Quill Chronicle Books

Shortlisted for the Derek Walcott Prize 2020 A Telegraph Book of the Year 2019 The highly anticipated new collection from Forward Prize-winner Kei Miller explores his strangest landscape yet - the placeless place. Here is a world in which it is both possible to hide and to heal, a landscape as much marked by magic as it is by murder.

Maps of the Imagination Carcanet Press Ltd

Examines the pivotal relationship between mapping and civilization, demonstrating the unique ways that maps relate and realign history, and shares engaging cartography stories and map

lore.

The Cartographer Tries to Map a Way to Zion Wilfrid Laurier Univ. Press

Kei Miller's work was acclaimed by the distinguished Jamaican writer Olive Senior as 'Some of the most exciting poetry I've read in years... An extraordinary new voice singing with clarity and grace.' *A Light Song of Light* sings in the rhythms of ritual and folktale, praise songs and anecdotes, blending lyricism with a cool wit, finding the languages in which poetry can sing in dark times. The book is in two parts: Day Time and Night Time, each exploring the inseparable elements that together make a whole. Behind the daylight world of community lies another, disordered, landscape: stories of ghosts and bandits, a darkness violent and seductive. At the heart of the collection is the Singerman, a member of Jamaica's road gangs in the 1930s, whose job was to

sing while the rest of the gang broke stones. He is a presence both mundane and shamanic. Kei Miller's poems celebrate 'our incredible and abundant lives', facing the darkness and making from it a song of the light.

The Phantom Atlas St. Martin's Press

Until the publication of the first edition of 'Star Maps,' books were either general histories of astronomy using examples of antiquarian celestial maps as illustrations, or catalogs of celestial atlases that failed to trace the flow of sky map development over time. The second edition focuses on the development of contemporary views of the heavens and advances in map-making. It captures the beauty and awe of the heavens through images from antiquarian celestial prints and star atlases. This book uniquely combines a number of features: 1) the history of celestial cartography is traced from ancient to modern times; 2) this development is integrated with contemporary cosmological systems; 3) the artistry of sky maps is shown using beautiful color images from actual celestial atlases and prints; 4) each illustration is accompanied by a legend explaining what is being shown; and 5) the text is written for the lay reader based on the author's experience with writing articles for amateur astronomy and map collector magazines. This updated second edition of 'Star Maps' contains over 50 new pages of text and 44 new images (16 in color), including completely new sections on celestial frontispieces, deep-sky objects, playing card maps, additional cartographers, and modern computerized star maps. There is also expanded material about celestial globes, volvelles, telescopes, and planets and asteroids.

On the Map National Geographic

"The Cartographers is one of those brilliant books you have to read twice." — Washington Post "There are echoes of Borges and Bradbury, Pynchon and Finian's Rainbow, but Ms. Shepherd's exhilarating and enjoyable work casts a magical glow all its own." — Wall Street Journal From the critically acclaimed author of *The Book of M*, a highly imaginative thriller about a young woman who discovers that a strange map in her deceased father's belongings holds an incredible, deadly secret—one that will lead her on an extraordinary adventure and to the truth about her family's dark history. What is the purpose of a map? Nell Young's whole life and greatest passion is cartography. Her father, Dr. Daniel Young, is a legend in the field and Nell's personal hero. But she hasn't seen or spoken to him ever since he cruelly fired her and destroyed her reputation after an argument over an old, cheap gas station highway map. But when Dr. Young is found dead in his office at the New York Public Library, with the very same seemingly worthless map hidden in his desk, Nell can't resist investigating. To her surprise, she soon discovers that the map is incredibly valuable and exceedingly rare. In fact, she may now have the only copy left in existence...because a mysterious collector has been hunting down and destroying every last one—along with anyone who gets in the way. But why? To answer that question, Nell embarks on a dangerous journey to reveal a dark family secret and discovers the true power that lies in maps... Perfect for fans of Joe Hill and V. E. Schwab, *The Cartographers* is an ode to art and science, history and magic—a spectacularly imaginative, modern story about an ancient craft and places still undiscovered.

The Cartographer's Secret Clipper Audio

Originally published to wide acclaim, this lively, cleverly illustrated essay on the use and abuse of maps teaches us how to evaluate maps critically and promotes a healthy skepticism about these easy-to-manipulate models of reality. Monmonier shows that, despite their immense value, maps lie. In fact, they must. The second edition is updated with the addition of two new chapters, 10 color plates, and a new foreword by renowned geographer H. J. de Blij. One new chapter examines the role of national interest and cultural values in national mapping organizations, including the United States Geological Survey, while the other explores the new breed of multimedia, computer-based maps. To show how maps distort, Monmonier introduces basic principles of mapmaking, gives entertaining examples of the misuse of maps in situations from zoning disputes to census reports, and covers all the typical kinds of distortions from deliberate oversimplifications to the misleading use of color. "Professor Monmonier himself knows how to gain our attention; it is not in fact the lies in maps but their truth, if always approximate and incomplete, that he wants us to admire and use, even to draw for ourselves on the facile screen. His is an artful and funny book, which like any good map, packs plenty in little space."—Scientific American "A useful guide to a subject most people probably take too much for granted. It shows how map makers translate abstract data into eye-catching cartograms, as they are called. It combats cartographic illiteracy. It fights cartophobia. It may even teach you to find your way. For that alone, it seems worthwhile."—Christopher Lehmann-Haupt, *The New York Times* ". . . witty examination of how and why maps lie. [The book] conveys an important message about how

statistics of any kind can be manipulated. But it also communicates much of the challenge, aesthetic appeal, and sheer fun of maps. Even those who hated geography in grammar school might well find a new enthusiasm for the subject after reading Monmonier's lively and surprising book."—Wilson Library Bulletin "A reading of this book will leave you much better defended against cheap atlases, shoddy journalism, unscrupulous advertisers, predatory special-interest groups, and others who may use or abuse maps at your expense."—John Van Pelt, *Christian Science Monitor* "Monmonier meets his goal admirably. . . . [His] book should be put on every map user's 'must read' list. It is informative and readable . . . a big step forward in helping us to understand how maps can mislead their readers."—Jeffrey S. Murray, *Canadian Geographic*
Theater of the World UCL Press

In this collection, acclaimed Jamaican poet Kei Miller dramatizes what happens when one system of knowledge, one method of understanding place and territory, comes up against another. We watch as the cartographer, used to the scientific methods of assuming control over a place by mapping it, is gradually compelled to recognize—even to envy—a wholly different understanding of place, as he tries to map his way to the rastaman's eternal city of Zion. As the book unfolds the cartographer learns that, on this island of roads that "constrict like throats," every place-name comes freighted with history, and not every place that can be named can be found.

There's a Map on My Lap! University of Chicago Press
This Is Not an Atlas gathers more than 40 counter-cartographies from all over the world. This collection shows how maps are

created and transformed as a part of political struggle, for critical research or in art and education: from indigenous territories in the Amazon to the anti-eviction movement in San Francisco; from defending commons in Mexico to mapping refugee camps with balloons in Lebanon; from slums in Nairobi to squats in Berlin; from supporting communities in the Philippines to reporting sexual harassment in Cairo. *This Is Not an Atlas* seeks to inspire, to document the underrepresented, and to be a useful companion when becoming a counter-cartographer yourself.

Map-Based Mobile Services HarperCollins

This new Handbook unites cartographic theory and praxis with the principles of cartographic design and their application. It offers a critical appraisal of the current state of the art, science, and technology of map-making in a convenient and well-illustrated guide that will appeal to an international and multi-disciplinary audience. No single-volume work in the field is comparable in terms of its accessibility, currency, and scope. The Routledge Handbook of Mapping and Cartography draws on the wealth of new scholarship and practice in this emerging field, from the latest conceptual developments in mapping and advances in map-making technology to reflections on the role of maps in society. It brings together 43 engaging chapters on a diverse range of topics, including the history of cartography, map use and user issues, cartographic design, remote sensing, volunteered geographic information (VGI), and map art. The title's expert contributions are drawn from an international base of influential academics and leading practitioners, with a view to informing theoretical development and best practice. This new volume will provide the reader with an exceptionally wide-ranging

introduction to mapping and cartography and aim to inspire further engagement within this dynamic and exciting field. The Routledge Handbook of Mapping and Cartography offers a unique reference point that will be of great interest and practical use to all map-makers and students of geographic information science, geography, cultural studies, and a range of related disciplines.

Things I Have Withheld Vintage

Discover the mysteries within ancient maps — Where exploration and mythology meet This richly illustrated book collects and explores the colorful histories behind a striking range of real antique maps that are all in some way a little too good to be true. *Mysteries within ancient maps: The Phantom Atlas* is a guide to the world not as it is, but as it was imagined to be. It's a world of ghost islands, invisible mountain ranges, mythical civilizations, ship-wrecking beasts, and other fictitious features introduced on maps and atlases through mistakes, misunderstanding, fantasies, and outright lies. *Where exploration and mythology meet: Author Edward Brooke-Hitching* is a map collector, author, writer for the popular BBC Television program *QI* and a Fellow of the Royal Geographical Society. He lives in a dusty heap of old maps and books in London investigating the places where exploration and mythology meet. *Cartography's greatest phantoms: The Phantom Atlas* uses gorgeous atlas images as springboards for tales of deranged buccaneers, seafaring monks, heroes, swindlers, and other amazing stories behind cartography's greatest phantoms. If you are a fan of this popular genre and a reader of books such as *Prisoners of Geography*, *Atlas of Ancient Rome*, *Atlas Obscura*, *What If*, *Book of General Ignorance*, or *Thing Explainer*, you will love *The Phantom Atlas*

Map The Cartographer Tries to Map a Way to Zion

The fate of empire is to crumble from within. A heinous murder in a small village reveals a terrible truth. Sorcery, once thought dead in Enhover, is not. Evidence of an occult ritual and human sacrifice proves that dark power has been called upon again. Twisting threads of clues lead across the known world to the end of a vast empire, and then, the trail returns home. Duke Oliver Wellesley, son of the king, cartographer, and adventurer, has better things to do than investigate a murder in a sleepy fishing hamlet. For Crown and Company, though, he goes where he's told. As the investigation leads to deeper and darker places, he'll be forced to confront the horrific spectres rising from the shadows of his past. When faced with the truth, will he sacrifice what is necessary to survive? Samantha serves a Church that claims to no longer need her skills. She's apprenticed to a priest-assassin that no one knows. Driven by a mad prophecy, her mentor has prepared her for a battle with ultimate darkness, except, sorcery is dead. When all is at stake, can she call upon an arcane craft the rest of the world has forgotten? The fate of empire is to crumble from within. Do not ask when, ask who.

Flattening the Earth University of Chicago Press

An exploration of walking and mapping as both form and content in art projects using old and new technologies, shoe leather and GPS. From Guy Debord in the early 1950s to Richard Long, Janet Cardiff, and Esther Polak more recently, contemporary artists have returned again and again to the walking motif. Today, the convergence of global networks, online databases, and new tools for mobile mapping coincides with a resurgence of interest in walking as an art form. In *Walking and Mapping*, Karen O'Rourke

explores a series of walking/mapping projects by contemporary artists. She offers close readings of these projects—many of which she was able to experience firsthand—and situates them in relation to landmark works from the past half-century. Together, they form a new entity, a dynamic whole greater than the sum of its parts. By alternating close study of selected projects with a broader view of their place in a bigger picture, *Walking and Mapping* itself maps a complex phenomenon.

Map Worlds Avery

A bold, first collection by an exciting new poet.

The Cartographer Tries to Map a Way to Zion University of Chicago Press

Created for map lovers by map lovers, this rich book explores the intriguing stories behind maps across history and illuminates how the art of cartography thrives today. In this visually stunning book, award-winning journalists Betsy Mason and Greg Miller--authors of the National Geographic cartography blog "All Over the Map"--explore the intriguing stories behind maps from a wide variety of cultures, civilizations, and time periods. Based on interviews with scores of leading cartographers, curators, historians, and scholars, this is a remarkable selection of fascinating and unusual maps. This diverse compendium includes ancient maps of dragon-filled seas, elaborate graphics picturing unseen concepts and forces from inside Earth to outer space, devious maps created by spies, and maps from pop culture such as the schematics to the Death Star and a map of Westeros from *Game of Thrones*. If your brain craves maps--and Mason and Miller would say it does, whether you know it or not--this eye-opening visual feast will inspire and delight.

Walking and Mapping Trinity University Press

For most of the twentieth century, maps were indispensable. They were how governments understood, managed, and defended their territory, and during the two world wars they were produced by the hundreds of millions. Cartographers and journalists predicted the dawning of a “map-minded age,” where increasingly state-of-the-art maps would become everyday tools. By the century’s end, however, there had been decisive shift in mapping practices, as the dominant methods of land surveying and print publication were increasingly displaced by electronic navigation systems. In *After the Map*, William Rankin argues that although this shift did not render traditional maps obsolete, it did radically change our experience of geographic knowledge, from the God’s-eye view of the map to the embedded subjectivity of GPS. Likewise, older concerns with geographic truth and objectivity have been upstaged by a new emphasis on simplicity, reliability, and convenience. *After the Map* shows how this change in geographic perspective is ultimately a transformation of the nature of territory, both social and political.

Augustown transcript Verlag

In *Maps of the Imagination*, Peter Turchi posits the idea that maps help people understand where they are in the world in the same way that literature, whether realistic or experimental, attempts to explain human realities. The author explores how writers and cartographers use many of the same devices for plotting and executing their work, making crucial decisions about what to include and what to leave out, in order to get from here to there, without excess baggage or a confusing surplus of information. Turchi traces the history of maps, from their initial decorative and

religious purposes to their later instructional applications. He describes how maps rely on projections in order to portray a three-dimensional world on the two-dimensional flat surface of paper, which he then relates to what writers do in projecting a literary work from the imagination onto the page.

Harper Muse

By acclaimed Forward Prize winner, novelist, and poet, Kei Miller's linked collection of essays blends memoir and literary commentary to explore the silences that exist in our conversations about race, sex, and gender. In a deeply moving, critical and lyrical collection of interconnected essays, award-winning writer Kei Miller explores the silences in which so many important things are kept. Miller examines the experience of discrimination through this silence and what it means to breach it — “to risk words, to risk truth; and through the body and the histories those bodies inherit” the crimes that haunt them, and how the meanings of our bodies can shift as we move through the world, variously assuming privilege or victimhood. Through letters to James Baldwin, encounters with Soca, Carnival, family secrets, love affairs, questions of aesthetics and more, Miller powerfully and imaginatively recounts everyday acts of racism and prejudice from a black, male, queer perspective. An almost disarmingly personal collection, Kei dissects his experiences in Jamaica and Britain, working as an artist and intellectual, making friends and lovers, discovering the possibilities of music and dance, literary criticism, culture, and storytelling. With both the epigrammatic concision and conversational cadence of his poetry and novels, *Things I Have Withheld* is a great artistic achievement: a work of innovation and beauty which challenges

us to interrogate what seems unsayable and why, "our actions, defense mechanisms, imaginations and interactions" and those of the world around us.

There is an Anger That Moves White Pine Press

Since that ancient day when the first human drew a line connecting Point A to Point B, maps have been understood as one of the most essential tools of communication. Despite differences in language, appearance, or culture, maps are universal touchstones in human civilization. Over the centuries, maps have served many varied purposes; far from mere guides for reaching a destination, they are unique artistic forms, aides in planning commercial routes, literary devices for illuminating a story. Accuracy—or inaccuracy—of maps has been the make-or-break factor in countless military battles throughout history. They have graced the walls of homes, bringing prestige and elegance to their owners. They track the mountains, oceans, and stars of our existence. Maps help us make sense of our worlds both real and imaginary—they bring order to the seeming chaos of our surroundings. With *The Curious Map Book*, Ashley Baynton-Williams gathers an amazing, chronologically ordered variety of cartographic gems, mainly from the vast collection of the British Library. He has unearthed a wide array of the whimsical and fantastic, from maps of board games to political ones, maps of the Holy Land to maps of the human soul. In his illuminating introduction, Baynton-Williams also identifies and expounds upon key themes of map production, peculiar styles, and the commerce and collection of unique maps. This incredible volume offers a wealth of gorgeous illustrations for anyone who is cartographically curious.

Cartography University of Chicago Press

Over the past four decades, the volumes published in the landmark *History of Cartography* series have both chronicled and encouraged scholarship about maps and mapping practices across time and space. As the current director of the project that has produced these volumes, Matthew H. Edney has a unique vantage point for understanding what "cartography" has come to mean and include. In this book Edney disavows the term cartography, rejecting the notion that maps represent an undifferentiated category of objects for study. Rather than treating maps as a single, unified group, he argues, scholars need to take a processual approach that examines specific types of maps—sea charts versus thematic maps, for example—in the context of the unique circumstances of their production, circulation, and consumption. To illuminate this bold argument, Edney chronicles precisely how the ideal of cartography that has developed in the West since 1800 has gone astray. By exposing the flaws in this ideal, his book challenges everyone who studies maps and mapping practices to reexamine their approach to the topic. The study of cartography will never be the same.

The Book of M Routledge

Brad Thor's Summer 2018 Fiction Pick for THE TODAY SHOW!

"Eerie, dark, and compelling, [The Book of M] will not disappoint lovers of *The Passage* (2010) and *Station Eleven* (2014)." -- Booklist
WHAT WOULD YOU GIVE UP TO REMEMBER? Set in a dangerous near future world, *The Book of M* tells the captivating story of a group of ordinary people caught in an extraordinary catastrophe who risk everything to save the ones they love. It is a sweeping debut that illuminates the power that memories have

not only on the heart, but on the world itself. One afternoon at an outdoor market in India, a man's shadow disappears—an occurrence science cannot explain. He is only the first. The phenomenon spreads like a plague, and while those afflicted gain a strange new power, it comes at a horrible price: the loss of all their memories. Ory and his wife Max have escaped the forgetting so far by hiding in an abandoned hotel deep in the woods. Their new life feels almost normal, until one day Max's shadow disappears too. Knowing that the more she forgets, the more dangerous she will become to Ory, Max runs away. But Ory refuses to give up the time they have left together. Desperate to

find Max before her memory disappears completely, he follows her trail across a perilous, unrecognizable world, braving the threat of roaming bandits, the call to a new war being waged on the ruins of the capital, and the rise of a sinister cult that worships the shadowless. As they journey, each searches for answers: for Ory, about love, about survival, about hope; and for Max, about a new force growing in the south that may hold the cure. Like *The Passage* and *Station Eleven*, this haunting, thought-provoking, and beautiful novel explores fundamental questions of memory, connection, and what it means to be human in a world turned upside down.
