 Charles Lenox, Victorian gentleman and armchair explorer, likes nothing more than to relax in his private study with a cup of tea, a roaring fire and a good book. But when his lifelong friend Lady Jane asks for his help, Lenox cannot resist the chance to unravel a mystery. Prudence Smith, one of Jane's former servants, is dead of an apparent suicide. But Lenox suspects something far more sinister: murder, by a rare and deadly poison. The grand house where the girl worked is full of suspects, and though Prue had dabbled with the hearts of more than a few men, Lenox is baffled by the motive for the girl's death. When another body turns up during the London season's most fashionable ball, Lenox must untangle a web of loyalties and animosities. Was it jealousy that killed Prudence Smith? Or was it something else entirely? And can Lenox find the answer before the killer strikes again - this time, disturbingly close to home?

Burning the Dead traces the evolution of cremation in India and the South Asian diaspora across the nineteenth and twentieth centuries. Through interconnected histories of movement, space, identity, and affect, it examines how the so-called traditional practice of Hindu cremation on an open-air funeral pyre was culturally transformed and materially refashioned under British rule, following intense Western hostility, colonial sanitary acceptance, and Indian adaptation. David Arnold examines the critical reception of Hindu cremation abroad, particularly in Britain, where India formed a primary reference point for the cremation debates of the late nineteenth century, and explores the struggle for official recognition of cremation among Hindu and Sikh communities around the globe. Above all, Arnold foregrounds the growing public presence and assertive political use made of Hindu cremation, its increasing social inclusivity, and its close identification with Hindu reform movements and modern Indian nationhood.

'It made me rethink the roots of our deepest fears and insecurities, and why we often disappoint ourselves in how we manifest them' Bill Clinton, Guardian Winner of the Pulitzer Prize in 1974 and the culmination of a life's work, *The Denial of Death* is Ernest Becker's brilliant and impassioned answer to the 'why' of human existence. In bold contrast to the predominant Freudian school of thought, Becker tackles the problem of the vital lie - man's refusal to acknowledge his own mortality. The book argues that human civilisation is a defence against the knowledge that we are mortal beings. Becker states that humans live in both the physical world and a symbolic world of meaning, which is where our 'immortality project' resides. We create in order to become immortal -

to become part of something we believe will last forever. In this way we hope to give our lives meaning. In *The Denial of Death*, Becker sheds new light on the nature of humanity and issues a call to life and its living that still resonates decades after it was written.

How has filmmaking technology and practice altered the nature of stardom? How has the manufacture of celebrity altered with the recent appearance of commodity culture in India and the rise of a hyper-connected global economy? By doing so, it describes a distinct moment in India and in the world in which stars and stardom are drawn more closely than ever into the vital events of global culture. Hindi films and their stars are part of the national and global entertainment circuits that are bigger and more competitive than ever. As such, this is a timely book creates opportunities for examining stardom in other industries and provides fruitful cross-cultural perspectives on star identities today.
