Roman Signer - sculpting
in time : [anlässlich der
Ausstellung "Sculpting in
Time", gemeinsam von St.
Paul St und Artspace in
Auckland ...] Simon and
Schuster

When the scientific study of the Black Sea Region began in the late 18th and early 19th centuries, initially commissioned by adjacent powers such as the Habsburg and the Russian empires, this terra incognita was not yet considered part of Europe. The eighteen chapters of this volume show a broad range of thematic foci and theoretical approaches - the result of the enormous richness of the European macrocosm and the BSR. The microcosms of the many different case studies under scrutiny, however, demonstrate the historical dimension of exchange between the allegedly opposite poles of 'East' and 'West' and underscore the importance of mutual influences in the development of Europe and the BSR.

On the Elements Hachette
UK

"...explores how these challenges are met and boldly overcome by designers who immerse themselves in the natural world to create evocative works. Projects include branding and identity strategies for animal sanctuaries, urban agriculture initiatives, farming campaigns and more."-- Website.

*Productive inefficiency in
dairy farming and
cooperation between
spouses: Evidence from
Senegal* Berghahn Books
A new history of modern Japanese architecture, from an environmental perspective Joachim Nijs' Japan: Nation Building Nature is the first book to map out the views of nature that have shaped the widely acclaimed but often misunderstood modern architecture of Japan. By connecting the dots between philosophy, design, geopolitics and an earnest quest for a greener tomorrow, this book explains how Japanese culture can shed

new light on our understanding of ecology, and vice versa. Using a distinctive blend of academic research and personal experience, Nijs draws on architectural history to navigate Japan's complex and unique ecological ethic through the lens of four typological phenomena: earthquakes, monsoon climates, nuclear erasure of life and insularity. This imaginative and refreshing book offers key insights and references for anyone wishing to deepen their knowledge of Japan and its architecture.
Die Korndämonen De Gruyter Saur
Cell-surface carbohydrates play critical roles in cell-cell interactions. This well-written book brings together leading researchers to detail major recent advances regarding our understanding of the molecular mechanisms underlying such processes. Emphasis is given to cell type, specific carbohydrate expression, and the carbohydrates and proteins involved in cell recognition. Topics include the molecular

structure of animal lectins, carbohydrate recognition in cell-cell interaction, chemical synthesis of oligosaccharides, conformational studies on oligosaccharides, and cell-surface carbohydrates, among others. Also included is a full discussion of key experimental approaches such as chemical synthesis and the three-dimensional structural analysis of carbohydrates. Providing both an up-to-date description of the subject and a forecast of likely future developments, Molecular Glycobiology is a much-needed synopsis of an exciting and rapidly expanding field. It will be welcomed by students and researchers in molecular biology, biochemistry, cell biology, and glycobiology.

"Hauser & Wirth : 20 years documents the gallery's history since its founding in 1992 by Iwan Wirth, and Manuela and Ursula Hauser. It dedicates a section to each gallery artist with unpublished archive material, including photographs, personal mementos and

correspondence alongside exhibition photographs and biographical information"--P. [4] of cover.

Dictionary of German Biography (DGB): Plett-Schmidseder Courier Corporation

The Dictionary of German National Biography is unique, complete and comprehensive with biographies of 60,000 people from the German-speaking world. It covers not only individuals from Germany but also from Austria, Switzerland and other countries where German is or used to be spoken. Coverage stretches all the way from the time of Charlemagne to the present day and includes lesser-known as well as world-famous Germans. In order to ensure that entries were as objective as possible, only individuals whose life and works have come to an end were included. *Jewish Rural Communities in Germany* Peter Lang GmbH, Internationaler Verlag Der Wissenschaften Roman Signer is one of the most important and influential contemporary Swiss artists. Over many decades, in a great variety of ways, he has single-mindedly researched the aspect of

time with regard to the meaning of sculpture. His spectacular explosions made him famous, and his reputation as an innovative and unique artist was secured, at the very latest, by his participation in Skulpturen Projekte, Münster 1997, and the Venice Biennial in 1999 representing Switzerland. In this book Brian Butler and Leonhard Emmerling develop a new interpretation of Signer's work by concentrating on the video pieces and by attempting to shed light on the temporal aspect of his work using literature and philosophy as points of reference. Published on the occasion of the exhibition Roman Signer: Sculpting in Time, March - May 2008 at ST PAUL Street Gallery and ARTSPACE, Auckland. Vladislav Shapovalov: Image Diplomacy Hachette UK We examine productive inefficiencies in dairy farming in pastoralist house-holds in Northern Senegal, and using laboratory games, measure the relationship between spousal cooperation and productive inefficiency directly. In house-holds that behave less cooperatively in the games, cows owned by

men produce 10.6% more milk per day than cows owned by women, a gap that remains large and statistically significant after controlling for household, owner, and cow characteristics. Our results suggest that frictions between spouses may indeed explain gender gaps in productivity, and support the use of lab-based measures of household cooperation to complement survey data in explaining collective behaviors.

Fall into the lives of the city's filthy rich with Juno Dawson's deliciously dark and intoxicating London Collection. WINNER OF THE YA BOOK PRIZE 2020 Jana Novak's history sounds like a classic model cliché: tall and gangly, she's uncomfortable with her androgynous looks until she's unexpectedly scouted and catapulted to superstardom... But the fashion industry is as grimy as it is glamorous. And there are unexpected predators at every turn. Jana is an ordinary girl from a south London estate, lifted to unimaginable heights. But the further you rise, the more devastating your fall

... Honest and raw, this is a timely exposé of the dark underbelly of the fashion industry in an era of #TimesUp and #MeToo. It might just be Juno Dawson's most important book yet. 'Juno Dawson slashes through the glamour of the fashion industry ... combining blockbuster appeal with piercing commentary on modelling, body image and consent' Observer 'Guaranteed to be your summer read' Glamour **Jewish Music** Wild Things Publishing

Few economic events have had a more profound or enduring impact than the German hyperinflation of 1923, still remembered popularly as a root cause of Hitler's rise to power. Yet many historians have argued that inflationary policies were, on balance, advantageous to post-1918 Germany, both boosting growth and helping to reduce reparations. The scholarly consensus is that there was no viable alternative to inflation. In *Paper and Iron* Niall Ferguson takes a different view. He argues that inflation was indeed an economic and political disaster, and further that there were alternative economic policies which could have stabilised the German

currency in 1920. To explain why these were not adopted he points to long-term defects in the political institutions of the Reich which went back as far as the 1890s and which persisted beyond 1918. The book therefore reveals the Wilhelmine origins of Weimar's failure, as well as casting light on the origins of the Third Reich.

German armies examines the diversity of German involvement in European conflict from the Peace of Westphalia to the age of Napoleon. Challenging assumptions of the Holy Roman Empire as weak and divided, this study provides a comprehensive account of its survival in a hostile environment of centralizing belligerent states. In contrast to the later German states, the Empire was inherently defensive, yet many of its component territories embarked on expansionist, militaristic policies, creating their own armies to advance their objectives. The author examines the resultant tensions and explains the structure and role of the different German forces. In addition, a number of wider issues are

addressed, such as war and the emergence of absolutism, the rise of Austria and Prussia as great powers, non-violent forms of conflict resolution and the relative effectiveness of German military and political institutions in meeting the challenge of revolutionary France. Drawing on a range of sources, the author provides a detailed analysis of the German dimension of the great struggles against Louis XIV's France, competition for supremacy in the Baltic and Mediterranean and the prolonged wars with the Ottoman Turks. German armies extends the boundaries of military history by placing ancien regime warfare within a wider social, cultural and international context. *Paper and Iron* Routledge This publication documents Vladislav Shapovalov's long-term undertaking 'Image Diplomacy', consisting of a film and a series of installations focused on exhibitions as a political medium. The project narrates the battle waged between two ideological blocs, the USSR and the United States, in the field of 'exhibition diplomacy' during the Cold War and gives insight into the unwritten history of Soviet

soft power and socialist internationalism. It compares forgotten archival materials left behind in Europe from Soviet photographic 'kit' exhibitions and films with the American Family of Man exhibition, on display today at Luxembourg's Clervaux Castle and included in the UNESCO Register. Interplays between exhibition histories, geopolitics, and art practice are further examined in the contributions by film scholar Alex Fletcher and curator and researcher Gudrun Ratzinger; a conversation between Shapovalov and curator Emanuele Guidi; and an essay by curator and researcher Andrei Siclodi.00Exhibition: *Ar/ge kunst*, Bolzano, Italy (02.12.2017-10.02.2018). **Beyond Klimt** LIT Verlag Münster Provides authoritative coverage of compounding, mixing, calendaring, extrusion, vulcanization, rubber bonding, computer-aided design and manufacturing, automation and control using microprocessors, just-in-time technology and rubber plant waste disposal. *Hauser & Wirth* Univ of California Press

Discover remarkable information about science, animals, history, and more with this collection of 150 interesting and intriguing facts. Did you know peanut butter could be turned into diamonds? Or that one teaspoon of honey is the life work of a dozen bees? Or that babies have 95 more bones than adults? These are just a few of the facts that you could learn in *Factourism*. Featuring 150 of the most extraordinary things that happen in the world every day, you'll find amazing pieces of trivia accompanied by bright, colorful illustrations. Each beautifully designed page holds a trivia tidbit that will leave you brimming with knowledge. *Road from Geochemistry to Geochemometrics* Cambridge University Press The period between the two World Wars is characterised in the arts by international networks that transcended political and ideological borders. A lively artistic exchange took place, stimulating constructive, expressionist, and fantastic tendencies. An increasingly important role was played by magazines that

disseminated new positions. The outbreak of World War II abruptly interrupted these cosmopolitan art networks. This publication examines the fascinating, artistically fruitful epoch between the wars.

Exhibition: Unteres Belvedere/Orangerie, Vienna, Austria (23.03.-26.08.2018) / BOZAR - Centre for Fine Arts, Brussels, Belgium (21.09.2018-20.01.2019). -- Publisher's website.

Applied Science and Technology Index Hatje Cantz Verlag

This book highlights major problems in the statistical analysis of compositions that have been known for over a century, as well as the corresponding solutions that have been put forward by specialists over the past 30 years. The basic assumptions of normality or multi-normality are pointed out and methods to test and achieve them are also covered. The conventional major and trace element geochemistry and modeling equations are discussed, and are followed by a more sophisticated multidimensional approach to data handling. The book's main focus is on the use of statistical techniques to

facilitate data interpretation. It also highlights the classification (or nomenclature) and tectonic discrimination aspects for both igneous and sedimentary rocks. The book concludes by discussing computer programs that are helping pave the way from geochemistry to geochemometrics. Written by a leading expert in the area of geochemistry, it offers a valuable guide for students and professionals in the area.

Japan: Nation Building

Nature Kerber Verlag
Representing the definitive reference work for this broad and dynamic field, The International Encyclopedia of Geography arises from an unprecedented collaboration between Wiley and the American Association of Geographers (AAG) to review and define the concepts, research, and techniques in geography and interrelated fields. Available as a robust online resource and as a 15-volume full-color print set, the Encyclopedia assembles a truly global group of scholars for a comprehensive, authoritative overview of geography around the world. Contains more than

1,000 entries ranging from 1,000 to 10,000 words offering accessible introductions to basic concepts, sophisticated explanations of complex topics, and information on geographical societies around the world
Assembles a truly global group of more than 900 scholars hailing from over 40 countries, for a comprehensive, authoritative overview of geography around the world
Provides definitive coverage of the field, encompassing human geography, physical geography, geographic information science and systems, earth studies, and environmental science
Brings together interdisciplinary perspectives on geographical topics and techniques of interest across the social sciences, humanities, science, and medicine
Features full color throughout the print version and more than 1,000 illustrations and photographs

Participate! Portraits of Cities and Citizens in Action' offers an introduction to the complex world of urban

development, identity and participation. It explains how the self-understanding of cities is mirrored in their approach to urban development. The basis of the book is formed by portraits of six European cities: Berlin, Hamburg, Paris, Lyon, Amsterdam and Groningen. The book fills a gap as it provides general introductions to cities, a brief outline of the city's planning system, a short historic introduction to the city's planning culture. With telling and outstanding

examples of citizen participation this book offers important insights in both the intrinsic logic of the cities and the mechanisms ? sometimes more inclusive, sometimes more exclusive- of participation. 'Participate!' Is one of the results of the R-link project, a unique cooperation of Dutch policy makers and scholars on participation and urban development. Of interest for urban planners, architects, city journalists and students

and academics in the field of urban planning. The Romance of William of Palerne Nai010 Publishers
#1 New York Times bestselling author Robert Goolrick brings to vivid life New York City in the 1980s, a world of excess, as Rooney looks back on a Wall Street career that began with great success and ended with a precipitous crash. It's the story of how he and a group of other young turks made it to the top in the financial world and then fell.
