The Law of Evidence applicable to the Courts of the East India Company, explained in a course of lectures delivered by J. B. Norton Kogan Page Publishers

Each year about 4,000 children and teens in the United States are diagnosed with a brain or spinal cord tumor. The illness and its treatment can have devastating effects on family, friends, schoolmates, and the larger community. This newly updated edition contains essential

information families need during this difficult time. It includes descriptions of the newest treatments, such as computer-assisted surgery, stem cell transplants, and targeted therapies as well as practical advice about how to cope with diagnosis, medical procedures,

hospitalization, school, and finances. Woven throughout the text are true stories--practical, poignant, moving, funny--from more than 100 children with cancer, their siblings, and their parents. The book, reviewed by renowned experts in childhood cancer, also contains a cancer survivor's treatment record.

Teachers and governments all agree that if you wish to raise educational standards then it's imperative to improve school attendance, and yet an

average of around ten per cent of secondary pupils are missing school on a daily basis. Despite governments around the globe trying to address this situation, any improvements have been negligible and improvements in school attendance have been stubbornly hard to achieve. As an internationally recognised expert on this topic, Professor Ken Reid offers workable, practical solutions to help schools improve attendance and to reduce non-attendance

and truancy at government level, school and local authority level, individual pupil level and at the family level. Underpinned by the very latest research, but expanded upon with an accessible, practitioner focus, the issues covered by this topical text include: The causes of non-attendance and truancy Successful interventions and the evidence from research Reflections on the attempts to find national solutions Implementing home-school solutions An

agenda for the future Supporting throughout with case-studies and workable solutions to the most demanding of situations, this book will be essential reading for head teachers, deputy head teachers, teachers and any educational professional eager to raise standards for all.

This book empirically explores how different linguistic resources are

utilized to achieve appropriate workplace role inhabitation and to achieve work-oriented communicative ends in a variety of workplaces in Japan. Appropriate role inhabitation is seen to include considerations of gender and interpersonal familiarity, along with speaker orientation to normative structures for marking power and politeness. This uniquely researched edited collection will appeal to scholars of workplace discourse and Japanese sociolinguistics, as well as

Japanese language instructors and adult learners of Japanese. It is sure to make a major contribution to the cross-linguistic/cultural study of workplace discourse in the globalized context of the twenty-first century.

Proceedings of the Parliament of South Australia Wheatmark, Inc. In the spring of 1968, the English faculty at the University of Wisconsin-Madison (UW) voted to remedialize the first

semester of its required freshman composition course, English 101. The following year, it eliminated outright the second semester course, English 102. For the next quarter-century, UW had no real campus-wide writing requirement, putting it out of step with its peer institutions and preventing it from fully joining the “composition revolution” of the 1970s. In *From Form to Meaning*, David Fleming chronicles these events, situating them against the backdrop of late 1960s

student radicalism and within the wider changes taking place in U.S. higher education at the time. Fleming begins with the founding of UW in 1848. He examines the rhetorical education provided in the university’s first half-century, the birth of a required, two semester composition course in 1898, faculty experimentation with that course in the 1920s and 1930s, and the rise of a massive “current-traditional” writing program, staffed primarily

by graduate teaching assistants (TAs), after World War II. He then reveals how, starting around 1965, tensions between faculty and TAs concerning English 101-102 began to mount. By 1969, as the TAs were trying to take over the committee that supervised the course, the English faculty simply abandoned its long-standing commitment to freshman writing. In telling the story of composition’s demise at UW, Fleming shows how contributing factors—the

growing reliance on TAs; the questioning of traditional curricula by young instructors and their students; the disinterest of faculty in teaching and administering general education courses—were part of a larger shift affecting universities nationally. He also connects the events of this period to the long, embattled history of freshman composition in the United States. And he offers his own thoughts on the qualities of the course that have allowed it to

survive and regenerate for over 125 years.
