The German Tradition of Psychology in Literature and Thought, 1700-1840 BRILL

The purpose of this text is to provide the Army with a factual account of the organization and operations of the Soviet resistance movement behind the German forces on the Eastern Front during World War II. This movement offers a particularly valuable case study, for it can be viewed both in relation to the German occupation in the Soviet Union and to the offensive and defensive operations of the Wehrmacht and the Red Army. The scope of the study includes an over-all picture of a quasi-military organization in relation to a larger conflict between two regular armies. It is not a study in partisan tactics, nor is it intended to be. German measures taken to combat the partisan movement are sketched in, but the story in large part remains that of an organization and how it operated. The German planning for the invasion of Russia is treated at some length because many of the circumstances which favored the rise and development of the movement had their bases in errors the Germans made in their initial planning. The operations of the Wehrmacht and the Red Army are likewise described in considerable detail as the backdrop against which the operations of the partisan units are projected. Because of the lack of reliable Soviet sources, the story has been told much as the Germans recorded it. German documents written during the course of World War II constitute the principal sources, but many survivors who had experience in Russia have made important contributions based upon their personal experience.

Deep in the mountains of nineteenth-century Carpathia lies the mysterious and mythic land of Transylvania, a world where evil is ever-present, where danger rises as the sun sets, and where monsters such as Count Dracula, the Wolf Man, and Frankenstein's Monster take form and inhabit man's deepest nightmares -- terrifying legends who outlive generations, defying repeated attacks from the doomed brave souls that challenge them in their never-ending war upon the human race. On order of a secret society, only a lone force of good stands against them -- the legendary monster hunter Van Helsing, a man revered by some and feared by many. In his ongoing battle to rid the earth of these fiendish beings, Van Helsing must now travel to Transylvania to bring down the lethally seductive, enigmatically powerful Count Dracula, and joins forces with the fearless Anna Valerious, a woman out to rid her family of a generations-old curse by defeating the vampire. But unknown to all, the immortal Dracula will stop at nothing to unleash his master plan of subverting human civilization and ruling over a world of havoc, fear, and darkness...

A real book on ethics, as Wittgenstein had it, if one could conceive it in the first place, would be the book to destroy all other books. Yet there is an increasing number of real-world discourses in which ethical values are mobilized as justifications for socio-political action while, in turn, moral problems are becoming a topic of political negotiation. Although it will be difficult to find systematic accounts of an absolute good or of absolute values in these debates, it is equally difficult to imagine them not being deeply informed by such considerations. Rather than merely adding to the corpus of applied ethics on the one hand or remaining in seemingly Wittgensteinian silence about ethics on the other, many contributions to this volume explore the reach of what can be said in ethical terms, while others provide critical discussions of what is being said in various fields of applied ethics and political philosophy under real-world power relations. This volume collects invited contributions from the 35th International Wittgenstein Symposium 2012 in Kirchberg am Wechsel, Austria. Authors include: Alice Cary, Peter Dabrock, Rom Harré, Agnes Heller, Jaakko Hintikka, Peter Koller, Anton Leist, Chantal Mouffe, Julian Nida-Rümelin, Hans Sluga, David Stern, Gianni Vattimo.
