Media

The International Financial Statistics  
Yearbook, usually published in  
September, contains available annual  
data covering 12 years for countries  
appearing in the monthly issues of IFS.  
The IFS service is the standard source of  
international financial statistics.  
Additional time series in country tables  
and some additional tables of area and  
world aggregates are included in the  
Yearbook.

These proceedings represent the work of  
contributors to the 17th International  
Conference on Intellectual Capital,  
Knowledge Management &  
Organisational Learning (ICICKM 2020),  
hosted by ACI and the University of  
Toronto, Canada on 15-16 October 2020.  
The Conference Chairs are Dr. Anthony  
Wensley, from the University of Toronto  
and Dr. Max Evans, from McGill  
University. The Programme Chair is Dr.  
Ilja Frissen from McGill University.

Efficiency in the Public Sector Springer  
This book examines ways of assessing  
the rational management of  
nonrenewable resources. Integrating  
numerous methods, it systematically  
exposes the strengths of exergy analysis  
in resources management. Divided into  
two parts, the first section provides the  
theoretical background to assessment

methods, while the second section  
provides practical application examples.  
The topics covered in detail include the  
theory of exergy cost and thermo-  
ecological cost, cumulative calculus and  
life cycle evaluation. This book serves as  
a valuable resource for researchers  
looking to investigate a range of  
advanced thermodynamic assessments  
of the influence of production processes  
on the depletion of nonrenewable  
resources.

Regardless of where we live, the  
management of the public sector  
impacts on our lives. Hence, we all have  
an interest, one way or another, in the  
achievement of efficiency and  
productivity improvements in the  
activities of the public sector. For a  
government agency that provides a  
public service, striving for unreasonable  
benchmark targets for efficiency may  
lead to a deterioration of service quality,  
along with an increase in stress and job  
dissatisfaction for public sector

employees. Slack performance targets may lead to gross inefficiency, poor quality of service, and low self-esteem for employees. In the case of regulation, inappropriate policies can lead to unprecedented disasters. Examples include the decimation of fish stocks through mismanagement of fisheries, and power blackouts through inappropriate restrictions on electricity generators and distributors. Efficient taxation policies minimise the tax bill for citizens. In all of these cases, efficient management is required, although it is often unclear how to assess this efficiency. In this volume, several authors consider various aspects and contexts of performance measurement. Hence, this volume represents a unique collection of advances in efficiency assessment for the public sector by leading researchers in the field. Efficiency in the Public Sector is divided into two sections. The first is titled "Issues in Public Sector Efficiency Evaluation" and comprises of chapters 1-4. The second section is titled "Efficiency Analysis in the Public Sector - Advances in Theory and Practice." This division is somewhat arbitrary, in the sense there are significant overlapping themes in both sections. However, it serves to separate chapters that can be characterised as dealing with broader issues (Section I), from chapters that can be characterised as focusing on specific theoretical problems and empirical cases (Section II).

*planning unit index* United Nations Customs administrations around the world face new challenges: an increasing volume of international trade, a revolution in new technologies, and fundamental changes in business models. The benefits of a well-performing customs administration are

clear, as is the need to develop efficient, effective, fair, and modern customs administrations. Customs Matters analyzes the many changes and challenges customs administrations face and pro-poses ways to address them. By offering a cross-sectional view of the main aspects of customs administration, the book guides policymakers and customs officials as they evaluate the current state of their customs system with a view to developing, reinforcing, or relaunching their own roadmaps for customs modernization.

International Financial Statistics May 2002 Springer

Price indexes can be constructed using a "hedonic method" that adjusts for changes in the quality of a product. This handbook sets out best practice for constructing hedonic indexes.

*Hong Kong Monthly Digest of Statistics* WIPO

The purpose of this book is to explain why molecular structure can be determined by single-crystal diffraction of X rays. It is not an account of the practical procedural details, but rather an account of the underlying physical principles, and the kinds of experiments and methods of handling the experimental data that are used.

**Annual Report** planning unit index Index Number Theory and Price Statistics

The objective of the 2014 International Conference on Computer, Network Security and Communication Engineering (CNSCE2014) is to provide a platform for all researchers in the field of Computer, Network Security and Communication Engineering to share the most advanced knowledge from both academic and industrial world, to communicate with each other about their experience and most up-to-date

research achievements, and to discuss issues and future prospects in these fields. As an international conference mixed with academia and industry, CNSCE2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a good opportunity to make friends with scholars around the world. As the first session of the international conference on CNSCE, it covers topics related to Computer, Network Security and Communication Engineering. CNSCE2014 has attracted many scholars, researchers and practitioners in these fields from various countries. They take this chance to get together, sharing their latest research achievements with each other. It has also achieved great success by its unique characteristics and strong academic atmosphere as well as its authority.

Conferences International limited  
The Global Innovation Index ranks the innovation performance of 125 countries and economies around the world, based on 80 indicators. This edition explores the impact of innovation-oriented policies on economic growth and development. High-income and developing countries alike are seeking innovation-driven growth through different strategies. Some countries are successfully improving their innovation

capacity, while others still struggle.

International Monetary Fund

This proceedings volume examines the state-of-the art of productivity and efficiency analysis and adds to the existing research by bringing together a selection of the best papers from the 8th North American Productivity Workshop (NAPW). It also aims to analyze world-wide perspectives on challenges that local economies and institutions may face when changes in productivity are observed. The volume comprises of seventeen papers that deal with productivity measurement, productivity growth, dynamics of productivity change, measures of labor productivity, measures of technical efficiency in different sectors, frontier analysis, measures of performance, industry instability and spillover effects. These papers are relevant to academia, but also to public and private sectors in terms of the challenges firms, financial institutions, governments and individuals may face when dealing with economic and education related activities that lead to increase or decrease of productivity. The North American Productivity Workshop brings together academic scholars and practitioners in the field of productivity and efficiency analysis from all over the world. It is a four day conference exploring topics related to productivity, production theory and efficiency measurement in economics, management science, operations research, public administration, and related fields. The papers in this volume also address general topics as health, energy, finance, agriculture, utilities, and economic development, among others. The editors are comprised of the 2014 local organizers, program committee members, and celebrated guest

conference speakers.

### **Index Number Theory and Price**

**Statistics** University of Chicago Press

Since its introduction into the armoury of the analytical chemist approximately two decades ago the technique of gas chromatography has found very extensive applications in the analysis of most types of organic compounds. One of the few remaining limitations of the technique when applied to such compounds, namely the analysis of very highly boiling and or thermally unstable substances, has been overcome in many instances by the introduction of techniques such as silylation for the conversion of sample components to lower boiling or more stable substances which can be gas chromatographed at reasonably low temperatures. All of this has been extensively dealt with in many books published during recent years dealing with the theory and practice of applying gas chromatography to the analysis and preparative separation of organic compounds. In parallel with these developments there has occurred, particularly over the past decade, a growing interest in the application of gas chromatography to the analysis of organometallic compounds. Indeed, for many types of organometallic compounds, gas chromatography is the analytical method of choice particularly, as so often happens, when the sample is a mixture. To the author's knowledge no complete review exists of the published work in this very interesting new field; a situation it is hoped the present volume will rectify.

### Hong Kong Annual Digest of Statistics

Springer Science & Business Media

The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of

international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly.

### **Crystal Structure Analysis** Oxford

University Press

This work on index-number construction

focuses on production indexes, including

output and input deflators that can be

used for constructing real output and real input. The authors treat separately the different production units: the firm, the industry, and the economy, as well as the different forms of industrial organization: monopoly, monopsony, and competition. Only in the simplest cases is the appropriate theory isomorphic to that of the cost-of-living index because of the interlinkages among the various production units. A firm cannot always assume that the behaviour of its competitors, suppliers, and customers will be unaffected by price changes and only in special cases can an industry take supply and demand conditions as given.

Economic Analysis of Production Price Indexes DEStech Publications, Inc  
A joint production by six international organizations, this manual explores the conceptual and theoretical issues that national statistical offices should consider in the daily compilation of export and import price indices. Intended for use by both ...

**Construction Reports** OECD Publishing  
Although inflation is much feared for its negative effects on the economy, how to measure it is a matter of considerable debate that has important implications for interest rates, monetary supply, and investment and spending decisions. Underlying many of these issues is the concept of the Cost-of-Living Index (COLI) and its controversial role as the methodological foundation for the Consumer Price Index (CPI). Price Index Concepts and Measurements brings together leading experts to address the many questions involved in conceptualizing and measuring inflation. They evaluate the accuracy of COLI, a Cost-of-Goods Index, and a variety of other methodological frameworks as the bases for consumer price construction.
