The instant New York Times bestseller! Hot on the heels of *The Twin*, the undisputed queen of YA thrillers is back with a scary and suspenseful read about a summer camp filled with dark secrets.

Esme and Kayla once were campers at Camp Pine Lake. Now they're back as counselors-in-training. Esme loves the little girls in her cabin and thinks it's funny how scared they are of everything—the

woods, the bugs, the boys...even swimming in the lake. It reminds her of how she and Kayla used to be. Before... Because Esme and Kayla did something terrible when they were campers. Something they've kept a secret all these years. They vow that this summer will be awesome. Two months of sun, s'mores, and flirting with the cute boy counselors. But then they get a message: **THE LAKE NEVER FORGETS**. The secret they've kept buried for so many years is about to resurface. "[T]he strong buildup...leads to a shockingly satisfying finale. An eerie thriller reminiscent of summer horror movies that will keep readers on edge."—Kirkus "Pays

homage to classic summer camp slasher films...horror fans will likely appreciate this paranoia-fueled tale."—Publishers Weekly

This essay collection studies the Apocalypse and the end of the world, as these themes occupied the minds of biblical scholars, theologians, and ordinary people in Antiquity, the Middle Ages, and Early Modernity. It opens with an innovative series of studies on

"Gendering the Apocalypse," devoted to the texts and contexts of the apocalyptic through the lens of gender. A second section of essays studies the more traditional problem of "Apocalyptic Theory and Exegesis," with a focus on authors such as Augustine of Hippo and Joachim of Fiore. A final series of essays extends the thematic scope to "The Eschaton in Political, Liturgical, and Literary Contexts." In these essays, scholars of history, theology, and literature create a dialogue that considers how fear of the end of the world, among the most pervasive emotions in human experience, underlies a great part of Western cultural production.

Ghosts of Colonies Past and Present is the first comprehensive examination of how the literary production of Benito Pérez Galdós, widely considered Spain's greatest nineteenth-century novelist, addresses the impact of imperial loss on the citizens of Spain. Well before the events that would lead inexorably toward 1898, Galdós's texts question the nature of Spanish imperialism and the effect of

colonial history on the lives of metropolitan citizens.

Methodologically framed by trauma studies, affect studies and the concept of the imperial turn, a close reading of the texts reveals Galdós's preoccupation with explaining not only how Spain lost its vast territories in the Americas in the early part of the century but also how Spanish citizens could manage the trauma of that loss through a reconfiguration of national identity. His novels reveal the deeply entwined nature of colonial relations and how Spain attempted to process the trauma of imperial loss. Moreover, by recognizing that this process extended

across the nineteenth century, it becomes clear that Spain's engagement with European cultural and literary movements was, contrary to the assumptions of European imperialism, neither slow nor imitative but rather illustrative of the nation's unique position on the cusp of the historical shift to the postcolonial present.

As Good As Dead (A Good Girl's Guide to Murder, Book 3)
Accademia University Press

Based on results previously restricted for military use and inaccessible to the public, this practice-oriented handbook introduces the use of enzymes for fast and efficient decontamination of B/C

weapons in various scenarios, including terrorist attacks. It draws on the internationally recognized technological leadership of the German armed forces, whose anti-B/C technology is among the most advanced worldwide. The text is rounded off with a look at future perspectives.

The Battle for Spain Springer

In the thirteenth century, Paris was the largest city in Western Europe, the royal capital of France, and the seat of one of Europe's most important universities. In this vibrant and cosmopolitan city, the beguines, women who wished to devote their lives to Christian ideals without taking formal vows, enjoyed a level

of patronage and esteem that was uncommon among like communities elsewhere. Some Parisian beguines owned shops and played a vital role in the city's textile industry and economy. French royals and nobles financially supported the beguinages, and university clerics looked to the beguines for inspiration in their pedagogical endeavors. The Beguines of Medieval Paris examines these religious communities and their direct participation in the city's commercial, intellectual, and religious life. Drawing on an array of sources, including sermons, religious literature, tax rolls, and royal account books, Tanya Stabler

Miller contextualizes the history of Parisian beguines within a spectrum of lay religious activity and theological controversy. She examines the impact of women on the construction of medieval clerical identity, the valuation of women's voices and activities, and the surprising ways in which local networks and legal structures permitted women to continue to identify as beguines long after a church council prohibited the beguine status. Based on intensive archival research, *The Beguines of Medieval Paris* makes an original contribution to the history of female religiosity and labor, university politics and intellectual debates,

royal piety, and the central place of Paris in the commerce and culture of medieval Europe.

Decontamination of Warfare Agents

Cambridge University Press

The twentieth century witnessed an era of unprecedented, large-scale, anthropogenic changes to the natural environment.

Understanding how environmental factors directly and indirectly affect the emergence and spread of infectious disease has assumed global importance for life on this planet. While the causal links between environmental change and disease emergence are complex, progress in understanding these links, as well as how their impacts may vary

across space and time, will require transdisciplinary, transnational, collaborative research. This research may draw upon the expertise, tools, and approaches from a variety of disciplines. Such research may inform improvements in global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health. The Influence of Global Environmental Change on Infectious Disease Dynamics is the summary of a workshop hosted by the Institute of Medicine Forum on Microbial Threats in September 2013 to explore the scientific and policy implications of the impacts of global

environmental change on infectious disease emergence, establishment, and spread. This report examines the observed and potential influence of environmental factors, acting both individually and in synergy, on infectious disease dynamics. The report considers a range of approaches to improve global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health in the face of ongoing global environmental change. Family History Research University of Chicago Press
The time of Carnival represents a “wild” time at the end of winter and pointing to the beginning of a new

season. It is characterized by the irruption of border figures, animal masks, characters which recall the world of the dead and which bring within themselves the germ of a vital force, of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops. This wild domain shows itself under the shapes of a contiguity between human and animal: the costumes, the masks, refer to a world in which the characteristics of the human and those of the animal are fused and intertwined. Among these figures, in particular, emerge those of the Wild Man, the human being who takes on animal-like attributes and aspects, and of the Bear, the

animal that, more than all the others, gets as close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts, such as the Sámi of Finland or North-American hunter-gatherers, and represents a boundary between the world of nature and the human world, between the domain of animals and the difficult construction of humanity: a process continued for centuries, perhaps millennia, and which cannot still be said complete.

ancient India* IJOPEC
PUBLICATION

This book emphasizes past and current research efforts about principles of natural control of major parasites affecting humans, animals, and crops. Each chapter is a complete and integrated subject that presents a problem and confers on the safe alternatives to chemicals. This book discusses and updates information about three major topics of natural remedies. The first topic is represented in a chapter outlining important information on biological control of parasites, the second topic is represented in three chapters dealing with botanicals as promising antiparasitic agents, and the last

four chapters deal with miscellaneous control strategies against parasites. This easily readable book is designed precisely for students as well as professors linked with the field of parasitic control. We enhanced words with breathing areas in the form of graphical abstracts, figures, photographs, and tables.

Crossing the Ether

HarperCollins UK
'Fascination lies in the human drama, superbly captured by Beevor ... A vivid chronicle of a dreadful time and place' Max Hastings, Sunday Times 'A moving masterpiece' TLS The civil war that tore Spain apart between 1936 and 1939 and attracted liberals and socialists from across the world to support

the cause against Franco was one of the most hard-fought and bitterest conflicts of the 20th century: a war of atrocities and political genocide and a military testing ground before WWII for the Russians, Italians and Germans, whose Condor Legion so notoriously destroyed Guernica. Antony Beevor's account narrates the origins of the Civil War and its violent and dramatic course from the coup d'etat in July 1936 through the savage fighting of the next three years which ended in catastrophic defeat for the Republicans in 1939. And he succeeds especially well in unravelling the complex political and regional forces that played such an

important part in the origins and history of the war.

A History of Knowledge
Ember

Jones, Barry Owen (1932-). Australian politician, writer and lawyer, born in Geelong. Educated at Melbourne University, he was a public servant, high school teacher, television and radio performer, university lecturer and lawyer before serving as a Labor MP in the Victorian Parliament 1972-77 and the Australian House of Representatives 1977-98. He took a leading role in reviving the Australian film industry, abolishing the death penalty in Australia, and was the first politician to raise public awareness of global warming, the 'post-industrial' society, the IT revolution,

biotechnology, the rise of 'the Third Age' and the need to preserve Antarctica as a wilderness. In the Hawke Government, he was Minister for Science 1983-90, Prices and Consumer Affairs 1987, Small Business 1987-90 and Customs 1988-90. He became a member of the Executive Board of UNESCO, Paris 1991-95 and National President of the Australian Labor Party 1992-2000, 2005-06. He was Deputy Chairman of the Constitutional Convention 1998. His books include *Decades of Decision* 1860- (1965), *Joseph II* (1968), *Age of Apocalypse* (1975), and he edited *The Penalty is Death* (1968). *Sleepers, Wake!:* Technology and

the Future of Work was published by Oxford University Press in 1982, became a bestseller and has been translated into Chinese, Japanese, Korean, Swedish and braille. The fourth edition was published in 1995. Knowledge Courage Leadership, a collection of speeches and essays, appeared in 2016.

The legacy of Alexander von Humboldt (1769–1859) looms large over the natural sciences. His 1799–1804 research expedition to Central and South America with botanist Aimé Bonpland set the course for the great scientific surveys of the nineteenth century, and inspired such essayists and artists as Emerson, Goethe, Thoreau, Poe, and Church. The chronicles of the expedition were published in Paris after Humboldt's return, and first among them was the 1807 "Essay on the Geography of Plants." Among the most cited writings in natural history, after the works of Darwin and Wallace, this work appears here

for the first time in a complete English-language translation. Covering far more than its title implies, it represents the first articulation of an integrative “science of the earth,” encompassing most of today’s environmental sciences. Ecologist Stephen T. Jackson introduces the treatise and explains its enduring significance two centuries after its publication.

Girl in Pieces University of Pennsylvania Press
#1 NEW YORK TIMES BESTSELLER "A haunting, beautiful, and necessary book."—Nicola Yoon, #1 New York Times bestselling author of *Everything, Everything*
Charlotte Davis is in pieces. At seventeen she’s already lost more than most people do in

a lifetime. But she’s learned how to forget. The broken glass washes away the sorrow until there is nothing but calm. You don’t have to think about your father and the river. Your best friend, who is gone forever. Or your mother, who has nothing left to give you. Every new scar hardens Charlie’s heart just a little more, yet it still hurts so much. It hurts enough to not care anymore, which is sometimes what has to happen before you can find your way back from the edge. A deeply moving portrait of a girl in a world that owes her nothing, and has taken so much, and the journey she undergoes to put herself back together. Kathleen Glasgow's debut is

heartbreakingly real
and unflinchingly
honest. It's a story you
won't be able to look
away from. And don't
miss Kathleen
