*Special Needs Education* Bloomsbury  
Publishing

This ambitious text is the first of its kind to summarize the theory, research, and practice related to pedagogical content knowledge. The audience is provided with a functional understanding of the basic tenets of the construct as well as its applications to research on science teacher education and the development of science teacher education programs.

**The Chimney Sweeper** AOSIS

The research papers and cases in *The Changing Dynamics of International Business in Africa* provide multi-

disciplinary insights on the opportunities and challenges of doing business in Africa, as well as on the changing competitive dynamics in the region, as Western, BRIC and African multinationals intensify their fight for market dominance.

The Study Problem AFRICAN SUN MeDIA  
This scholarly book is the third volume in an NWU book series on self-directed learning and is devoted to self-directed learning research and its impact on educational practice. The importance of self-directed learning for learners in the 21st century to equip themselves with the necessary skills to take responsibility for their own learning for life cannot be over emphasised. The target audience does not only consist of scholars in the field of self-directed learning in Higher Education and

the Schooling sector but includes all scholars in the field of teaching and learning in all education and training sectors. The book contributes to the discourse on creating dispositions towards self-directed learning among all learners and adds to the latest body of scholarship in terms of self-directed learning. Although from different perspectives, all chapters in the book are closely linked together around self-directed learning as a central theme, following on the work done in Volume 1 of this series (*Self-Directed Learning for the 21st Century: Implications for Higher Education*) to form a rich knowledge bank of work on self-directed learning.

Mobility has become a prominent feature in African societies. Populations all over Africa are both mobile and politically and economically marginal. Yet these populations are actively engaged in maintaining social networks across localities. *Mobilities, ICTs and marginality in Africa* looks at the dramatic changes brought about in socially marginal populations by new ICTs in general and mobile phones in particular. The book aims to situate the cultural, social and, in some cases, transnational context of ICT appropriation and virtual connectivity so as to reposition Africans from various countries and contexts as active agents of social change. The intricacies of local ICT use and the dynamics of mobility in the African context enables us to better understand material cultures, relationships between people, new media and social networking. Equally explored in relation to ICTs are the social and spatial dynamics of communication, association and belonging across spaces - particularly physical borders, social boundaries and confines and possibilities informed by the habits of bodies and practices. *Mobilities, ICTs and marginality in Africa* is rich in theoretically

informed case studies that lend themselves to comparative perspectives and to ethnographies from beyond Africa. *Study and Master Physical Sciences Grade 11 CAPS Learner's Book* Wits University Press

With this book, theologian and political observer Allan Boesak once again displays the strengths of his writings that were evident in the seventies and eighties: bringing Christian theology to bear on the political and socio-economic realities of our world. "A serious and open-hearted commentary on the African Renaissance and the spirituality of politics, but with the clarity of the deeply embedded Christian message." - Danny Titus

***Mobilities, ICTs and Marginality in Africa*** Wits University Press

This book investigates the substantial and growing contribution which African Independent and Pentecostal Churches are making to sustainable development in all its manifold forms. Moreover, this volume seeks to elucidate how these churches reshape the very notion of sustainable development and contribute to the decolonisation of development. Fostering both overarching and comparative

perspectives, the book includes chapters on West Africa (Nigeria, Ghana, and Burkina Faso) and Southern Africa (Zimbabwe and South Africa). It aims to open up a subfield focused on African Initiated Christianity within the religion and development discourse, substantially broadening the scope of the existing literature. Written predominantly by scholars from the African continent, the chapters in this volume illuminate potentials and perspectives of African Initiated Christianity, combining theoretical contributions, essays by renowned church leaders, and case studies focusing on particular churches or regional contexts. While the contributions in this book focus on the African continent, the notion of development underlying the concept of the volume is deliberately wide and multidimensional, covering economic, social, ecological, political, and cultural dimensions. Therefore, the book will be useful for the community of scholars interested in religion and development as well as researchers within African studies, anthropology, development studies, political science, religious studies, sociology of religion, and theology. It will

also be a key resource for development policymakers and practitioners.

Study and Master Physical Science Grade 11 `Teacher's Guide Springer

Shortly after the giant bronze statue of Cecil John Rhodes came down at the University of Cape Town, student protestors called for the decolonisation of universities. It was a word hardly heard in South Africa's struggle lexicon and many asked: What exactly is decolonisation? This edited volume brings together the best minds in curriculum theory to address this important question. In the process, several critical questions are raised: Is decolonisation simply a slogan for addressing other pressing concerns on campuses and in society? What is the colonial legacy with respect to curriculum and can it be undone? How is the project of curriculum decolonisation similar to or different from the quest for postcolonial knowledge, indigenous knowledge or a critical theory of knowledge? What does decolonisation mean in a digital age where relationships between knowledge and power are shifting? The book combines strong conceptual analyses with novel case studies of attempts to 'do

decolonisation' in settings as diverse as South Africa, Uganda, Tanzania and Mauritius. Such a comparative perspective enables reasonable judgements to be made about the prospects for institutional take-up within the curriculum of century-old universities.

*South Asia in the World* بيلومانيا للنشر والتوزيع  
It also outlines a new kind of Third World warfare - neither classic guerrilla warfare nor straightforward external aggression; instead, one comprising elements of civil war, but dominated by the initiatives of external powers.

The Role of Sound Groundwater Resources Management and Governance to Achieve Water Security Three Continents

Through an in-depth examination of the oral and written genres by and about women, Kolawole presents a comprehensive account of the African woman's role in forming and shaping cultural, societal and political spheres.

**Womanism and African Consciousness**  
Routledge

In *The New Tribe*, pioneering author Buchi Emecheta tells the tale of a young Nigerian boy adopted by a white family. Life changes overnight for the Arlingtons

when an abandoned baby girl, Julia, arrives unexpectedly on their doorstep. The couple take her in and settle into family life. But then, just two years later, their lives change once again when they are told a Nigerian mother is in desperate need of a loving home for her baby boy, Chester. Instantly marked as different from the other children in his school - and even from his own family - Chester's pain and confusion at growing up an outcast ignites in him a desire to find out about his biological family. In this poignant, heartwarming story of Chester's journey through childhood, Buchi Emecheta weaves together a tale of love and acceptance while illuminating the vital importance of self-discovery. 'We are able to speak because [Buchi Emecheta] first spoke.' Chimamanda Ngozi Adichie 'Her name deserves to be embedded in our literary history.' Bernardine Evaristo 'A pioneer among female African writers.'  
Guardian

**Self-directed learning research and its impact on educational practice**

Routledge

By the beginning of the twenty-first century, Christianity has taken shape and

established roots in all areas of African reality. It has come to stay. Therefore, we welcome Christianity afresh in Africa, where it has arrived to continue the ancient and vibrant Christianity in Egypt, Ethiopia, and Eritrea. It is appropriate that the Anthology of African Christianity presents, in valuable detail, this new reality that describes its African landscape in totality.

Study & Master Physical Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical

Sciences.

**Study and Master Life Sciences Grade 11 CAPS Study Guide** Joseph Henry Press

Elections have been central to regime collapse in Nigeria because they neither passed the test of citizens' acceptability nor electoral neutrality. They always pushed the country to a dangerous brink which she has often survived after serious constitutional and political bruises. The general election of 1964 rocked the delicate balance of the country resulting in the military coup of January 15, 1966 and a thirty month civil war. The subsequent effort of the military at restructuring the country did not go far enough to win the civic confidence of the people. The military availed itself of another opportunity of tinkering with the system in 1993. However, it demonstrated that it was not immune to civic dishonesty when it annulled the widely acclaimed free and fair presidential election in June 12, 1993. By fits and starts, Nigeria held another election in 1999 which was tolerated only because of citizens' fatigue of military rule. The elections of 2003 and 2007 were classic examples of make-belief

democracy. The feeding of inequity and, if you will, domination, persisted. A combination of fortune, trickery and arm twisting produced a power shift in favour of Dr. Goodluck Ebele Azikwe Jonathan in April 2011. The subsequent attempt by the north to create a strategic consensus did not save it from being pushed into fringe politics forcing some of its spokespersons to vow that they will make governance impossible. The election was better than the worst but much still remains to be done.

**Life Skills in English** UNESCO Publishing  
Diane France loves bones. Why? Because they talk to her. Every skeleton she meets whispers secrets about the life-and death-of its owner. Diane France can hear those secrets because she's a forensic anthropologist, a bone detective. She has the science skills and know-how to examine bones for clues to a mystery: Who was this person and how did he or she die? Bones tell Diane about the life and times of famous people in history, from a Russian royal family to American outlaws and war heroes. They speak to her about murders, mass disasters, and fatal accidents. One day she's collecting

skeletal evidence at a crime scene. A phone call later she's jetting to the site of a plane crash or other unexpected tragedy to identify victims. Young readers will be captivated by the thrilling real-life story of this small-town girl full of curiosity and mischief who became a world-famous bone detective.

Apartheid's Contras Rowman & Littlefield Study & Master Physical Sciences Grade 11 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences. The comprehensive Learner's Book: • explains key concepts and scientific terms in accessible language and provides learners with a glossary of scientific terminology to aid understanding. • provides for frequent consolidation in the Summative assessments at the end of each module • includes case studies that link science to real-life situations and present balanced

views on sensitive issues • includes 'Did you know?' features providing interesting additional information • highlights examples, laws and formulae in boxes for easy reference.

Physical Sciences, Grade 12 Nova Science Pub Incorporated

Presents issues of particular relevance to the region, and explores the potential for improvement both in domestic and international efforts at alleviating the problems of South Asia.

The innovative Teacher's File includes: \* guidance on the teaching of each lesson for the year \* answers to all activities in the Learner's Book \* assessment guidelines \* photocopiable templates and resources for the teacher

A History of South Africa ABDO

As nation-states in the Northern Hemisphere experience economic crisis, political corruption and racial tension, it seems as though they might be 'evolving' into the kind of societies normally associated with the 'Global South'. Anthropologists Jean and John Comaroff draw on their long experience of living in Africa to address a range of familiar themes - democracy, national borders, labour and capital and multiculturalism. They consider how we might understand these issues by using theory developed in the Global South. Challenging our ideas about 'developed' and 'developing' nations, Theory from the South provides new insights into key problems of our time.
