International Trade & Business Law Review Cambridge University Press

Each day a new law or regulation affects the way respiratory therapists perform their jobs. This basic legal guide contains the extensive information respiratory therapists need to know about the court system, lawyers, law, and litigation. Written by the author, a lawyer and therapist with 13 years of clinical experience ranging from floor therapy to administrative and management functions, this book combines the author's knowledge of the complex

interactions in the legal system and how the legal system relates to therapy delivered at the bedside. A resource for students and professionals, the book presents 16 areas of the law, including medical negligence, hospital law and employment law. The text also contains a series of questions and answers about the subject areas of the law, and provides extensive guidance for therapists navigating the treacherous currents of ever changing laws. This is a book for anyone who treats respiratory therapy patients or manages therapists. Most legal texts are written either by non-lawyers or non-therapists. Non-lawyers do not understand the complex interactions in the legal system, and are not permitted to give advice. Non-therapists may understand the law very

well, but be unable to relate to how therapy is delivered at the bedside. This book is written by a therapist who is a lawyer, and who has been at the bedside. With thirteen years of clinical experience ranging from floor-therapy to administration and management functions, the author understands how a hospital works. The result is a book that is useful both as a course-book and as a reference

This book is a follow-up to the comprehensive Managing Business Disputes in Today's China: Duelling with Dragons (2007) guide on foreign direct investment disputes that can arise in the course of initiating and operating a Chinese joint venture. Since its

inauguration by the Chinese government in 2013, the 'Belt and Road Initiative' (BRI) has included projects in more than 70 countries spanning diverse economic and legal environments. The nature of the BRI coupled with the economic downturn as a result of the COVID-19 pandemic will inevitably generate more challenges than ever. Like its predecessor, this book poses a hypothetical scenario in order to explore the potential issues that may arise from Chinese-foreign business relationships in the BRI context. After setting the scene with the 'Afrina Government's' ill-fated infrastructure project involving Chinese and foreign parties, subsequent chapters provide comprehensive insight on and highlight the following issues that one must consider when dealing with BRI

disputes: dispute settlement options; informal dispute settlement approaches; disputes involving Chinese State-Owned Enterprises; construction and project finance disputes; corruption and bribery; sanctions; environmental issues. This book will provide extensive guidance from seasoned practitioners on the legal and practical issues of disputes that arise from engaging with Chinese companies doing business outside China in the context of BRI projects.

This book brings together a number of contributions examining how changes associated with economic globalization have contributed to the creation of new pressures on, and expectations of, those fields of law connected to the regulation of cross-border commercial transactions. These new demands of law – in particular, that it be more agile or “flexible” in regulating the economy –

have prompted lawmakers and regulators in multiple jurisdictions to adopt a range of new regulatory techniques and legal forms to respond to this challenge. In many cases, these adaptations in law have entailed compromising traditional legal principles, such as legal certainty, in favor of empowering regulators with greater discretion than has traditionally been permitted in modern law. This change raises important questions about the meaning of fairness (certainty or flexibility), as well as the relationship between the public and private good. **Business Law** Blackstone Press

This collection explores the subject of conflicts of interest. It investigates how to manage conflicts of interest, how they can affect well-meaning professionals, and how they can limit the effectiveness of corporate boards, undermine professional ethics, and corrupt expert opinion. The results offer a sobering prognosis for professional ethics and for anyone who relies on professionals who

have conflicts of interest. The contributors are leading authorities on the subject in the fields of law, medicine, management, public policy, and psychology.
