Organizational Trust Lippincott Williams & Wilkins

Organizations consider trust as a pillar for successful operations in an increasingly global competitive environment. Some professionals go further and argue that in an economy trust is more important than natural resources. This book deals with ways to measure trust and its impact on organizational performance, as well as to

understand the role of Management Accounting in creating trust. The author demonstrates that trust drives organizational performance, and reveals the key role of management accountants in facilitating the flow of trust between CEOs and line managers.

Nursing Research Im Lippincott Williams & Wilkins

This long-awaited new edition of the 1986 AJN Book of the Year Award Winner has been completely revised and updates. It preserves the format of the original and adds new material on case study methods,

study proposals and formats, ethical considerations, institutional review concerns, and the dialect of qualitative and quantitative methods. This book is essential for courses on nursing research, and indispensable for researchers conducting qualitative studies.

Essentials of Nursing Research

Lippincott Williams & Wilkins

'The perfect text for any health care professional who wishes to gain a sound understanding of research...This text succeeds where others fail in terms of the thoroughness of the research process and

the accessible style in which the material is presented. In an age when nursing and health care research is going from strength to strength this book offers those in the world of academia and practice an excellent and essential 'bible' that is a must on any bookshelf' Dr Aisha Holloway, Lecturer Adult Health, Division of Nursing, The University of Nottingham 'a book that helps you each step of the way. A very understandable and enjoyable publication' Accident and Emergency Nursing Journal 'key reference resource that students of research can use at various levels of study. It is comprehensive, user friendly and very easy to read and make sense of' Gillian E Lang, Amazon reviewer The sixth edition of this book reflects significant developments in nursing research in recent years, ensuring the reader is provided with the very latest information on research processes and methods. It continues to explore how to undertake research as well as evaluating and using research findings in clinical practice, in a way that is suitable for both novice researchers and those with more experience. Divided into six sections, the chapters are ordered in a logical fashion

that also allows the reader to dip in and out. The first two sections of the book provide a comprehensive background to research in nursing. The third section presents a variety of qualitative and quantitative approaches, both new and well-established. The final three sections then look at collecting and making sense of the resulting data and putting the research findings into clinical practice. Summarises key points at the start of each chapter to guide you through Includes contributions from a wide range of experts in the field Accessible but doesn't shrink away from complex debates and technical issues New to this edition: Accompanying website (www.wiley.com/go/gerrish) Ten completely new chapters including Narrative Research, Mixed Methods and Using Research in Clinical Practice 'Research Example' boxes from a wide variety of research types

Conducting and Using Nursing Research in the Clinical Setting Jones & Bartlett Publishers

"Research methodology is a dynamic enterprise. Even after writing 10 editions of this book, we have continued to draw new material and inspiration from ground-

breaking advances in research methods and in nurse researchers' use of those methods. It is thrilling to share many of those developments in this new edition. We expect that many of the new methodologic and technological enhancements will be translated into powerful evidence for nursing practice. Four years ago, we considered the 10th edition as a watershed edition of a classic textbook, having added two new chapters. We are persuaded, however, that this 11th edition is even better than the previous one. We have retained many features that made this book a classic textbook and resource, including its focus on research as a support for evidence-based nursing, but have introduced important innovations that we hope will help to shape the future of nursing research"--

If there is a single challenge a person faces in every stage of life from birth to death, it is the necessity of coping with life's exigencies. These often include health problems, social stress, and perceived difficulties. The ability to deal with these issues defines an individual to a large extent and can accelerate or brake one's development in the multitude of mental and physical pathways intrinsic to

life. Coping behaviours include talking out a problem, crying, laughing, relaxation, ignoring the problem, praying, looking for the positive aspects of a situation, assuming everything is terrible, taking medication, hoping a problem will go away, attacking the problem with willpower, cognitive therapy etc. This new book examines new research which will shed light on coping behaviours in a vast array of disease situations.

This introductory nursing research text

assists students in evaluating research findings in terms of their scientific merit and potential of utilization. The text compares naturalistic inquiries (qualitative studies) and traditional scientific research (quantitative studies) with regard to each aspect of a study. In-chapter research examples, both fictitious and actual, provide the student with opportunities to critically read and analyze the strengths

and weaknesses of the studies in relation to concepts presented in each chapter. Two full research reports included at the end of the text facilitate the development of critical reading skills. The Fourth Edition features a stronger balance of qualitative and quantitative research and increased coverage of Research Utilization content -- the steps in a research utilization project are identified and an example is provided.
