Writing: Texts, Processes and Practices
offers an innovative and multidisciplinary
approach to writing in a variety of
academic and professional settings. The
book is composed of a series of original
research-based accounts by leading
authorities from a range of disciplines.
The papers are linked through a unifying

perspective which emphasises the role
of cultural and institutional practices in
the construction and interpretation of
written texts. This important new book
integrates different approaches to text
analysis, different perspectives on
writing processes, and the different
methodologies used to research written
texts. Throughout, an explicit link is
made between research and practice
illustrated with reference to a number of
case studies drawn from professional
and classroom contexts. The book will be

of considerable interest to those concerned with professional or academic writing and will be of particular value to students and lecturers in applied linguistics, communication studies, discourse analysis, and professional communications training. This book is a tribute to Malcolm Coulthard, who has been remarkably active and influential across a wide range of English Language Studies. He is particularly well-known for his pioneering work in spoken and written discourse analysis and most recently, for his work in forensic linguistics. This collection of specially commissioned, state-of-the-art pieces by leading international linguists is dedicated to the man and his achievements and provides a showcase for the most exciting developments in applied discourse studies. All the papers share common assumptions about language study: that descriptions should be data-based, data-tested and replicable. The collection as a whole

contains original and important new research on descriptions, with intriguing applications to forensic, gender and literary studies.

The Handbook of Historical Pragmatics provides an authoritative and accessible overview of this versatile new field in pragmatics devoted to a diachronic study of language use and human interaction in context. It covers all areas of historical pragmatics from grammaticalization theory to pragmatic entities, such as discourse markers, speech acts and politeness to individual discourse domains from scientific writing to literary discourse. Each contribution, written by a leading specialist, gives a succinct, representative and up-to-date overview of research questions, theories,

methods and recent developments in the field.

This comprehensive and detailed analysis of second language writers' text identifies explicitly and quantifiably where their text differs from that of native speakers of English. The book is based on the results of a large-scale study of university-level native-speaker and non-native-speaker essays written in response to six prompts. Specifically, the research investigates the frequencies of uses of 68 linguistic (syntactic and lexical) and rhetorical features in essays written by advanced non-native speakers compared with those in the essays of native speakers enrolled in first-year composition courses. The

selection of features for inclusion in this analysis is based on their textual functions and meanings, as identified in earlier research on English language grammar and lexis. Such analysis is valuable because it can inform the teaching of grammar and lexis, as well as discourse, and serve as a basis for second language curriculum and course design; and provide valuable insight for second language pedagogical applications of the study's findings. Additive, Adversative and Causal Discourse Markers Taylor & Francis
This monograph aims to contribute to linguistic knowledge about the distribution and function of discourse particles, particularly with respect to a small group of particles which are highly frequent in contemporary spoken

standard French. The book is divided into two parts. Part 1 (Theory) defines discourse particles as such, and gives a dynamic global approach to their description. Matters such as previous research on discourse particles, related categories of particles, instructional semantics, the difference between speech and writing, the delimitation of discourse units, competing approaches to discourse structure and to coherence, and methodology are discussed extensively. Part 2 (Description) offers in-depth corpus-based analyses of six French discourse particles, namely *bon*, *ben*, *eh bien*, *puis*, *donc*, and *alors*, as used in non-elicited native-speaker interaction. The book is of interest to linguists doing research in semantics, pragmatics and discourse studies.

This edited volume provides detailed analyses of multifunctional forms in English and offers hands-on approaches exemplifying relevant implications and useful applications to language and literacy educators in TESOL, ESL/EFL/EAL and research students in applied linguistics and education. The chapters cover: The multifunctionality of utterances in spoken and multimodal corpora, the multifunctionality of linguistic creativity in different genres, multifunctional pronouns in hard and soft sciences, and professional discourse in the university and secondary school contexts. The volume also offers a comparison of the multifunctionality of

verbs between ESL textbooks, native written and spoken English corpora, and between ESL and L1 university students in writing a particular genre; comparisons of the multifunctionality of discourse markers between different registers and between L1 and L2 English speakers, as well as multifunctional metadiscourse markers in different disciplines and paradigms. With detailed analysis of authentic corpus data representing different varieties of English, specialized use in different contexts and disciplines, and practical teaching and learning applications, the volume bridges theory and practice, providing a creatively designed resource for students, educators and researchers looking to understand multifunctional forms in English.

Corpus-Based Approaches to English Language Teaching John Benjamins Publishing

This groundbreaking collection explores the beliefs and approaches to the history of English that do not make it into standard textbooks. Orthodox histories have presented a tunnel version of the history of the English language which is sociologically inadequate. In this book a range of leading international scholars show how this focus on standard English dialect is to the detriment of those which are non-standard or from other areas of the world. *Alternative Histories of English: ** reveals the range of possible 'narratives' about how different varieties of 'Englishes' may have emerged * places emphasis on pragmatic, sociolinguistic and discourse-oriented

aspects of English rather than the traditional grammar, vocabulary and phonology * considers diverse topics including South African English, Indian English, Southern Hemisphere Englishes, Early Modern English, women's writing, and politeness. Presenting a fuller and richer picture of the complexity of the history of English, the contributors to *Alternative Histories of English* explain why English is the diverse world language it is today.

Discourse markers - the particles oh, well, now, then, you know and I mean, and the connectives so, because, and, but and or - perform important functions in conversation. Dr Schiffrin's approach is firmly interdisciplinary, within

linguistics and sociology, and her rigorous analysis clearly demonstrates that neither the markers, nor the discourse within which they function, can be understood from one point of view alone, but only as an integration of structural, semantic, pragmatic, and social factors. The core of the book is a comparative analysis of markers within conversational discourse collected by Dr Schiffrin during sociolinguistic fieldwork. The study concludes that markers provide contextual coordinates which aid in the production and interpretation of coherent conversation at both local and global levels of organization. It raises a wide range of theoretical and methodological issues important to discourse analysis - including the relationship between meaning and use,

the role of qualitative and quantitative analyses - and the insights it offers will be of particular value to readers confronting the very substantial problems presented by the search for a model of discourse which is based on what people actually say, mean, and do with words in everyday social interaction.

The goal of this volume is to examine academic discourse (AD) from cross-linguistic and cross-cultural perspectives. The adjective Cross-cultural in the volume title is not just limited to national contexts but also includes a cross-disciplinary perspective. Twelve scientific fields are under

scrutiny in the articles. One of the unique aspects of the volume is the inclusion of a variety of foreign languages (English (as a lingua franca), Spanish, French, Swedish, Russian, German, Italian, and Norwegian). Besides, in several articles dealing with oral AD, comparisons and parallels are also established with written AD. The research methodologies used in the studies are varied and they offer an overview of the diversity and richness of approaches to AD. All in all, it is hoped that the volume appeals not only to young researchers but also to confirmed scholars interested in cross-linguistic and cross-cultural aspects of AD. It will also be of interest to language teachers or teachers who are involved with e.g. international students and academic

mobility.

Using the narrative essays of undergraduate students, this study aims to understand certain linguistic relations for text construction; namely, the discourse constructs of cohesion, coherence, content, grammar, and text length in English writing. A greater emphasis in this study is given to the understanding of cohesion and coherence as discourse markers. With this in mind, their relation to other salient components of language, such as content, grammar, and text length, are also investigated. This study tries to investigate the features of cohesion and coherence in relation to content, grammar and text length of the English

narratives of a personal experience written by sixty-four first and second year students of two South African Universities in the Gauteng province.

This volume examines how oral and written language function in school learning , and how oral texts can be successfully inter-connected to the written texts that are used on a daily basis in schools. Rather than argue for the prominence of one over the other, the goal is to help the reader gain a rich understanding of how both might work together to create a new discourse that ultimately creates new knowledge. Talking Texts: Provides historical background for the study of talk and text Presents examples of children's and adolescents' natural conversations as

analyzed by linguists. Addresses talk as it interfaces with domains of knowledge taught in schools to show how talk is related to and may be influenced by the structure, language, and activities of a specific discipline. Bringing together seminal lines of research to create a cohesive picture of discourse issues germane to classrooms and other learning settings, this volume is an essential resource for researchers, graduate students, classroom teachers, and curriculum specialists across the fields of discourse studies, literacy and English education, composition studies, language development, sociolinguistics, and applied linguistics.

In our everyday speech we represent events and situations, but we also provide commentary on these representations, situating ourselves and others relative to what we have to say and situating what we say in larger contexts. The present volume examines this activity of discourse marking from an enunciative perspective, providing the first English-language study of the highly influential Theory of Enunciative and Predicative Operations. This semantic/pragmatic theory is popular among academics who specialize in linguistics, discourse analysis, translation studies and didactics in France, but has not yet been widely adopted elsewhere. The tools of this theory are applied to a variety of specific discourse markers in contemporary

English and semantic hypotheses are tested using the data-based approach of corpus linguistics. This book therefore provides an English-speaking readership with the keys to understand the theory underlying the author's analysis of a selection of markers ('anyway', 'indeed', 'in fact', 'yet', 'still', 'like' and 'I think'). This book will provide a valuable resource for students and researchers in linguistics with an interest in discourse markers, natural language argumentation, formal semantics, the interfaces between syntax, semantics and pragmatics, linguistic theorisation and French - or "poststructural" - models of discourse analysis.

Discourse markers and modal particles are fuzzy linguistic categories that are difficult to describe. The contributions in this volume go beyond this statement. They discuss the intersection between modal particles and discourse markers and examine whether or not it is possible to draw a line between these two types of linguistic expressions. On the basis of new synchronic and diachronic data, from speech and writing, from European and Asian languages or cross-linguistically, the authors answer the question whether discourse markers and modal particles are distinct categories, whether they form a cline, or whether modal particles are a subcategory of discourse markers. This common question shows up

throughout all chapters, which makes the book to a coherent whole. By disentangling the complexity of categorizing multifunctional expressions, this book also sheds new light on the processes of meaning extension. The traditional discourse and modal functions are complemented by interactional and textual ones. A must read for functional linguists.

For any training and practicing secondary English teachers, *Essential Grammar* will be a compulsory classroom companion.

Essential Grammar GRIN Verlag
Covering nearly one thousand years, this volume explores medieval and modern English texts from fresh perspectives. Within the relatively new field of historical discourse linguistics, the synchronic analysis of large textual units

and consideration of text-external features in relation to discourse has so far received little attention. To fill that gap, this volume offers studies of medieval instructional and religious texts and correspondence from the early modern period. The contributions highlight writer-audience relationships, the intended use of texts, descriptions of text-type, and questions of orality and manuscript contextualization. The topics, ranging from the reception of Old English texts to the conventions of practical instruction in Middle English to the epistolary construction of science in early Modern English, are directly relevant to historical linguists, discourse and text linguists, and students of the history of English.

Corpus-Based Approaches to ELT presents a compilation of research exploring different ways to apply corpus-based and corpus-informed approaches to English language teaching. Starting with an overview of research in the field of corpus linguistics and language teaching, various scenarios including academic and professional settings, as well as English as International Language, are described. Corpus-Based Approaches to ELT goes on to put forward several chapters focusing on error analysis using learner corpora and comparable native speaker corpora. Some of these chapters use translations

and their original sources, while others compare the production of learners from different L1 in multilingual learner corpora. Also presented are new tools for corpus processing: a query program for parallel corpora, and the provision of tools to implement pedagogical annotation. The last section discuss the challenges and opportunities that multilayered and multimodal corpora may pose to corpus linguistic investigation. This book will be indispensable to those teaching in higher education and wishing to develop corpus-based approaches, as well as researchers in the field of English Language Teaching.
