borders and boundaries of religious and communal categories, nationalism and theological frameworks while simultaneously reflecting gender/caste society.

History of Makkah Islam International Publications Ltd

Part travelogue, part autobiography, "The Road to Mecca" is the compelling story of a Western journalist and adventurer who converted to Islam in the early twentieth century. A spiritual and literary counterpart of Wilfred Thesiger and a contemporary of T. E. Lawrence (Lawrence of Arabia), Muhammad Asad journeyed around the Middle East, Afghanistan and India. This is an account of Asad's adventures in Arabia, his inner awakening, and his relationships with nomads and royalty alike, set in the wake of the First World War. It can be read on many levels: as a eulogy to a lost world, and as the poignant account of a man's search for

meaning. It is also a love story, defying convention and steeped in loss. With its evocative descriptions and profound insights on the Islamic world, "The Road to Mecca" is a work of immense value today.

The Testimonies of Indian Soldiers and the Two World Wars Prabhat Prakashan

Summary: "Since the rise of the Taliban and Al Qaeda, the traditional Islamic schools known as the madrasa have frequently been portrayed as hotbeds of terrorism. For much longer, the madrasa has been considered by some as a backward and petrified impediment to social progress. However, for an important segment of the poor Muslim populations of Asia, madrasas constitute the only accessible form of education. This volume presents an overview of the madrasas in countries such as China, Indonesia, Malaysia, India and Pakistan."--Publisher description.

This book highlights the sites that are important whenever Makkah is mentioned like the Black Stone and Zamzarn

Well.

Pakistan Or the Partition of India Amsterdam University Press
In the two World Wars, hundreds of thousands of Indian sepoy were mobilized, recruited and shipped overseas to fight for the British Crown. The Indian Army was the chief Imperial reserve for an empire under threat. But how did those sepoy understand and explain their own war experiences and indeed themselves through that experience? How much did their testimonies realise and reflect their own fragmented identities as both colonial subjects and imperial policemen? The Testimonies of Indian Soldiers and the Two World Wars draws upon the accounts of Indian combatants to explore how they came to terms with the conflicts. In thematic chapters, Gajendra Singh traces the evolution of military identities under the British Raj and considers how those identities became embattled in the praxis of soldiers' war testimonies – chiefly letters, depositions and interrogations. It becomes a story of mutiny and obedience; of horror, loss and silence. This book tells that story and is an important contribution to histories of the British Empire, South Asia and the two World Wars.

Quantitative Magnetic Resonance Imaging is a 'go-to' reference for methods and applications of quantitative magnetic resonance imaging, with specific sections on Relaxometry, Perfusion, and Diffusion. Each section will start with an explanation of the basic techniques for mapping the tissue property in question, including a description of the challenges that arise when using these basic approaches. For properties which can be measured in multiple ways, each of these basic methods will be described in separate chapters. Following the basics, a chapter in each section presents more advanced and recently proposed techniques for quantitative tissue property mapping, with a concluding chapter on clinical applications. The reader will learn: The basic physics behind tissue property mapping How to implement basic pulse sequences for the quantitative measurement of tissue properties The strengths and limitations to the basic and more rapid methods for mapping the magnetic relaxation properties T1, T2, and T2* The pros and cons for different approaches to mapping perfusion The methods of Diffusion-weighted imaging and how this approach can be used to generate diffusion tensor maps and more complex representations of diffusion How flow, magneto-electric tissue property, fat fraction, exchange, elastography, and

temperature mapping are performed How fast imaging approaches including parallel imaging, compressed sensing, and Magnetic Resonance Fingerprinting can be used to accelerate or improve tissue property mapping schemes How tissue property mapping is used clinically in different organs Structured to cater for MRI researchers and graduate students with a wide variety of backgrounds Explains basic methods for quantitatively measuring tissue properties with MRI - including T1, T2, perfusion, diffusion, fat and iron fraction, elastography, flow, susceptibility - enabling the implementation of pulse sequences to perform measurements Shows the limitations of the techniques and explains the challenges to the clinical adoption of these traditional methods, presenting the latest research in rapid quantitative imaging which has the possibility to tackle these challenges Each section contains a chapter explaining the basics of novel ideas for quantitative mapping, such as compressed sensing and Magnetic Resonance Fingerprinting-based approaches
