The Gyanganj Legacy' is a fictional story for all ages. It combines the richness of folklore with modern wisdom, to unravel the plot of an age-old battle between Good vs Evil, Light vs Darkness.  
*Globalization 2.0* I. K. International Pvt

Ltd  
"Thousands of years ago, the devil found its way to Earth, landing up as a diamond. A monk, in an unstinted effort, shed blood around the diamond and protected it. His immediate disciples and their succeeding generations protected the diamond for years, and avoided displacing it by building an enclosed village around it. Until disaster struck in the form of an earthquake that destroyed the village... A few years after the earthquake, an archaeologist

pockets the diamond and auctions it to a drug lord – but the real diamond is not with the drug lord. Soon, the monk returns to earth and finds in Krishna Khanna, an unassuming lad in the world of business, the man who would go on to save the world. Krishna then goes on a chase that takes him from India to Russia, and finally, to North Korea. Braving the odds of prison camps in North Korea's harsh terrains, with help in the form of his trusted friends, Krishna embarks on a journey to save the world. A lot is at stake: either Krishna finds the diamond and destroys it, or he fails and North Korea puts him to death – while the devil is unleashed and annihilates all of God's creations... "

This book examines the experiences of the globalizing Korean automobile industry, with particular focus on the Hyundai Motor Company (HMC), one of the most prominent of the new Korean multinational corporations. It provides an overview of the changing nature of the global automobile industry, before considering in depth the globalization processes that the Korean automobile

industry has undertaken. Tracing the development of HMC as it recovered from the failure of its first venture overseas, in Canada, and tried again in India, the authors explore the similarities and differences between the practices which HMC implemented in India and Korea. They highlight the importance of production systems and employment relations as part of HMC's growth, and argue that if Korean companies such as HMC are to compete successfully as global automobile producers they will need to increase the proportion of overseas production, establish global supply chains and improve co-ordination between head office and subsidiaries. Based upon extensive fieldwork in India and Korea, this book is a detailed account of the globalization of the

Korean automobile industry and Hyundai Motor Company. Its findings will be of importance to all those who seek to understand the challenges faced by firms that attempt to become global players.

In this first book-length study of Mumbai's taxi industry and of the livelihoods that surround it, Tarini Bedi draws from the lives and voices of chillia taxi drivers who have sustained a hereditary trade for more than a century. Bedi considers the Bombay taxi in all its forms: a material object that is

driven, an economic and political connection, an expression of kinship, an embodiment of urban time and technology, and more. She illustrates how the accumulation of capital in this masculinized and mobile trade depends on forms of fixed domestic labor and an ethics of care, and how connections among these factors impact the production and reshaping of working-class personhood and laboring subjects. From beginning to end, the world of Mumbai automobility unfolds through depiction of the sensory, embodied, and political domains of taxi drivers' work. While most understandings of automobility remain tied to Western assumptions, patterns of driving, (sub)urbanization, and engagements with the road, realities in the Global

South differ. Mumbai Taximen provides a correction to this imbalance from Mumbai through a timely exploration of South Asian social, material, political, labor, and technological histories and practices of motoring and automobility.

**ENGLISH SSC MULTIPLE CHOICE QUESTIONS** Santro

'There's no business like the car business!' Within months of its launch in late 1998, with every well-known global

automobile brand jockeying for a foothold in a small-car market almost monopolized by Maruti Udyog Limited, Hyundai Motor India's debut production, the Santro, emerged as a force to reckon with. The first car to be conceptualized and designed for – and then developed and manufactured in – India, the 'Sunshine Car' has, over a period of sixteen years, set the record for the quickest small car brand to go from zero to one million units sold. It achieved profitability for Hyundai at an unprecedented speed and made an impressive global impact as a made-in-India automobile in markets as diverse as Algeria and Zimbabwe, Western Europe and North America. In Santro: The Car That Built a Company, BVR Subbu, who spearheaded much of the

Santro's success, reveals the hitherto untold story of how this small car made such a big impact. Vivid anecdotes detail the challenges of introducing a new product in a new market, the canny business strategies that were employed to get the better of rival brands, the unforgettable marketing campaigns that made all the difference – and the thrills of the high-stakes power battles and everyday drama that characterize corporate India. By turns revelatory, insightful and delightfully engaging, this is a business story with a difference about a car like no other.
