In this manual, you will learn the step by step process to teach your dog any command! Would you be surprised if I told you that there are no secrets to dog training? The reality is that it comes down to understanding the science behind the methods and each dog's individual needs, desires, and perseverance levels. After spending years in the industry-traveling and working with dog trainers throughout the country, training new dog trainers, and even having my own show on Animal Planet (Rescue Dog to Super Dog), I have developed a system that is easy to understand and most importantly-easy to implement. These are techniques that I have evolved over the years by working with some of the best trainers in the industry-and now they are available to you for less than the cost of a cup of coffee!

All kinds of dogs have a number of hard-wired traits bred into them. Hounds love to follow their noses, Retrievers love to fetch and Herding dogs love to herd. With few exceptions, these are pretty harmless activities and don't stand in the way of training. Terriers, however, were bred to hunt and kill vermin independently, digging underground and barking excitedly, almost impervious to pain. Let's see...just a few challenges to overcome in training: strong prey drive, independence, feistiness, digging, barking, the list goes on. In Terrier-Centric Dog Training, author Dawn Antoniak-Mitchell takes up the challenge to help terrier owners train their dogs by making sure they understand the instincts bred into terriers and what the most effective training and management techniques are to use when working with a "natural born killer." You can train your terrier, but just don't let him loose off-leash in a park full of squirrels!
