Artifacts Cycle Alpha Edition

Winter is an Earth-like planet with two major differences: conditions are semi arctic even at the warmest time of the year, and the inhabitants are all of the same sex. Tucked away in a remote corner of the universe, they have no knowledge of space travel or of life beyond their own world. And when a strange envoy from space brings news of a vast coalition of planets which they are invited to join, he is met with fear, mistrust and disbelief . . . 'The Left Hand of Darkness' is a groundbreaking work of feminist science fiction, an imaginative masterpiece which poses challenging questions about sexuality, sexism and the organisation of society.

A young royal from the far north, is sent south for a political marriage in an empire reminiscent of imperial China. Her brothers are dead, her armies and their war mammoths long defeated and caged behind their borders. Alone and sometimes reviled, she must choose her allies carefully. Rabbit, a handmaiden, sold by her parents to the palace for the lack of five baskets of dye, befriends the emperor's lonely new wife and gets more than she bargained for. At once feminist high fantasy and an indictment of monarchy, this evocative debut follows the rise of the empress In-yo, who has few resources and fewer friends. She's a northern daughter in a mage-made summer exile, but she will bend history to her will and bring down her enemies, piece by piece. *The Singing Hills Cycle* *The Empress of Salt and Fortune* *When the Tiger Came Down the Mountain* *Into the Riverlands* The novellas of *The Singing Hills Cycle* are linked by the cleric Chih, but may be read in any order, with each story serving as an entrypoint. Praise for *The Empress of Salt and Fortune* "An elegant gut-punch, a puzzle box that unwinds itself in its own way and in its own time. I cannot recommend it highly enough. Gorgeous. Cruel. Perfect. I didn't know I needed to read this until I did."—Seanan McGuire "A tale of rebellion and fealty that feels both classic and

fresh, The Empress of Salt and Fortune is elegantly told, strongly felt, and brimming with rich detail. An epic in miniature, beautifully realised."—Zen Cho "Nghi Vo's gracefully told debut . . . resides in the intimate margins of its (beautifully imagined) world's history, portraying how the marginalized may yet shape those narratives and harness the power of stories."—Indrapramit Das At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's The Origin of Consciousness in the Breakdown of the Bicameral Mind. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, The New Yorker "He is as startling as Freud was in The Interpretation of Dreams, and Jaynes is equally as adept at forcing a new view of known human behavior."—American Journal of Psychiatry

This book crystallizes and extends the important work Wiebe Bijker has done in the last decade to found a full-scale theory of sociotechnical change that describes where technologies come from and how societies deal with them. Of Bicycles, Bakelites, and Bulbs integrates detailed case studies with theoretical generalizations and political analyses to offer a fully rounded treatment both of the relations between technology and society and of the issues involved in sociotechnical change. The stories of the the safety bicycle, the first truly synthetic plastic, and the fluorescent light bulb—each a fascinating case study in itself—reflect a cross section of time periods, engineering and scientific disciplines, and economic, social, and political cultures. The bicycle story explores such issues as the role of changing gender relationships in shaping a technology; the Bakelite story examines the

ways in which social factors intrude even in cases of seemingly pure chemistry and entrepreneurship; and the fluorescent bulb story offers insights into the ways in which political and economic relationships can affect the form of a technology. Bijker's method is to use these case studies to suggest theoretical concepts that serve as building blocks in a more and more inclusive theory, which is then tested against further case studies. His main concern is to create a basis for science, technology, and social change that uncovers the social roots of technology, making it amenable to democratic politics.
